## **Monochrome Bitmaps Printing with Bounding Rectangles**

Monochrome bitmaps print with bounding rectangles to Postscript printers. This is a known problem and is currently being investigated. As an interim work around, we suggest exporting these monochrome bitmaps as 16 color greyscale images. Then import and print the greyscale version of these bitmaps instead. The problem occurs only with monochrome bitmaps.

### **Note:**

If you export a CorelDRAW! file, containing a bitmap, as an .EPS file, then check the option "Convert color bitmaps to greyscale" on the .EPS export screen.
