

FastTrack Schedule 5.02 - ReadMe
AEC Software, Inc.
January 1998

*** NOTE ***

Turn off automatic virus checking and quit other applications before installing.

CONTENTS

This document contains information on installing FastTrack Schedule:

- System Requirements
- Updating Previous Versions
- Installing Version 5.0
- Installing on a Network
- Demo & Full Application
- New Features, Bug Fixes, and Changes in Version 5.02
- Contacting AEC Software, Inc.

System Requirements

To run FastTrack Schedule on a Macintosh or Power Macintosh, you need the following:

- a Macintosh Plus (or more recent)
- 4MB or more of free Random Access Memory (RAM)
- 10MB or more of hard disk space
- Macintosh System 7.0 (or higher)
- a monitor supported by your operating system
- a mouse supported by your operating system
- any printer with a Chooser level driver

Installing Version 5.0

To install FastTrack Schedule from CD-ROM:

1. Insert the CD into the CD-ROM drive.
2. Double-click the "FastTrack Schedule 5.0 Install" folder to open it.
3. Double-click the "Disk 1" folder to open it.
4. Double-click the "FastTrack Schedule 5.0 Install" icon to run the installer.
5. Follow the instructions on screen to install FastTrack Schedule 5.0.

To install FastTrack Schedule from floppy disk:

1. Insert Disk 1 into the floppy drive.
2. Double-click the "FastTrack Schedule 5.0 Install" icon to run the installer.
3. Follow the instructions on screen to install FastTrack Schedule 5.0.

Installing on a Network

To install FastTrack Schedule on a network:

1. Log in as the System Administrator (or its equivalent) for your network.
2. Connect to the destination server or Shared Directory/Folder where you wish FastTrack Schedule to be installed.
3. Follow the directions provided above to run the installer.
4. Follow the instructions on screen to navigate to the desired directory and install FastTrack Schedule 5.0.

Once installation is complete, the network administrator needs to:

1. -Set the FastTrack Schedule™ 5.0 and the QuickHelp™ 4.3.5 applications to sharable.

Consult your network operating system documentation for the specifics of this procedure, as it varies from network to network.

2. Confirm that the FastTrack Schedule 5.0 directory (default named FastTrack Schedule 5.0 by the installer) has Read-Write privileges. Consult your network operating system documentation for the specifics of this procedure, as it varies from network to network.

NOTE: There are known incompatibilities with KeyConfigure, a component of KeyServer. The makers of KeyServer, Sassafras Software, have made available a new version of KeyConfigure, Version 4.2.0.5, which addresses these incompatibilities. Users of KeyConfigure version 4.2.X.X can download this version from "<ftp://ftp.sassafras.com/ftp/pub/software>" or contact Sassafras Software at (603) 643-3351.

Demo & Full Application

When you install FastTrack Schedule 5.0, you are installing both the fully enabled application and the Demo version. The demonstration version is a two (2) user network version which only limitation is not being able to save. You can install it to your computer or to a server or shared directory/folder.

- If you have received the program as a demonstration version, no Serial # will be provided and you should instead type "Demo" when asked to enter the Serial #. This gives you all the power and flexibility of the full FastTrack Schedule--the only thing you cannot do is save. If after evaluating the demo, you would like to purchase the program, contact our Sales Department at (800) 346-9413 to receive a Serial #. To convert the Demo version into a fully enabled program, open the About FastTrack Schedule dialog and click the "Enable..." button. Enter your new Serial # when asked to do so, click OK, and you now have a fully enabled copy of FastTrack Schedule.
- If you have purchased the program, enter the Serial # found on the box, Disk 1, and manual when asked to do so. This will enable all features for FastTrack Schedule 5.0.

New Features, Bug Fixes, and Changes in Version 5.02

Version 5.0 of FastTrack Schedule added valuable features and made several changes

from previous versions. Version 5.02 is a minor revision which addresses known errors and unexpected behavior. For a listing of these features, fixes, and changes, see the Release Notes in the Help System.
