BeeLine is an extremely simple to use tool for finding information on the world wide web. By entering plain text describing what you are looking for BeeLine queries all the major on-line search engines simultaneously and displays the summary of the search on a single web page.

Here what other BeeLine users are saying :-

"I finished using Bee Line just this minute and I found it very good. There was some information I have been trying to get for some time and I got a handful from your Search efforts. I like it and will use it often."

"Beeline is a cool program!! I wish I thought of it myself!!"

"A great tool!!!"

BeeLine is freeware, and operates with Netscape Navigator 3.X, Microsoft Internet Explorer 3.X on Windows 95 / NT.
