Discovering Music™ provides a suite of entertaining, hands-on programs that let you explore, interact, learn and even create your own music! Making full use of your multimedia PC, Discovering Music is more than just a book transferred on to compact disc. It takes advantage of everything your multimedia PC can do — MIDI, digital audio, and CD technology — to offer a unique educational musical experience for anyone ages 10 and up.

Click on the titles to learn more about the five modules in Discovering Music:

- [Music Conservatory](#)™ — where 50 .AVI video clips and more than 60 high-quality symphonic recordings provide an exciting environment for exploring the history of music, music theory and music concepts.
- [Jammin' Keys](#)™ — where you can create MIDI music like a pro, regardless of your musical skill!
- [Recording Station](#)™ — turns your multimedia PC into a desktop recording studio.
- [Music Write](#)™ — lets you create and print sheet music with lyrics right from your printer.
- [SoundCheck](#)™ — a helpful, multimedia diagnostic utility.

Discovering Music is fun, easy to use, and requires no musical background. It's the perfect addition to any multimedia PC setup!

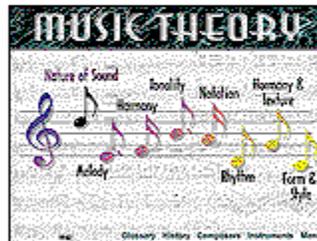

Jammin' Keys™

You choose a lead instrument from the 128 General MIDI instruments and Jammin' Keys™ five-part band accompanies your lead with exciting backups and riffs in styles such as Blues, Reggae, Country, Latin and Rock. Transpose your song to any key. Use the assignable drum pads to trigger .WAV sound effects and drums as you play. A built-in recorder lets you record and transfer your creation into [Recording Station](#) (also included in this package) for further editing.

Music Conservatory™

The Music Conservatory™ consists of five separate sections. Click on the titles to learn more:

Recording Station™

Recording Station™ has two digital audio tracks, 10 MIDI tracks and 128 General MIDI instruments which enable you to create musical arrangements with both MIDI and digital audio. Add, overdub, mix and modify MIDI tracks, change instruments and tempos, and use the digital audio tracks to add harmony vocals or acoustic instruments. More than 50 MIDI files are included to get you started.

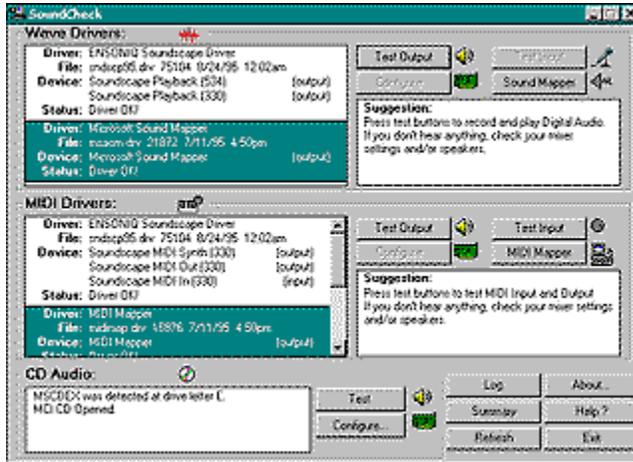

Music Write™

Use your mouse to place music notes and symbols on a staff, or record from any external MIDI-compatible keyboard. You can combine notes to create chords and even add lyrics. Effortlessly create sheet music and then print it on any Windows®-compatible printer.

SoundCheck™

Multimedia Diagnostic Utility

SoundCheck lets you examine the status of MIDI, .WAV and CD drivers, run informative tests and log the results for troubleshooting.

You'll appreciate the way it helps track down puzzling multimedia problems — on your own or with help from customer support technicians.

Multimedia Productivity Pack™

"Create dynamic multitrack MIDI music productions and print music scores."

Multimedia Productivity Pack™ is a set of more than a dozen well-integrated, user-friendly utilities and applications to help you maximize the creative potential of your multimedia PC. This feature-rich software suite lets you record, play and edit MIDI music and digital audio (.WAV) files, control system sound levels, view images and videos, explore the multimedia applications of business audio and entertainment, play audio CDs on your PC, and even troubleshoot your multimedia system! And because these applications were all designed to work the same way, you'll find them easy to learn and use.

