

<b>Select the 3x3 matrix below and click the Matrix Button to</b>						
<b>turn it into a matrix window</b>						
					<b>If you can't see the matrix button,</b>	
					<b>click the label ----&gt;</b>	
		1	1	1		
		-7	13	3		
		-4	3	3		
<b>You can make your own matrices in this way and do special</b>						
<b>calculations with them</b>						
Once you have made a Matrix Window from the spreadsheet						
use its left-top icon to get the menu of Matrix Functions						
You can't type numbers into the Matrix Window once it is made, but you can copy and paste it						
back into the spreadsheet to do further work on - see inverse matrix spreadsheet example
