

# AOA Annual Statistics

The American Osteopathic Association constantly strives to achieve its objectives of promoting public health, encouraging scientific research and continuing to advance the already high standards of education in the colleges of osteopathic medicine.

The AOA's fiscal year runs June 1 – May 31 annually. Each year, we see continued success in the advancement of healthcare issues—one example being the passing of the historic Medicare modernization law during our 2003-2004 fiscal year following five years of advocacy efforts by the AOA and its members.

For more information on the more than 56,000 osteopathic physicians, medical students and training programs, please see our current [AOA Statistical Fact Sheet](#).
