

Horizontal rule

A horizontal rule will put a **straight line** across your page. It can be used to denote different sections and makes the page look more asthetic.

The tag for a horizontal rule is :

`<HR>`

This is one instance in HTML that there is not a pair of tags.

Summary

- The `<HR>` tag will put a line across your page.
- The `<HR>` tag is not paired.

Let's go to drill 3 and put a horizontal rule in your page.
