

LATEST & GREATEST

3D Buttons v1.3

by Jim Stout

Give your dialog boxes a multi-dimensional look. This Control Panel turns your flat, black-and-white buttons into 3D gray scale. It also extrudes check boxes and radio buttons. Just drop it into your System folder. You'll never go back to flat buttons.

DiskTracker v1.0

by Mark N. Pirri

Keep track of the contents of your disks, hard drives, CDs and removable hard disks with this handy organizer. You can automatically catalog disks just by inserting them into your drive. Create catalogs that are easy to browse and search. Print floppy disk labels using a variety of templates — or create your own.

MacBaseball v1.1

by Roberto Bellizzi

Play ball! Keep track of baseball scores and statistics using this comprehensive program. Pick the teams from the team data screen and record the line-up. The data entry screen is arranged by inning and records information, including hits, errors and runs. Other features include complete batting statistics for each player and inning. Includes tutorial files to get you started.

WorldClock Lite v3.0.8

by Paul Software

This full-featured program combines elements of a map and clock. Find out what time it is anywhere in the world. Determine the time of sunset or sunrise for any day. It also tells you when the sun will reach its highest point in the sky. There is detailed information on the moon, including rise, set and phase.