With Multimedia Productivity Pack, you can record your voice, see it on your PC screen, enhance it with echo, or even play it backwards and rearrange words! Then simply drag an icon to drop the voice file into a document or spreadsheet! With a few clicks of the mouse, you can combine animation, graphics, digital audio, MIDI files, and CD audio tracks to create exciting multimedia presentations.

Click on the titles to learn more about the modules in the Multimedia Productivity Pack:

- [AudioStation](#)™ — Multimedia Audio Hardware Control Center
- [VideoStation](#)™ — Multimedia Video Hardware Control Center
- [ImageStation](#)™ — Multimedia Image Manager
- [Audio Calendar](#)™ — Audio Scheduler and Alarm
- [AudioView](#)™ — Digital Audio Editor
- [MIDI Orchestrator](#)™ — MIDI File Arranger
- [SoundCheck](#)™ — Multimedia Diagnostic Utility
- [SoundScript](#)™ — Multimedia Presentation Utility

- [Say It!](#)[™] — Voice Annotation Applet
- [Voice Net](#)[™] — Voice and Text Mail for Novell® Networks
- [Sound Events](#)[™] — Windows® Sound Enhancer
- [MIDI Screen Saver](#)[™] — MIDI Player for the Windows® Screen Saver
- [Level Controller](#)[™] — Multimedia System Volume Controller

To help you get started, the Multimedia Productivity Pack includes a library of MIDI, .WAV, image and video files. For additional .WAV and MIDI files, see Voyetra's [MIDI Music Gallery](#) and [Digital Sound Gallery](#).

At home or at work, Multimedia Productivity Pack offers the easiest and quickest way to experience all that multimedia has to offer!

AudioStation™

Multimedia Audio Hardware Control Center

By far the world's most popular multimedia audio hardware controller, AudioStation™ is an easy-to-use interface that lets you run your PC like a home stereo system.

- A Mixer Module provides controls for mixer levels, tone and signal routing.
- The CD Module controls CD-ROM audio functions.
- The Digital Audio Module records and plays .WAV files and launches [AudioView™](#) (also included in this package) for editing.
- The MIDI Module records and plays MIDI files, displays MIDI data density and launches [MIDI Orchestrator™](#) (also included in this package) for editing.
- Playlists for each module let you audition .WAV files, MIDI files and CD audio tracks and create custom playlists.
- A selection of MIDI and WAV files from Voyetra's Gallery series is included.

VideoStation™

Multimedia Video Hardware Control Center

VideoStation™ simulates the look and feel of a standard VCR tape deck:

- View Video for Windows® files in full screen or reduced modes.
- Shows total length of video clip and counts down to zero while the clip plays.
- Playlist window lets you assemble a list of video files for viewing in sequential, random or loop playback order.
- A starter collection of video (.AVI) files is included.

ImageStation™

Multimedia Image Manager

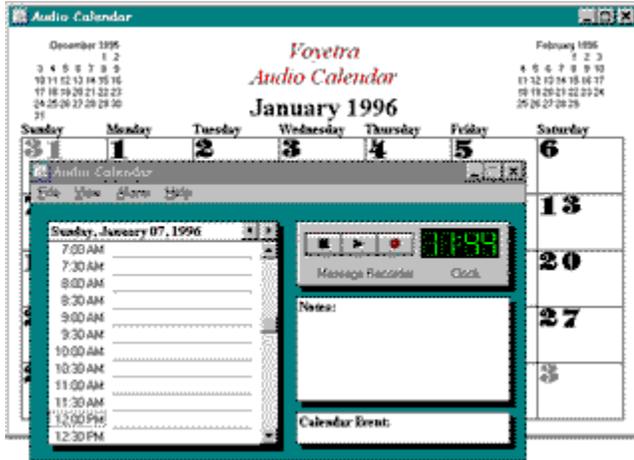

ImageStation™ makes it convenient and fun to manage and view a wide variety of image files and create your own audio/visual slide shows.

- Most major image format types are supported — including Kodak Photo CD, TIFF, PCX, BMP, GIF, EPS, JPEG and more.
- Playlist window lets you assemble and save a group of images in any order.
- You can add narration and MIDI music to create slideshow presentations.
- In addition to full screen mode, annotations and thumbnail versions of each image are provided to permit easy viewing, selection, and cataloging of images.

A starter collection of images in several formats is included.

