HDR 3.2.7 Demo Crack

On the demo copy there is always a "Silverfast" or "Lasersoft" print in the final scan.  
Here is the crack how to get rid of it:  
Open the DF (DataFork) of the plug-in with Resourcerer or any text editor like BBedit and simply replace the two words "Silverfast" and "Lasersoft.test" with spaces, thats all! No more demo letterings appear. Here is what you can try to patch SilverFast-Demos for other Scanners:

Look for these Bytes in the Data-Fork:

79 75 56 2d 3b 31 24 3d 6a 65 7b 40 2a 6c 58 65 78 2e 69 58 23 7e 54 73 bc 5f 5f 69 79 76

and change to:

79 75 2a 2d 3b 31 24 3d 29 65 28 40 2a 27 58 65 26 2e 69 25 23 7e 54 24 bc 5f 5f 23 79 22

Snitch  
v2.5  
Name: FC  
Company: 0023

To personalize Snitch 2.5.1 do this:

1. Open the Snitch 2.5.1 CDEV
2. Hold down the Control and Option keys and click the "Register" button. At this point you will be presented with a "Personalize" Dialog Box.
3. In this "personalize" screen type "FC" in the Name field, and "0023" in the Company field, then click the "OK" button. You are now a registered user.

older versions:

Snitch can be registered by shift-option-clicking the "Register" button within the •Control Panel• (\*\*not\*\* on the "About..." window). This "Shift-Option" click trick seems to work for all versions of Snitch 2.5b (b8, b9, b10, b11). Might even work on the 2.5 release when it is available (?) You can also enter any name and company in the registration dialog box after using this "Shift-Option-click" technique.

or

Hold down Command, Option and Shift together while clicking on the register button, and then enter name and company at the next dialog box.
