

# The Words - ReadMe

Read this before installing the program.

## What is The Words?

The Words is an easy to use vocabulary learning program which you can use when you learn a foreign language.

You write your own words with the program, save them as wordlists and then you learn them. The Words is a freeware program.

## Required files

Before you install this program, you must have the file **VBRUN300.DLL** installed in Windows system directory.

You can download VBRUN300.DLL from:

**<ftp://ftp.simtel.net/pub/simtelnet/win3/dll/vbrun300.zip>**

or

**<ftp://ftp.sunet.se/pub/pc/mirror/simtelnet/win3/dll/vbrun300.zip>**

Extract the file and place VBRUN300.DLL in your Windows system directory.

## Installation

Run the Setup program and it will install The Words to a directory which you choose.

## Other notes

This is a 16-bit version and it works with Windows 3.1 and better. There is also a 32-bit version of The Words. You can download both versions from The Words Homepage.

Before you go to The Words Homepage from the program, make sure that your web-browser is not running! Otherwise the function will not work.
