Realmz  
v5.1

To register the main program, and consequently the first scenario, take your serial # and divide it by 24. Drop everything after the decimal point. Add 24 to this. Now multiply that by 15 and subtract 156. This is your registration #. To register the next three scenarios, use the following:

Prelude to Pestilence: Name: MoonDark Number: 175973540

Assault on Giant Mountain: Name: MoonDark Number: 403273572  
Castle in the Clouds: Name: MoonDark Number: 181560444

You will notice that these numbers are 100 added to the registration codes for version 4.4.4 as in C&N. However, the numbers in C&N for Destroy the Necronomicon is NOT good, and I tend to doubt the other numbers for Griloch's Revenge and White Dragon will work either, as they are only 8 digits

v5.x

Enter 617 instead of 911 to be able to enter the serial number and to your REGISTRATION number you must add 100 to it to make it valid. If it was 9678654 now it's 9678754.

v4.6.3

SN: 12345678

Code: 7716149

v4.2.2

Enter 911 as registration code to change your SN, then use

Serial Number: 999999999

Registration Code: 625000094

v4.1.1

To register Realmz enter 911 as Registration Code in the About Box and click on Register. Then you will be asked for a Serial Number, which is 1794683670. After this enter 1121677394 as Registration Code, click on Register, type in a name of your choice and you are done.

v3.1

To register Realmz enter 911 as Registration Code in the About Box and click on Register. Then you will be asked for a Serial Number, which is 13579246. After this enter 8487119 as Registration Code, click on Register, type in a name of your choice and you are done.
