  Introduction          - What Allocator is and does.
  Instalation           - How to get going?
  System Requirements   - Waht You need to make Allocator work?
  Usage                 - How use Allocator?

  Author                - About author.
```

1.2   Allocator.guide/Introduction

```
                        ··· INTRODUCTION ···
```

     Sorry for my english! It's very poor, but I trying...

     Allocator is very easy i simply to use util to allocating and
deallocating any types of memory. I was created it for testing many
programs. Sometimes I must looking like work my program if memory is low
and very low!

     Allocator was written in AmigaE. AmigaE the best compiler for Amiga
systems utils.

     It's all! I think that small util will good work for your system and
help you in your memory problems!

1.3   Allocator.guide/Instalation

```
··· INSTALATION ···
```

Instalation Allocator is very easy. You must click on 'Instal' icon
only.   It'a all.   If you have installing Allocator without Installer you
must create direcotory and copy all files to this directory. So... it's
all.

For   polish users in directory 'Polish' is polish version of
Allocator. Sorry, only program. Docs in polish I will create in future.

1.4   Allocator.guide/Requirements

```
··· SYSTEM REQUIREMENTS ···
```

What you need to good and no problem work with Allocator? It's easy.
You must have:

· Amiga
· Kick 2.0+
· Many RAM to allocate
· reqtools.library /included/
· XenPL.font included/

1.5   Allocator.guide/Usage

```
··· USAGE ···
```

Using this small util is very easy. You may choose type memory.
After you enter memeory by allocate and press Enter! It's all. If you
want deallocate /:>/ used memory, you must click on 'Free' button and all!
It's very easy and full intuition! :>

Now ascii screen from Allocator:

```
._____.
| Free Chip: 1893784  Fast Free: 12451831 |
|          _____            _____    |
