GENERAL INTEREST

Alias Assistant v2.0.7
by Flux Software
Work with aliases even easier than before. Keeps track of any aliases created. If you
delete the original item, the aliases are deleted as well. No more useless files laying
around on your desktop.

Biorhythms v5.1c
by Andrew Regan
Your mind, body and emotions are governed by three natural cycles, known as
biorhythms. This program allows you to check your biorhythms, chart them and even
print a record. Compare the biorhythms for two people to determine how compatible
they are. It also interprets your biorhythm for you, so you'll always know what to expect
for any given day.

Training on CD Sampler
by Quay2
These insightful and comprehensive t‡ represent a new way of improving your
computer skills and knowledge. This month's tutorial covers "Paragraph Formatting in
ClarisWorks," including justification, indents and leading.
NOTE: We've included "Peter's Player," a fast QuickTime movie player, so you can play
these movies even if you don't have Apple's Movie Player. (Apple's QuickTime
extension, however, is required.) Peter's Player is located in its own folder within the
tutorial folder.

Gauge Series of Tools
by Newer Technologies
These four programs are designedto give you important information about your
computer, including hardware configuration and performance.
Clockometer displays your processor and clock speed (in megahertz). Cache-22
displays whether or nor your computer has Level 2 Cache — and if so, how much. SCSI
Info scans your SCSI bus and displays all connected devices. Slot Info scans your
Macintosh computer's internal slots and displays information about any cards attached
to them.

Instant Init v1.0.2
by Wolf Tech
Reformat floppy disks in seconds. Just launch this program and stick a floppy disk in the
drive. It reformats the disk almost instantly. No need to wait for the Finder to format
disks. This program is fast!

ListFiles v2.5.1
by Alessandro Levi Montalcini

This great cataloging system keeps track of your hard drive and disks. When you select a drive or directory, it creates a text catalog of that directory and lists everything in it. You can include information like file size, creation date and more. You can have it list or exclude only certain types of files. It even catalogs disks as you insert them.

Mac Easter Eggs v1.2
Programmers put hidden features in Macintosh software known as "Easter Eggs." This stand-alone document lists Easter Eggs from System v6, System v7 and many Control Panels and Extensions. Some of them are fun, some of them are interesting and some of them are just plain weird. You're sure to get a kick out of them.
