Icon Viewer will allow you to view over 10,000 icons all arranged into   over 50 different categories for easy access. If you would like to copy the icon simply click on it and enter the directory where you want to copy it.

Icon Editors contains over 7 different editor's to create and edit icon's and cursor's. You can create .BMP files into .ico or vice versa. You can draw your own icon's from scratch and save them. All the editors you need are located here. Plus an Icon Color Editor to change all the icons on your desktop to 256K which will allow you to have high quality icons on your desktop. Click on help on the editor page to get a description of what each editor does.

How To Install
Icons: How To change the icons on your desktop simply right click on the icon you would like to change. Next select properties then select shortcut and then select change icon. Now select browse and change the look into the directory of your cd-rom drive. Choose the folder that says icons and change file type from icon files to all files. Simply click on one the categories and it will list the icons. Choose an icon that you like and select apply and then ok.

Cursors: First should view them from the cursor editor. Select the File and then select open and change the directory cursors located on the CD-Rom example D:\cursors. Then select the cursor you would like to see. The editor will allow you to play the animation so you know what it looks like. If you like it save it to your \cursor directory which is located in your windows directory. example copy cursors to C:\WINDOWS\CURSORS. After you copied them to that directory click on Start and then click Settings and then click Control Panel and then click on Mouse then click Pointers and then click Browse and select from the cursors you copied and click Apply if you would like to use it.
