You can send request for other translators, bug reports and suggestions to:

e-Mail: markf@POST.QueensU.Ca AppleLink: markf@post.queensu.ca@internet#

This is a Shareware translator, if you copy and use this translator please send a cheque for \$10.00 (make cheques payable to: R. Mark Fleming) to the above address.

Place the “**TIFF (IBMpc to Mac)**” file into the same folder as Apple File Exchange application, the next time use start Apple File Exchange this translator will be available in the “Mac to Mac” menu or the MS-Dos to Mac” menu.

You can select the creator for the application that created it, so the file can be “Double Clicked” to start the application. TIFF is set as the file type. This translator check the start of the file to support AFE “Show only eligible files” option. Only files starting with ‘MM’ or ‘II’ which indicate a correct TIFF header will be listed as eligible files.

History...

V1.0.0 Created from EPSF translator.

Other translators that I have written (as of April 5th, 1993):

- EPSF (IBMpc to Macintosh) v1.02
- WordStar to RTF v1.02
- dBase II, III, & IV to CSV v1.0.4
- Windows (.BMP) to PICT2 V1.02
