

## Drill 2

- Go to your simpletext document.
- It should look like this but with different titles in the header section and the body section :

```
<HTML>
<HEAD>
<TITLE>
  George's Most Excellent Home Page
</TITLE>
</HEAD>
<BODY>
  George's Most Excellent Home Page
</BODY>
</HTML>
```

- In the body section, **enclose** your title with a header in the 1 to 4 range. Your document should then look like this :

```
<HTML>
<HEAD>
<TITLE>
  George's Most Excellent Home Page
</TITLE>
</HEAD>
<BODY>
<H1>George's Most Excellent Home Page</H1> ----->This is where the
</BODY>
go.
</HTML>
```

headers

- Save** the document then **open** it with your browser. The text in the body of the document should be **larger** and **bolder**.
- Since the document has changed, you will need to reload the original. Use the RELOAD ORIGINAL button at the top of your browser. If the text does not appear larger or bolder then use the trouble shooting tips in [drill 1](#).
- Experiment** with the headers. See what the different sizes will do to your text in your document.

Next we will put in a horizontal rule.
