ACTION ENGLISH (c) and SPELLING FRENZY (c) CLOTHES CLOSET(c)
1996 David W. King All Rights Reserved

If you keep this program longer that 60 days on your hard drive, you are obligated to send payment of $20.00 U.S. currency (check or money order) to

David King
4016 Oak Moss Ct.
Chesapeake, VA 23321

You may use the file REG.WRI to send in the registration fee.

The install program should give you enough information as you run it to let you know what is going on. The default directory in which Spelling Frenzy will be installed is c:\action.

The program should be self explanatory; just run install.exe and let the program install itself. In this version, because it will fit uncompressed on one 1.4K floppy, the files are uncompressed.

You can use install.exe to install the program from drive C: if there is a problem with missing files or the like. You will be cued for files that exist on the hard drive already.

If you are installing the program for a second time, make sure that you do not have the install program make new entries in the program manager group by deactivating the check box in the install program.

If you have any problems, let me know at DKing999@aol.com, and I will E-Mail you a message as soon as possible.

ACT.EXE will not run without Microsoft Windows.

Read chklst.ms to trouble shoot if any files are missing from the program.

I like e-mail notes on how you feel about my program (positive or negative). Please let me know if you find the program useful or if you feel additions or revisions are needed. I have a specific tutorial and help files in development as a result of your feedback.

If you want to install manually, you can just copy the files to any directroy you create because the files
in this version are uncompressed.

D King 12.08.96.
