

FXPic/VBX

from ImageFX

High Speed image decompression ActiveX/VBX control with outstanding special effects and image handling capabilities.

If you use JPEG compressed files in your Visual Basic applications, you know that it can take a long time for them to decompress before they display. If your application requires very FAST image decompression, ImageFX has good news for you. Introducing FXPic/VBX from ImageFX. FXPic combines the outstanding special effects and multimedia capabilities of the award-winning FXTools/VB with fast image decompression technology from Pegasus Imaging Corporation. Our tests show that FXPic decompression times are typically 2 to 4 times and as much as 10 times faster than other products. The proprietary PIC format embeds a 256 color palette in the file for fast one step decompression and display. In addition to the fastest image decompression, FXPic features many exciting imaging and multimedia capabilities.

- 113 professional effects including wipes, diagonals, pushes, pulls, splits, blinds, rolls and many more.
- 103 multiple pass dissolve effects and 8 Wand effects.
- Grain and Delay properties provide total speed control and countless variations for each effect.
- Delayed Effect Notification (DEN) provides timed effect notification.
DEN generates a timed notify event when an effect has completed.
- Background tasks (like sound) are not interrupted during effects.
- Displays BMP, JPEG, and PIC image file formats.
- Incorporates FAST decompression technology from Pegasus Imaging Corporation.
- Advanced imaging capabilities including dithering for fixed and optimized palettes, color reduction, print, flip, crop, rotate, reverse, tile, grayscale, resize, and palette management.
- Supports Image transparency for odd shaped images.
- Supports 4, 8, and 24 bit display.
- Fast thumbnail display.
- 10 properties are provided for enhanced 3D colored borders & bevels for great looking frames or buttons.
- Compact size. VBX and supporting DLLs total less than 300K.
- Fully compatible with FXTools/VB Professional version 3.0.
- Effects can be canceled using a keyboard and/or mouse event.
- Bound Control. Data binding lets you to bind JPEG or PIC image data to an Access database.
- Includes PICPress image compressor from Pegasus Imaging Corp. A \$79 value!
- Includes a license for 2,500 runtimes.

The Ultimate Image Compression for Windows™

If your Windows application requires lightning FAST image decompression, ImageFX has good news for you. FXPic/VBX is simply the best image decompression VBX on the market today. We compared FXPic/VBX to competitive products and FXPic/VBX has the fastest decompression speed and the best image-rendering features of any image VBX. Take a look at the FXPic/VBX demo and see for yourself!

Exceptional Value

Multimedia demands fast image display capabilities. Slow JPEG decompression can take away the effectiveness of an otherwise perfect multimedia application. To address this problem, ImageFX teamed with Pegasus Imaging Corp. to develop FXPic/VBX. With FXPic/VBX, you no longer have to sacrifice speed for disk space savings! Before you decide to purchase imaging tools, compare FXPic's special effects, hotspot, and multimedia capabilities. Compare the speed and quality of the PIC image format. Compare pricing and licensing policies. We are confident that you will discover that FXPic/VBX provides exceptional value

Added Bonus

FXPic/VBX includes the Pegasus PICPRESS image compression software - a \$79 value.

PICPRESS Features:

- Unbeatable Image Compression
- Awesome viewing speed
- Simple compression of one or many images
- Batch processing for compression, expansion, thumbnail creation and color reduction
- High-speed thumbnail viewing and creation
- Complete control over compression settings
- Compresses TGA, BMP, PCX, and TIF images to high quality PIC or JPG files
- Views PIC, JPG, TGA, BMP, PCX, and TIF images

Inexpensive Licensing

FXPic/VBX is not royalty free. FXPic/VBX comes with a license to distribute 2,500 runtimes.

After you distribute 2500 runtimes, you must purchase additional runtimes from ImageFX.

Additional runtimes start at just 10 cents per copy. Compare the benefits and pricing of the PIC image format to other royalty based formats (e.g. GIF, ART, CMP, etc.) and you will see that PIC is the clear winner! Unlimited yearly distribution and custom licenses are available.
