*₁₁ #₁₂ \$₁₃ K₁₄ +₁₅ **Controlling the volume**

The volume control button on the [control bar](#) tells you if the movie has sound. If the button is grayed, the movie has no sound. If the button is grayed with a bar through it, your computer is not capable of producing sound.

If you click the volume control button, you can adjust the volume using the [fader](#). You can also use the up and down arrow keys on the keyboard to adjust the volume. To increase the volume, press the up arrow key. To decrease the volume, press the down arrow key.

The volume control icon changes to show how loud you have set the movie sound.

69\$ Selecting part of a movie

70K Selecting part of a movie;

71+ MCENU:000095

*₇₂ #₇₃ \$₇₄ **Frame**

One still image in a movie. Movies containing motion video and animation are made up of a series of frames, played in succession. See also: Frame rate.

72* WINDOWS

73# IDH_Frame

74\$ Frame

*₇₅ #₇₆ \$₇₇ **Frame rate**

The number of frames per second at which a movie is played or recorded. Frame rate does not affect a movie's playing time.

For example, a QuickTime movie recorded at 30 frames per second might play back at 15 frames per second on a slower machine but the movie's total playing time would not change.

75* WINDOWS

76# IDH_Frame_rate

77\$ Frame rate

^{*78} ^{#79} ^{\$80} **Interesting Times**

There are four "interesting" times in a movie, the first frame, the last frame and (if there is a selection) the beginning of a selection and the end of a selection. Some keystrokes go to interesting times in the movie. See the help topic Using the keyboard for details.
