Cracks & Numbers 15 Feb 1999

Welcome to the February, 1999 issue of iceland Serials.

We hope you find this list helpful.

This list was started from the old C&N compendium. When it went out of public view last year, something of a void was left here in cyberspace. Many people have worked to fill this void, and our list is a compilation of as many small lists and individual posts as we can find. It simply represents our own efforts to provide a (hopefully) useful resource to our fellow pirates.

We wish to thank ALL who contributed to this list, from posters of individual s/n's (FAR too many to mention here) to the editors of some of the large compendia, including Surfers Serials and HackUser. Thank you one and all for making this list possible.

Next month should see a further improvement in this compendium, as we'll be joined then by the *firesite* folks ...welcome aboard!

Yours in piracy,

Remazol, et al.
