Consult! v3.0
by Guru Software
With 15 full-featured modules, this comprehensive program is great for consultants! Features include project tracking, check writing, billing, accounts receivable, invoicing, a calendar and to-do list. A daily reminder screen shows you information, including how many things you have to do today and what bills are due.

Financial Portfolio v4.1
by Michael Foreman
Track your accounts and investments with this financial program. Calculate your net worth, graph stock performance, chart assets and liabilities, view stock portfolio information, and review capital gains summaries. Record bank accounts, mutual funds, stocks and more. Includes complete online help.

Home Inventory
by Lynne Malchiodi
Don't wait until it's too late! Perfect for the home or home office, this FileMaker template simplifies cataloging your belongings for insurance purposes. Inventory your possessions, including credit cards and insurance policy numbers. It's easy to print out a report. Be sure to store it someplace safe -- just in case the unthinkable happens.
FileMaker Template

My Schedule's Keeper v1.0.1
by Danny Stoll
Track daily events, notes and things to do with this personal planner. View one day, several days or an entire month. Assign daily events or create to-do lists for events that aren't assigned to any specific days. Set alarms to remind you of important events or projects. Complete with print and search features.

RefinancePro v1.0.0
by Real Mac Solutions
If you are planning on refinancing a loan, you need this program. Enter all pertinent information, such as the original loan amount, the original interest rate, the new interest rate and the length of the loan and press the "calculate" button. RefinancePro will determine the interest paid over the life of the loan, the number of months it will take to recoup, and more. This program is a must.

Style v1.3.2
by Marco Piovanelli
Use this text editor to create dazzling documents. Use different fonts and even import art work.

Read and write documents in MacWrite v5.0, MacWrite II and SimpleText formats. Save your documents as standard files or as AutoViewer applications (stand-alone documents that don't require another application to view them).
