

## Homeland Alpha Notes

The point of the alpha version is to get some feedback on the direction of the game, how well the components are working, and to determine on whose systems there are major incompatibility problems. Please let me know if there are problems installing, where crashes occur, what you like and don't like about Homeland, or your favorite color.

If reporting problems, please include as much of the following information as you know:

- Processor (Pentium, P-Pro, etc.):
- Operating System (Win95 or NT):
- RAM:
- Graphics Accelerator:
- Video Memory:
- speed (MHz):
- Error description:
- Is the problem recurring?:

A web bug-report form can be found at the web site list below for DragonLore.

Thanks!
