

FXPicTM from ImageFX

High Speed image decompression control with outstanding special effects and image handling capabilities.

Includes 16-bit VBX and 32-bit ActiveX controls.

If you use JPEG compressed images in your Visual Basic applications, you know that it can take a long time for them to decompress before they display. If your application requires very FAST image decompression, ImageFX has good news for you. Introducing FXPic/VBX from ImageFX. FXPic combines the outstanding special effects and multimedia capabilities of the award-winning FXTools/VB with fast image decompression technology from Pegasus Imaging Corporation. Our tests show that FXPic decompression times are typically 2 to 4 times and as much as 10 times faster than other products. The proprietary PIC format embeds a 256 color palette in the file for fast one step decompression and display. In addition to the fastest image decompression, FXPic features many exciting imaging and multimedia capabilities.

- Over 100 professional effects including wipes, diagonals, pushes, pulls, splits, blinds, rolls and many more.
- Over 100 multiple pass dissolve effects.
- Grain and Delay properties provide total speed control and countless variations for each effect.
- Displays BMP, JPG, and PIC image file formats.
- Incorporates FAST decompression technology from Pegasus Imaging Corporation.
- Advanced imaging capabilities including dithering for fixed and optimized palettes, color reduction, print, flip, crop, rotate, reverse, tile, grayscale, resize, and palette management.
- Supports image color transparency for odd shaped images.
- Supports 4, 8, and 24 bit display.
- Fast thumbnail display.
- 10 properties are provided for enhanced 3D colored borders & bevels for great looking frames or buttons.
- Fully compatible with FXTools Professional version 4.00.
- Delayed Effect Notification (DEN) provides timed effect notification. DEN generates a timed notify event when an effect has completed.
- Effects can be canceled using a keyboard and/or mouse event.
- Background tasks (like sound) are not interrupted during effects.
- Bound Control. Data binding allows you to bind JPEG or PIC image data directly to an Access database.
- Includes PICPress image compressor from Pegasus. A \$79 value!
- 16-bit VBX is royalty-free. 32-bit ActiveX includes a license for 10,000 runtimes per year.
