

## Drill 4

- Open your simplete text document.

- It should look like this:

```
<HTML>
<HEAD>
<TITLE>
  George's Most Excellent Home Page
</TITLE>
</HEAD>
<BODY>
<H1>George's Most Excellent Home Page</H1>
<HR>
</BODY>
</HTML>
```

- Let's add **paragraph and line break tags** to some text we type after the horizontal rule. This is what I type:

```
<HTML>
<HEAD>
<TITLE>
  George's Most Excellent Home Page
</TITLE>
</HEAD>
<BODY>
<H1>George's Most Excellent Home Page</H1>
<HR>
<P> -----> paragraph tag
Welcome to my home page!<BR> ----->line break tag
It is still in the construction stages but if you bear with me it will someday look COOL!
<BR> -----> line break tag
Thanks for stopping by.<BR> -----> line break tag
<P> -----> paragraph tag
George
</BODY>
</HTML>
```

- Save the document and then open it with your browser. The text should be formatted so that it looks normal and does not run together.

Next, let's add bold and italic styles to your text.
