

MAKIN' WAVES

Version 1.2

By Geoff Faulkner

Registration:

This version of Makin' Waves is for evaluation purposes only. When you register your copy, I will send you a fully functional version (which also will support drag and drop playing from the file manager). To order, fill out the ORDERFRM.WRI form and mail it with a check or money order in the amount of \$10.00 (\$13.00 for orders outside the continental U.S.) to

**Geoff Faulkner
11664 Silvergate Drive
Dublin, CA 94568-2208**

Any questions and comments can either be directed at that address or E-Mail me on Compuserve ID #72270,706.

General:

Makin' Waves is a sound file converter / Wav file player. It uses the WAVEIT.EXE utility to do the ultimate format conversion (Which must be somewhere in your path).

Makin' Waves Features:

Double-click any .VOC, .SOU, .SND file for conversion to .WAV format.

Double-click any .WAV file to play the sound file.

A convenient Delete button.

Drag-and-drop playing and conversion from the file manager (Registered version only!)

Installation:

After expanding the programs, copy the **WAVEIT.EXE** file to a directory somewhere in your path. Then copy the **MAKEWAVE.EXE** to a directory of your choice. This program was written with Microsoft's Visual Basic and requires the **VBRUN100.DLL** file be located in your **WINDOWS** directory. If you don't have this file, you can download it from the **MSBASIC** forum on Compuserve or from one of the many fine Bulletin Board systems available.

Thank you for registering this software!
