## Acoustics Glossary

by Iverson Software

Music to your ears! Review more than 200 acoustic and sound-related terms in this HyperCard stack. If it has anything to do with sound it's described here — everything from artificial reverberation to white noise. Just click on a term and its definition appears on the screen.

## Diet Master v1.0.1

by JP Software

Analyze your daily intake of fat, protein, carbohydrates and more. This program contains a database of more than 5,000 food items. Choose items from the food list that you eat and compute a daily report. Your total intake of many important nutrients is shown along with a pie chart. Use it to plan your diet or analyze foods you have already eaten.

## Extended Calculator II

by Niklas Frykholm

Figure a variety of functions with four different calculators. The Layman's Calculator is useful for regular arithmetic calculations. The Graphing Calculator graphs equations. The Scientific Calculator contains scientific constants and functions. Set the Programmable Calculator for advanced computations.

## Greatest Paper Airplanes v1.0

by KittyHawk Software Inc.

Fly high with this cool program. Learn the basic theory of flight and what is required to make original and high-performance paper airplanes. Includes tutorials for making five planes. The lessons are animated and you can print out airplane templates, complete with decorations.

## Hamlet

by Mark Zimmerman

"To be, or not to be?" Read the complete text to William Shakespeare's Hamlet. This HyperCard stack is arranged by scene to make it easy to read. Copy text directly from the stack and paste it into other documents. Search for any text, add bookmarks and take notes on any page.

## Miscellaneous Games

by Christiaan Freeling

This document contains the complete rules for seven challenging board games, including King's Colour, Breakthrough, Trackgammon and more. Complete with tips on strategy and tactics and full-color diagrams.

## Professor Duck's West Africa Quiz v2.2

by Eric Holsen

Travel the wilderness of West Africa. This program tests you on the names and capitals of West Africa countries. Review the correct answers while taking the test. Restart the test at any time. View or print test reports.

SchoolStat v2.0.8

by David Darby

Analyze and graph data with this statistical analysis program. Enter your data in a spreadsheet format and analyze it using many functions, including linear regression, confidence intervals and more. Plot data using a variety of graph formats, like pie charts, histograms and linear plots. Perfect for anyone studying statistics.

SpaceCamel

by Bolt

Combine strategy and luck to win this space-age adventure game. Reach your home base before the Cannibals catch you. Find fuel and oxygen, trade cargo and credits with friendly traders, and watch out for pirates.

SpinIt v1.0

by James Jennings

View and rotate four-dimensional objects with this intriguing program. Contains many example objects, including a hypercube, a Mobius strip and a Klein bottle. Objects can be rotated between the x, y, z and t planes. Save, print and copy any image.
