Suggestions:

Please write a 1-10 number of relative importance to you (10 means extremely important) and/or jot a few notes on the following:

1. Speed it up! Make the program snappier!
2. I don't like playing with resources. Write a utility to help me create and save my own custom palettes with custom colors.
3. I want more control over my Printouts! Let me create reports that I can edit more freely.
4. Interface improvements. Make your suggestions:
5. Gaming additions (i.e. built in Inventory trackers, character logs, etc.).
6. Allow "Links" between different cells and levels (e.g. option-click on one cell selects it's linked cell).
