## **Using Pressure Sensitive Tablets**

Support for pressure sensitive devices in CorelDRAW! 4.0 usually requires the installation of Pen Windows. Some tablet manufacturers supply drivers that include pressure sensitive support. In these cases, Pen Windows is not required. Wacom is one manufacturer who provides these drivers.

Pen Windows is a set of files that are installed over Windows 3.1 to give pen support to Windows applications. You must have Windows 3.1 installed and configured on your system before loading these files. Pen Windows is available as an OEM (Original Equipment Manufacturer) version only and should be included with your pen computer or tablet.

### **Limitations when using pressure sensitive devices:**

Pen for Windows currently supports only 640x480 VGA resolution

If using a pressure sensitive stylus there is no support for right mouse button options
