

Sample Experiment			
Rate of Temperature Increase for 100ml of water over Bunsen Burner			
	Time(S)	Temperature (C)	Change in Temp (C)
	0	12	0
	10	18	6
	20	31	13
	30	51	20
	40	76	25
	50	98	22
If a column has a text heading, it will be a data column in any bar graph			
but if the one on the far left doesn't, it will be used for row labels.			
Try this - Select all from the Time(s) label down and across to the bottom			
	of the Change in Temp (C) column - then select a graph type via the		
	Graph Menu button in the spreadsheet toolbar (F6 if not visible)		
Compare it with this - repeat the above but first delete the column label Time (s) -			
	- a bar graph shows the difference well.
