E-Mail fax v1.1.0
by Kishore Tipirneni
Prepare files for e-mail with this handy program. When you select this program under your Chooser, select E-Mail fax instead of a printer. When you print, it saves the file as an e-mail fax file. View files with the fax viewer or save them as self-reading files.

Engineering Assistant v1.5
by Green Mountain Software
An engineer's dream! Calculate hundreds of conversions, including acceleration, density, length and more. Choose from many constants, like pi, the speed of light   even the density of many solids, including brick, concrete and lead. Paste values directly into the Clipboard and paste them into your documents.

Extended Calculator II
by Niklas Frykholm
Figure a variety of functions with four different calculators. The Layman's Calculator is useful for regular arithmetic calculations. The Graphing Calculator graphs equations. The Scientific Calculator contains scientific constants and functions. Set the Programmable Calculator for advanced computations.

FindText v1.3.1
by Patrick Maes
You won't get lost with this nifty search program. Locate a string of text in any program anywhere on your hard drive — or in specified folders. Great for finding important information.

MacEnvelope Lite v1.0

by SYNEX
This envelope and label program is in the mail. Choose from seven kinds of envelopes and 25 labels. Store commonly-used addresses for easy recall. Postal bar codes and graphics can be added. This handy program is sure to get your stamp of approval.

MultiTimer v2.0.5
by Karl Bunker
Keep track of the time you spend on various projects and tasks. Create a module for each project and start the timer. A log file records important information, including start and end times, session totals and tallies for each day, week and month. You can even open a document or application whenever you start a particular module.

SignatureQuote v1.0
by Semicolon Software
Attach a signature or quote to e-mail messages and other documents with this utility. Store two different quotes the Clipboard, split paragraphs into lines of text separated by carriage returns and paste special characters to the beginning and end of lines. A great personal touch to any e-mail transmission.
