# competition

Feeling lucky? Then we could really make your day with a first-prize double helping of Hewlett-Packard: a Vectra 522 Pentium PC and a Deskjet 850C inkjet printer. Two runners-up will each receive a year's free subscription to the Internet courtesy of WorldScope, along with a MultiTech modem

ittle luck on the lottery? Drawn a blank on the scratch cards? Why not try your hand at the trusty monthly *What PC?* competition? What's more, we're having a bit of a rollover month, with the June jackpot consisting of a PC *and* a printer all rolled into one first-prize package: namely, the Vectra 522 PC and the Deskjet 850C, both from hardware professionals Hewlett-Packard. Also, for two runners-up, we're offering WorldScope Connect Internet Starter Packs with MultiTech modems, which will let you set up on the Internet and surf for a whole year, free from subscription fees.

First prize

Better known for their printers, Hewlett-Packard can be just as impressive on the computer front, and the Vectra 522 Pentium PC embodies the style and quality which are characteristically HP.

Powered by a P5/75 Pentium processor, the Vectra 522 combines 8Mb of Ram with a 540Mb hard disk. Flexibility for expansion is provided by plenty of spare Simm sockets.

Situated at the right-hand side of the compact desktop case is space for disk drives; the floppy and quad-speed CD-Rom drive occupy two drive bays at the front, with room for another 3.5in drive below.

When we reviewed the Vectra in January we gave it an impressive four out of five for both features and performance, and an excellent five out of five for build quality.

The Vectra 522 comes complete with stereo speakers to provide output from the Creative Labs Soundblaster sound card, 1Mb of video-Ram, microphone, high-quality keyboard, mouse, and a 15in monitor.

A bundled selection of software includes the essential Windows 95, ClarisWorks and Lotus Organizer.

To provide the perfect complement to the Vectra 522, we're adding a Hewlett-Packard Deskjet 850C inkjet printer to the first prize.

A winner in last summer's *What PC?* Peripherals Awards in the Office

Inkjet category, the Deskjet 850C is targeted at people requiring the quality and speed of a laser, but who also want the optimum colour performance available from an inkjet. No mean feat – but the Deskjet 850C achieves its brief in dazzling style.

Using a new printhead design, the print resolution is a 'true' 600 dots per inch when printing in black. Also, HP ColorSmart technology, along with new pigment-based inks, produces finer gradients and more vivid, accurately-rendered colours.

Output is a speedy six pages per minute in mono and up to two pages per minute in colour.

Add to all this HP's Resolution Enhancement technology to ensure smooth, sharp edges, and you have quick, professional-quality colour printing on plain paper.

Runners-up

Now is most definitely the time to get on line, and with the WorldScope Connect Internet Starter Pack you could soon be in Surf City.

We are offering two WorldScope Connect Standard Dial-up accounts, which will enable you to connect to the Internet free from monthly subscription fees for a whole year. And, with each Starter Pack, we'll provide a 28.8kbps MultiTech modem.

Just imagine, you'll be able to send and receive e-mail, drop in on countless discussion groups and wander every which way you want across the World Wide Web – all at the same rate as a local call.
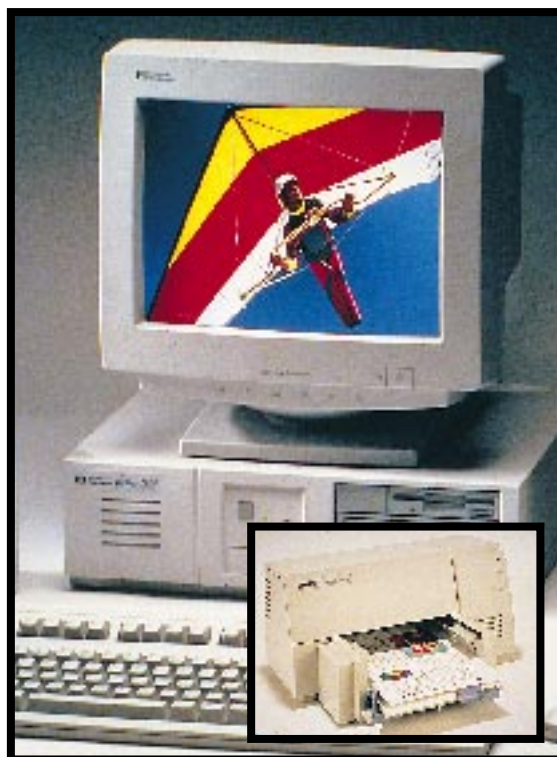

How to win

Simply answer these questions, and complete the tie-breaker below:
1 How big is the Hewlett-Packard Vectra 522's hard disk?
2 At what speed does the Hewlett-Packard Deskjet 850C print in mono?
3 What type of WorldScope Connect account is part of our prize?

Tie-breaker...

Hewlett-Packard's Deskjet and Vectra go together like…
