

Control Panel Definitions

Note: This category lists any files located in the Control Panels folder or the Control Panels (Disabled) folder. If it is in the Control Panels folder, then the “Active” field is true. The “INITs” report, on the other hand, attempts to distinguish those files which actually add functionality to the Mac operating system.

[Text] = Field only exists under given circumstance

- Control Panel = Control Panel name
 - ◊ Version = Version
 - ◊ File Integrity = If Checking is on in TattleTech menu, is file damaged
 - ◊ Type = Finder Creator
 - ◊ Creator = Finder Type
 - ◊ Active = Is file located in the Control Panels folder
 - ◊ Modified = Last modification date
 - ◊ Path Name = Location of file. Since the location is obvious, this field is not normally displayed to conserve list space. [Configured]