Audio Calendar™

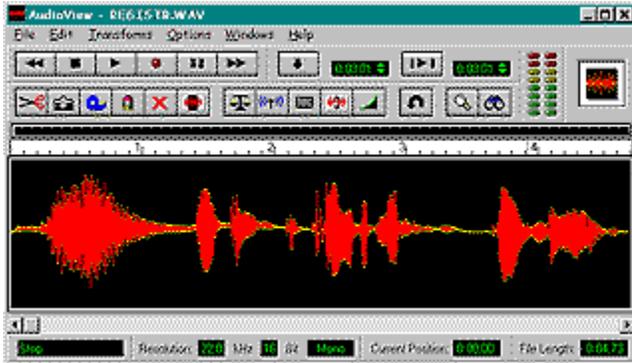

Audio Scheduler and Alarm

Having trouble keeping on schedule? This unique productivity tool uses an intuitive "desktop blotter calendar" to let you create daily appointments that include text messages, voice annotation and audio alarms. Plan a full month of appointments using Windows® wallpaper that positions itself behind other applications and looks just like a desktop blotter calendar. Audio Calendar™ also lets you insert a special event title for each day.

AudioView™

Digital Audio Editor

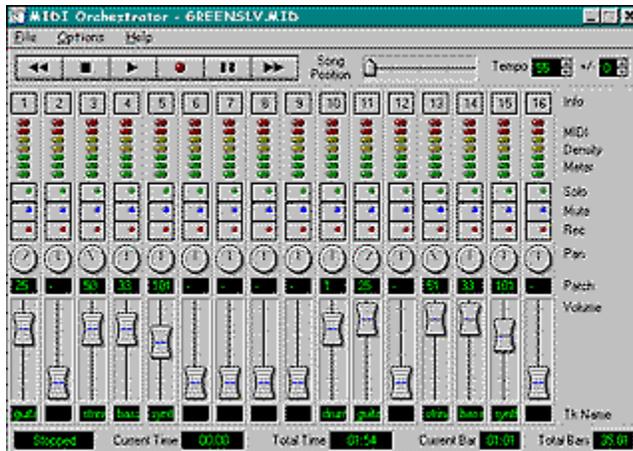

With AudioView,™ you can view and edit .WAV files using cut, paste, mix paste and more.

- Records directly to hard drive for managing files of unlimited length.
- Includes a full range of sound effects including echo, reverse, normalize, scale, fade, noise gate, invert, DC offset and crossfade.
- File conversion features include halve sample rate, stereo to mono and more.
- Range control lets you easily play and edit a specific portion of the WAV file.
- VU Meters show audio level as the file plays.
- Full-featured OLE provides drag-and-drop ease for embedding WAV files into OLE documents.
- Load .WAV files by dragging the file name to the AudioView window.
- Open multiple instances to edit between several different .WAV files.
- For a full selection of compatible MIDI files, see Voyetra's [Digital Sound Gallery](#).

MIDI Orchestrator™

MIDI File Arranger

With MIDI Orchestrator you can:

- Arrange and view MIDI files with this intuitive audio mixer style control panel that shows data in 16 MIDI channels.
- Change instrument volumes, assignments, names, key transposition, tempo and other song settings to re-orchestrate the music as you listen.
- Use Mute and Solo buttons to single out specific instruments while playing songs.
- Record MIDI songs or new instrument parts from any MIDI keyboard.
- For a full selection of compatible MIDI files, see Voyetra's [MIDI Music Gallery](#).

SoundScript™

Multimedia Presentation Utility

Cue	Graphic	Digital Audio	MIDI	CD Audio
1	SS1000.FLC Delay: 0:01.25 Loop: 1 Speed: default	SS1.VOY Delay: 0:02.45 Loop: 1	SS1.M.MID Delay: 0:00.00 Loop: 1	
2	SS100002.FLC Delay: 0:00.10 Loop: 1 Speed: default	SS2.VOY Delay: 0:00.00 Loop: 1		
3	SS100003.FLC Delay: 0:00.00 Loop: 1 Speed: default	SS3.VOY Delay: 0:00.50 Loop: 1		
4	Time 0:03.23			
5	<End>	<End>	<End>	<End>

Look at what you can do with SoundScript:

- Create simple presentations that combine MIDI, .WAV, CD audio with Autodesk Animator,™ 3-D Studio,™ Animator Pro,™ and BMP bit mapped graphics.
- Simultaneously show animations, play digital audio voice-overs and add MIDI or CD music.
- Presentations may be viewed in full screen mode and looped to play continuously for kiosks or continuous demos.

