

CHILDREN'S SRI

Animal Babies v1.0

by Brandy Rodgers

What kind of animal has a baby called a Joey? If you answered kangaroo, you're right. This fun program teaches all about animals and their babies. It has three different areas of play: Matching baby animals to their mothers, matching baby animals to their names and an area where more information is given about each animal. This program comes complete with speech and original music.

Math Message v1.0

by Oscar Gerardo

This program creates math worksheets with a fun twist. The answer to each addition or subtraction problem corresponds to a letter in the key at the top of the page. Solve all the problems and figure out the corresponding letters and you find out what the secret message is. You can pick upper and lower values for the possible answers, and type in any message you want.

The Middle East v1.15

by Don Lancaster

Travel to the Middle East and quiz yourself on what you learn. Click on any country and its name and capital appears. Additional information like population, area, currency and primary export is included.

Time Instructor v1.0

What time is it? Learn to tell time on an analog clock. If you choose the correct time, the program announces the time — in English or Spanish. If you're wrong, you get to try again. Change the level of difficulty.

WordFind v1.4.1

by Brett Helbig

Word Find is a word-search creation program that gives you a variety of options. First enter all the words you want hidden, or paste them in from any document. You can choose the size of the puzzle, the fonts for the puzzle and word list and more. You can even choose which directions the words can be hidden in. You can print the puzzles with or without the answers circled.
