

**by Gamos**

The Russians are coming! The Russians are coming! And this time they're bringing quality games. Long time subscribers may remember our Russian Corner from several years ago on our DOS product. Now the folks at Gamos have provided great games for the Windows platform that feature cunning play, entertaining music and amusing animation.

Corners is a variant of the ever-popular Chinese checkers. Up to four players can play. Don't have three friends handy? Not a problem! Each player can be played by the computer also. There are even funny animations to keep you amused while you wait for your turn, but don't get too engrossed in their movements or you'll miss the computer's cunning strategy!