Say It!™

Voice Annotation Applet

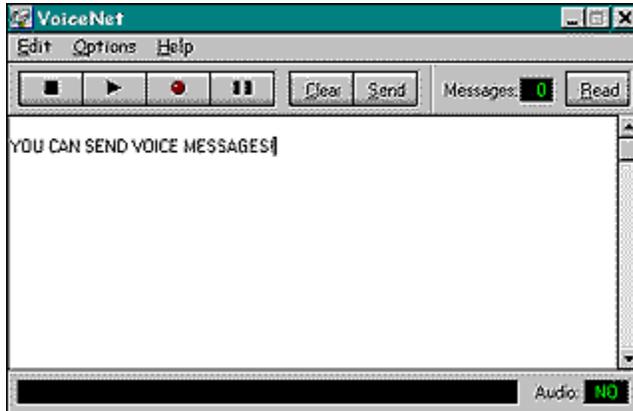

Say It! makes it easy to embed voice annotations into documents and spreadsheets simply by pressing a hot-key combination and speaking into the microphone.

Say It! can be installed into the Windows® Startup Group, so it starts minimized and is ready to run from any application.

Recorded messages may be edited with Voyetra's [AudioView](#) also included with Multimedia Productivity Pack.

Voice Net™

Voice and Text Mail for Novell® Networks

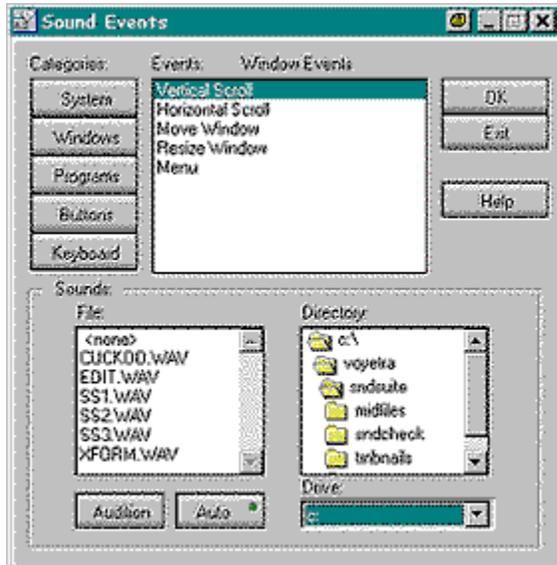

Voice Net is an easy-to-use voice mail system that sends text and voice messages to-and-from users on a Novell® Netware® Local Area Network.

- Compatible with Novell 2.x, 3.x and 4.x.
- Runs on workstations and stores messages that contain text and voice on server.

Sound Events™

Windows® Sound Enhancer

Sound Events brings your Windows desktop to life by adding sounds to system events such as moving a window, starting an application, typing on the PC keyboard, and more!

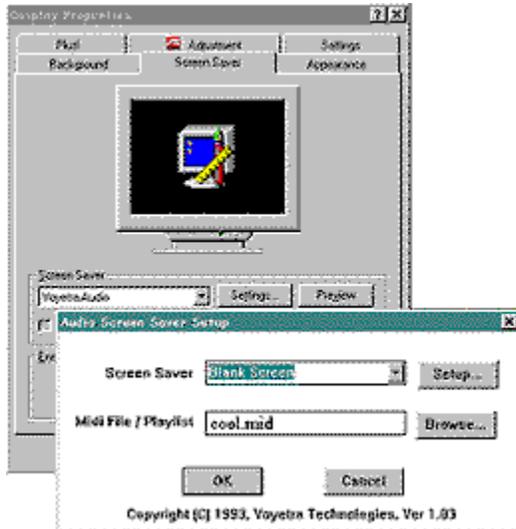

Windows event types include:

- System Events (Start Up and Shut Down)
- Window Events (Re-size Window, Move Window, Scroll Bar and others)
- Program Events (Startup and Close of each Windows application)
- Button Events (common buttons such as OK, Cancel, Browse, Help and others.)

For a full selection of compatible .WAV files, see Voyetra's [Digital Sound Gallery](#).

MIDI Screen Saver™

MIDI Player for the Windows® Screen Saver

MIDI Screen Saver adds the dimension of MIDI music to the Windows screen saver.

- Plays a single MIDI song file or an [AudioStation](#) MIDI file playlist as a background to the screen saver graphics.
- Compatible with standard Windows screen savers.
- For a full selection of compatible MIDI files, see Voyetra's [MIDI Music Gallery](#).

