

# Hands On Contents

■ *Hands On* is the place where readers can contribute to *PCW* and, as always, we'll pay for anything we use. Macros, sections of code, and hints and tips will be rewarded with a £20 book or record token (please say which you would prefer) and we will pay hard cash for longer, more involved pieces. Please include relevant screenshots in .GIF format. All submissions should be emailed to the author of the appropriate section or snailmailed to Hands On, Personal Computer World Editorial, VNU House, 32-34 Broadwick Street, London W1A 2HG. Questions and short hints and tips can be faxed on 0171 316 9313.

We are constantly working to improve the contents of Hands On. If you have any suggestions, send them to the Editor at the address above, or email them to [pcw@vnu.co.uk](mailto:pcw@vnu.co.uk).

## Workshop

### **Build your own PC 254**

Just how much power do you want in your home-brewed PC? Roger Gann talks about the spec and how to begin the construction.

## Operating Systems

### **Windows 95 257**

FAT is fine when you use it to regain disk space. Tim Nott introduces you to Crapola, too.

### **Windows 3.1 260**

True to type, Panicos Georgiades and Gabriel Jacobs show you how to sort your TrueType fonts for maximum efficiency.

### **Windows NT 263**

Have files, will travel. Dale Strickland-Clark goes a-roaming to show how accessible files can be.

### **Unix 267**

Chris Bidmead unlocks the secret of understanding the /etc directory, and says some things about SCO.

### **OS/2 272**

Terence Green hops on the InfoBus and gazes on a world without Windows. And, he sees some Clients.

### **Macintosh 305**

Howard Oakley plays it Rag Time and tells you what to do about a black monitor. And, there's a silver lining around the black cloud surrounding Mac OS.

## Applications

### **Word Processing 277**

Tim Nott resorts to a spot of character building with an accented character shareware utility.

### **Spreadsheets 280**

Tighten your woggles! Stephen Wells scouts out an unusual spreadsheet for route planning and hiking applications. There's a guide to helpful URLs, too.

### **Databases 283**

You get what you pay for. Mark Whitehorn tells you what to expect from classy client server hardware, and gives some tips on Access.

### **Graphics & DTP 288**

Gordon Laing says I Love You... Yes, it's tasteful typefaces — how to make sure your typography matches your message. Don't overdo it, though.

### **3D Graphics 290**

What's got metaballs? Extreme 3D 2.0. Benjamin Woolley rolls out his opinion of it. And, look before you leap at Intel's forthcoming AGP.

### **Sound 293**

Steven Helstrip and Rob Young harmonize this month to write about careful use of Quantizing, the Terratec EWS 64XL and the X-Files of House.

## Programming

### **Numbers Count 275**

Let's get mathematical: Mike Mudge's mixed bag features semi-colons and a change of number base. Close relations turn up again, too.

### **Visual Programming 296**

Look out! It's Outlook, a powerful Office 97 application. Tim Anderson tries it out and takes on rich text, Delphi and Excel problems, too.

## Miscellaneous

### **Hardware 286**

It's not as easy to upgrade your notebook as it is your desktop PC, but Roger Gann uses a bit of ingenuity, and PC Cards, to show you the way.

### **Networks 301**

Mark Baynes on the basics of networking PCs, with cabling, ethernet, 10Base2 and all that.
