

## **Enjoy interactive movie adventure in the virtual world of *UNDER A KILLING MOON!***

You are Tex Murphy, private investigator, living in the run down mutant section of post World War III San Francisco. Out of work, Tex is left with the option of staring at his office walls counting the pictures or stepping outside into the street with the hope of landing a case. *UNDER A KILLING MOON* allows you, as the central character, to freely explore the virtual world around you. You must interact directly with characters in order to solve your case. If you are good enough, you may even be able to save the world.

**Never before has work been so fun! With bumbling skills and dry wit TEX stumbles into one great adventure after another.**

You, as Tex, travel in real time through twenty-five unique and intriguing rooms, free to explore every inch from top to bottom of this virtual 3-D world and beyond. Interacting with real characters, twenty-five live actors and actresses the list of which includes Brian Keith, Margot Kidder, Russell Means and the voice of James Earl Jones, you literally control the course of the game by the "attitude" with which you respond to the different personalities. In addition to the rooms and characters, you must contend with challenging puzzles and traps. There is never a dull moment as you laugh your way through the ultimate game experience in *UNDER A KILLING MOON*.

***UNDER A KILLING MOON* has over three and one-half hours of video and one and one-half hours of audio!**
