

## Bold and Italic styles

These two tags appear in pairs. The text that you want the style changed is placed between the pair of tags.

Most browsers do not support using both bold and italic tags on the same piece of text .

The **bold** tags are :

`<B> </B>`

The *italic* tags are :

`<I> </I>`

## Summary

- Bold and italic tags come in pairs and will modify the style of text that is placed between them.

Let's change the style of the text in your page.
