

EDUCATION

Alaska HyperTextBook

State reference

This is an excellent guide to the largest U.S. state, Alaska. Topics include geography, people and more.

- Search tool
 - easy access tool bar
 - Handy printing features
- (HyperCard Stack by Iverson Software Co.)

Anthropology HyperTextBook

Historical exploration

Explore many important civilizations, like Bantu, Aztec and Saracen . You'll also learn about leading anthropologists.

- references to common artifacts associated with different cultures
 - track links to particular topics
- (HyperCard Stack by Iverson Software Co.)

ChordBook 1.5

Music to your ears

Learn to recognize and play chords with this handy guitar reference. Look up chords for standard guitar tuning and for 39 non-standard tunings. The library supports more than 20 chord types with up to four different fingerings each.

- access all QuickTime musical instruments
- chord diagrams
- choose your root chords
- repeat sound effects

(Application by DRS Digital Image and Sound, Inc.; Requires QuickTime musical instruments to hear sounds)

HomeSchool Planner 2.0

Class organizer

Use this program to coordinate lessons for in-home schooling. It includes utilities to manage student information.

- track unlimited number of students
- organize an unlimited number of subjects
- create your own activities
- print out plans
- Automatically calculate cumulative grades

(Application by France and Associates)

Parallel Circuit Tutorial

Shocking

The first of two basic electronic documents included on this Volume. This installment is an introduction to parallel circuits. Integrates well with the Series-Parallel Tutorial.

- Index topic list
- Problem sets with answers
- Parallel Circuit Lab included

(Document by Lemuel N. Jordan)

Professor Duck's Canada Quiz 2.2

Yukon adventure

Learn about Canada with this fun and fascinating HyperCard Stack. It introduces you to Canadian provinces and their capitals.

- Test yourself
- Check your answers at any time
- Print your test results

(HyperCard Stack by Eric M. Holsen)

Report Card 2.0

Making the grade

Teachers will love this handy program. Keep track of your students' assignments with this report card system.

- Store up to 22 student records in one stack
- Track names, grades and grade levels
- Track classes and teachers

(HyperCard Stack by Eric Granata)

Series-Parallel Tutorial

More shocking

This is a great introduction to series-parallel circuits, including theory and application. This is part of a basic electronics series — Parallel Circuit Tutorial is also included on this Volume.

- Extensive examples
- Index topic list
- Problem sets with answers
- Real World Lab included

(Document by Lemuel N. Jordan)

SuperGraph 1.51

Charting system

Graph mathematical functions that cannot be easily solved for X or Y. Choose your graphing method, including implicit curves, contour mapping and simple functions.

- Advanced mathematics
- Supports balloon help
- Zoom in and out

(Application by Mike Epstein)

Surge 1.1.2

Stormy weather

Track different storm types with this meteorology program. See how weather systems progress from tropical storms to hurricanes.

- Enter new storm data
- Simulate storm tracking
- Maps include Atlantic, Caribbean and Gulf of Mexico
- Zoom in and out

(Application by Justin Cooke)

Verbs and Nouns 1.1

Language database

Practice verbs and nouns with this excellent database. This program works with many languages. Enter your own word list with tense and meaning. It uses this information for several testing features.

- Create multiple databases
- Group words into sets
- Customize the word display
- Password protection
- Includes built-in testing feature

(Application by Jacek Iwanski)

xFunctions 2.3

Math tutorial

Learn mathematical functions with this fun game. Work with formulas, split functions, graphs and tables. Choose from seven utility operations, including graphing on the same axes, animation and more.

- Save files with utility examples
- Sample files included
- Zoom feature

(Application by David Eck)
