

## **Metaltech: EarthSiege - Thundering robotic combat for those who have the guts!**

We had it coming. We created Cybrids with breakthrough AI to perform dangerous tasks with lightning precision. But we should never have taught them to fight.

One apocalypse later, the Earth lies in ruin from these heavy metal marauders. You and your squad of HERCULAN warriors must prowl this target-rich wasteland to deliver some heavily mechanized pay back. But beware--the Cybrids are an intelligent and relentless enemy. You'll constantly have to train new pilots, develop new tactics, and acquire new weapons to secure an advantage in *Metaltech: EarthSiege*™. If not, they'll be hosing your remains out of the cockpit for the next rookie.

### **Get Ready to Be Blown Away!**

Metaltech: EarthSiege puts enough intensity, challenge, and pyrotechnic graphics in your face to keep you riveted in your HERC's cockpit for days. Assuming you like that sort of thing.

### **Features:**

- + Strap into your cockpit for intense HERC battles with scorching pyrotechnics
- + Strategically configure your HERC with deadly weaponry including EM Pulse Cannons, 300 gigawatt lasers, and optically-guided or lock-on missiles.
- + Stalk the enemy in fluid 3Space animation with incredibly detailed texture-mapped and light-sourced shaded HERCs.
- + Survive over 45 missions across 8 campaigns --- randomly generated enemy tactics and battle conditions guarantee a restart isn't just a replay.
- + Receive communiqués from your commander and squadron with digitized speech in CD version
- + Optional Speech Pack available for 3.5" floppy version.
- + Continue your career into new worlds with new weapons with the *Metaltech: EarthSiege Expansion Pack*.

EarthSiege - BLAST INTO THE METALTECH ERA!
