

# LogDoor Users' Guide

Welcome to LogDoor. The LogDoor(TM) Multi-domain Web Site Monitor, from [Open Door Networks Inc.](#) provides a real-time display of accesses to your Macintosh Web server on a domain-by-domain or site-by-site basis. LogDoor also produces real-time individual log files and Web-accessible summaries for each site on your server. With LogDoor, both you and your site owners will have a much better insight into how your Web pages are actually being accessed.

---

## Table of Contents

- [LogDoor Basics](#)
- [LogDoor Files](#)
- [Scheduling](#)
- [LogDoor Windows](#)
