1.2 Introduction

WELCOME TO JTE's MAGICWB ICONS 9

Well, well, what do we have here, then? More MagicWB icons from JTE?
Who's icons has he stole now? Everybodys!! 8)

I hope you folks like these cut'n paste icons from me, it's over 40
of them, I haven't counted!! It's not Roman Patzner quality, but...

I was supposed to release this package before christmas, but due to
laziness and a faulty machine it got put back week after week.

Enjoy! :-D

SPECIAL EDITION NOTICE

Due to communication breakdown (!) this package wasn't uploaded to the Aminet when it was first released, so when I came aware of this (Thanks Roman!) this week, I decided to release this SPECIAL EDITION with a couple of extra icons (5 to be precise).
Sorry for any inconvenience!

1.3 Information

All the icons in this package are in 8 colors, 3 bitplanes.

MagicWB v2.0 have a demon that controls the icons so they have the correct colors. So if you use a 16+ color MagicWB, the icon colors will not be messed up. This makes MagicWB v2.0 nearly as fast as the standard 4 color icons.

There are many utilities available now that do the same as the MagicWB demon. Get hold of one if you aren't a registered MagicWB user.

Use IconDepth (v1.4), DoIcon (v1.4), OptIcon (ITool201.LhA) or whatever to convert your icons to 3 bitplanes, for speed.

I have saved the ImageDrawers as projects or tools, so I don't have to make a dummy file to avoid SwazInfo and other programs to go apeshit when you drop the icons in it's field!

1.4 Copyright

COPYRIGHT

MagicWB is Copyright ©1992-1994 Martin Huttenloher.

JTE's MagicWB Icons 9 is Copyright ©1996 Jan-Tore Eliassen.

This package is FREeware, but feel free to send me a postcard if you like my cutting'n pasting or send me an e-mail, also feel free to alter these icons, as I have done with yours!

You are allowed to spread it all over the world using any storage medium available, but you must spread the whole archive.

Programmers & creators of PD-software are allowed to include single icons of this package in their own package-distributions.

No one is allowed to take more than £1,- (English pound) including disk and copying cost, and you must include some other MagicWB icons/patterns to fill up the disk by at least 90%.

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE IS WITH YOU. SHOULD THE SOFTWARE PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY REDISTRIBUTE THE SOFTWARE AS PERMITTED BELOW, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE SOFTWARE (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD

PARTIES OR A FAILURE OF THE SOFTWARE TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

1.7 I've made this shit too!

- Iron Maiden cardset for REKO's Klondike Deluxe AGA III and/or Logic Systems Cardgames Deluxe AGA.

Note! There's 2 versions, the original and the improved for Klondike II & III, which contains some more pictures. I don't think it's on AmiNet, but I got it and the REKO folks got it!! (I saw the original on the NFS AGA Experience Vol. 1 CD-ROM!)

- JTE Magic WB icons 3 -> 10 (JTEMWBx.LhA)
- My Dircetory Opus v4.12 config with lots of buttons, filetypes etc. and a detailed AmigaGuide description file for the config. (JTEDOpus.LhA)
- 4 Grayscale MagicWB patterns packs for use with Magic Selector. (JTEPatx.LhA)
- 3 bootup pics for the great AmigaStart. (JTEBPic.LhA)
- 4 custom maps for Worms from Team17 (JTEWorms.LhA)

PLEASE NOTE! JTEMWB1.LhA & JTEMWB2.LhA should be deleted from the face of the earth as they are lame and the icons from those two packages are updated in JTEMWB3.LhA anyway!

1.8 How to install the icons

Click on ClickForColors for the MagicWB v2.0 palette.

Use a icon update program: MUI_IconUpdate, IconUpdate, SwazInfo or any other, which preserves the tooltypes and position of the icon, to update your old icons.

1.9 Greetings Fellow Earthpeople!

BIG SALUTE GOES OUT

TO ALL OF YOU WHO

HAVE SENT ME

POSTCARDS AND E-MAIL'S,

YOU KNOW WHO YOU ARE !

T H A N K S !

AND

ALL THE USERS AND ABUSERS

ON THE FOLLOWING (A)BBS' :

MORDOR, BYTE BAZAAR, TOTAL REFILL,

MATRIX AND ULTIMA THULE.

1.10 Just Do It!

This is to all you programmers out there:

- Make your programs font sensitive, don't use topaz 8 as standard, let the program use the Systems default font. Some programs looks so ugly in high resolution that I don't use/register them because of that. Use ClassAct or MagicUser Interface to ease your work.
- Make your programs have language/locale support. It's nothing that beats to use a program in your own language. And do remember to include the .ct & .cd files (Preferably CatEdit compatible!) so we can translate your program.

Thank you for your attention, now go do it!
