1.2 introduction

```
Introduction:
```

```
Use ScreenToIFF to save an open screen as an IFF-ILBM picture.
```

1.3 system requirements

```
System requirements:
```

```
ScreenToIFF requires Kickstart 2.04+ and the following libraries in the LIBS:
directory:
```

```
- diskfont.library
- asl.library
```

1.4 installation

```
Installation:
```

```
Just drag the ScreenToIFF icon anywhere you want.
```

1.5 usage

```
Usage:
```

```
ScreenToIFF can be started from Workbench or a Shell window.
After you start the program, a list of open screens appears. Select one of
them and click on the Save button to save it. The main window disappears and a
file requester pops up. Then select a file to save as and click on the Ok
button. After the screen has been saved, the main window appears again.
Click on the Quit button to quit the program.
```

1.6 guarantee

```
Guarantee:
```

```
The program has been tested several times, but its reliability is not
guaranteed at 100%. I (the author) do not consider myself responsable
for loss or damage of data as consequence of the use of the program. Use
ScreenToIFF at your own risk.
```

1.7 copyright

```
Copyright:
```

```
The program is CARDWARE, therefore it is freely distributable on condition
that it is always accompanied by all the files in this archive. The whole
archive must not be modified in any way. If you think ScreenToIFF is useful,
let me know by sending me a postcard (preferred) or an E-mail
message.
```

me.

1.9 history

History:

1.0 - First release.

1.01 - ScreenToIFF quitted automatically after a screen was saved. Now
       not any more.
     - Screens with an odd width were not saved correctly.
     - Some other minor changes.
