vBeta  
ADHESIVE

To take off the time limit of the demo, Just make the following patches to the copy of 1.0b6 that you have. It's PowerPC native, so all the code is in the data fork. You'll need to have the Forker extension installed if you want to edit it using ResEdit, or use some other utility that can edit data forks of files.

Open the data fork of your copy of MacAmp 1.0b6, and search for the following bytes:  
41810010 880E0025 28000006 40820094

Actually I searched for just the first half (eight bytes) and only found one occurrence at offset +02FF48 from the beginning of the data fork.

Now change the bytes so they match this:  
60000000 880E0025 28000006 41820094

Note that the middle eight bytes haven't been changed, just the first four and the last four are different. Now save the changes, quit, and life is good...

Enjoy!

v1.0

DWM100-08486-83545-55079 (Good for 30 days)

DWM100-08082-87025-21455

DWM100-08486-83545-55079

DWM100-01589-50725-96488

DWW100-01183-77026-89349

Dreamweaver 2 sn: DWM200-00082-88223-58587 Install and then remove the preferences before applying the crack.

For the demo version 1.2 to run for 3 years look in the Preferences folder find: D Cache Preferences

Inside, you will find the time tracking:

[DISK CACHE]  
size=887141485  
extent=884549485

$887141485 - 884549485 = 2592000$  (30 days worth of seconds)

When I was using this version, I changed "size" to : size=999999999

This gives you 3.6 years. Or, if you delete it, it will get re-generated based on the first time you re-run the program.

Meeting Maker

v1.0

MV 000563  
Administration Pwrd: admin  
PF6C-B724A-6R6R2 50 User

•

Meeting Maker XP  
v3.1.1  
B8ST-EP315-WJ5C1  
ZGUT-EP315-VJ5C1 (10 user)  
VF6C-B724Q-7R6R2 (50 User)  
PF6C-B724A-6R6R2 (50 User)  
v1.3  
VA5C-B724Q-CA5R2TA5C-B724A-CA5R2

After you install the user serial number for 10 users and you make the printout to fax in order to get Meeting Maker to work for longer than 90 days (DON'T actually fax the thing in!!!), you will see a number at the bottom of the printout by the words "authorization code".

This letter sequence corresponds with another series of letters you have to enter to enable the entire package. Four of the possibles are:

For Authorization Code: GBZY, type in SRSL

For Authorization Code: SKHG, type in XYBB

For Authorization Code: MRGE, type in AHTR

For Authorization Code: MTXH, type in LYLT

Keep printing till you get one of these four and you got it. Better crack is wanted, of course!

MetaSynth  
v2.0  
137920

130129

Here's the Serial # for Metasynth: ---137920---

The Box # is :--H6-MS302080 if it asks for that, although it probably won't.

If you'd like to call tech support for anything, tell them the phone # it's registered under is (802) 442-5401, and it should be registered to Bennington College. U&I's tech number is (415) 922-5276.

This program can be a real RAM hog if you're using big samples, so it may not work on some machines.

What a candy store this program is! Drawable filters, granular synthesis, cross-convolution, phase vocoding, cheesy FM synthesis, and even simultaneous multi-sample processing.
