

Parker Lyons

Hello, my name is Parker Lyons. I go to the Montessori School For Shreveport, and I am doing an internship at Softdisk as a community service project. I like computers a lot, and that's why I chose to work for Softdisk for a week. While I have been here I have met lots of really nice people and have done some real neat things. I have enjoyed being at Softdisk a lot. Some of the other things I like to do include soccer, playing piano and the outdoors.

Parker interned with us at the time this issue was made. Softdisk likes to hire talented people from within our home community of Shreveport, LA. As a result, we often take on summer interns from local colleges and schools. He was here for a short time during a break from his studies and helped us out in our Quality Assurance department. Let's hear it for Parker!
