#### AppleGuide Author

v1.0.5

†Here is a hint how to register the app so you can use all its features:

1. launch one of the apps in the package (68K or PPC version)
  2. when the splash screen appears write down the ser.#
  3. quit the app and open it with Norton Disk Editor or some other tool to search/manipulate the datafork (eg. Resourcerer)
  4. Search the datafork of the app for the ser.#
  5. when you found it you can see/read the corresponding reg.# about 40 bytes before the ser.#
- sorry that I can't help with more info, but this app is written in Supercard which is VERY difficult to patch/trace or whatever.

However, this method works :-)

-
