

## TechWar™ v1.0 Storyline

Kane has made a decision he wants to build a better arsenal. He wants to develop bio weapons to be given to troops and vehicles. With these bio weapons he could wipe out armies much more simply. He also plans to guard these Tech Centers and Labs, we must get to these labs to stop NOD from getting enough weaponry to take over Earth! To win just destroy the Tech Centers and Bio Labs to stop them from getting near as powerful as we are. Use anything to win that is imperative losing is not an option! If NOD doesn't finish developing what they call Chemical Warriors and Visceroids then we will stand a chance. If they do succeed then it is hopeless for us!