Level Controller™

Multimedia System Volume Controller

Level Controller lets you gain instant access to your multimedia system's volume level by pressing an assignable "hot-key" combination:

- Pops up over any Windows® application so the level can be accessed immediately.
- Pan control sets the L/R balance for stereo sound cards.
- Can be installed in the Windows Startup Group so it comes up minimized and ready to run from any application.

Since 1975, Voyetra has been in the forefront of music technology. Our software is found on nearly every multimedia PC sold. Voyetra provides custom engineering services to the most prestigious companies in the industry. And Voyetra continues to develop programs and multimedia titles for consumers at every level — from novice to pro.

Our flagship program, [AudioStation](#),™ is the heart of Voyetra's [Multimedia Productivity Pack](#).™ This integrated collection of utilities makes it easy to operate everything a multimedia PC has to offer — MIDI, digital audio, CD audio and video.

[MIDI Orchestrator Plus](#)™ turns a multimedia PC into a complete, desktop MIDI recording studio. [Digital Orchestrator Plus](#)™ breaks new ground by combining a MIDI sequencer with advanced digital audio capabilities.

[MIDI Music Gallery](#)™ and [Digital Sound Gallery](#)™ are CD-ROM collections of high-quality sound files which can be used in musical compositions, presentations and other multimedia projects.

With new CD titles like [Discovering Keyboards](#)™ and [Discovering Music](#),™ Voyetra is branching into multimedia “edutainment.” These interactive CDs bring the history, theory and techniques of music to life and help users put their knowledge to work on original multimedia projects.

Begin realizing the full potential of your multimedia computer by looking through this on-line catalog. We're certain our products will excite you! You'll see why our commitment to quality and innovation has earned us a worldwide reputation as “The Multimedia Sound Specialists.”

To place an order — or for additional information on any of our products — give us a call at 1-800-233-9377. (Outside the United States phone 914-966-0600.)

Great Composers

Learn about the lives, artistry, and genius of 14 of the world's greatest composers as you experience high-quality symphonic performances of their works.

Music Theory

Take a self-paced music theory course and learn the underlying concepts that form the foundation of music. Topics are explained with illustrations and audio examples and include: Nature of Sound, Melody, Harmony, Tonality, Notation, Rhythm, Harmony and Texture, and Form and Style.

Musical Instruments

Hear the expressive beauty of more than 75 of the world's most popular musical instruments. Video demonstrations, narrated profiles, and fully-detailed pictures describe each instrument's construction.

Music Glossary

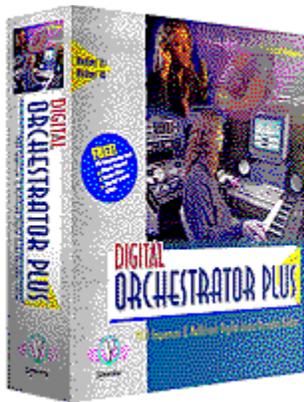

Hear the pronunciation as you read the definitions of more than 250 musical terms, many of which have illustrations and audio examples.

History of Music

Music of the past comes alive as you tour the various eras in music. Full-color illustrations, descriptive text, background music from each era and hyperlinked words make this an engaging educational experience.

Digital Orchestrator Plus™

Digital Orchestrator Plus™ sets a new standard for ease of use in desktop music production. This software merges a robust MIDI sequencer, a multitrack digital audio recorder and digital effects processors into one seamless program. This powerful combination bridges the gap between MIDI synthesizer music and real world sound to bring unprecedented speed, simplicity and productivity to even the most elaborate musical creations. And you can print high-quality sheet music on any Windows®-compatible printer!

You can import or record digital audio clips and see them side-by-side with MIDI music. Effortlessly zoom, edit, move, mix or copy sections of the song with a few mouse movements. Merge tracks by simply dragging one on top of the other. Build multiple, independent tracks into a full "digital with MIDI" mix, right on the desktop. Digital Orchestrator Plus supports MTC (MIDI Time Code), SMPTE in all frame rates, Song Position Pointer, and MIDI clocks for synchronization with external devices such as music and video equipment. The software also includes Mixdown Audio, Tap Tempo Transform, Fit Time Transform, and Accelerando (to change tempo over time). Add digital sound effects processing that would cost hundreds of dollars to achieve with external hardware.

Digital Orchestrator Plus works the way you think, so the learning curve is smooth and easy, with comprehensive on-line help always ready to point the way.

Click on the titles to learn more about Digital Orchestrator Plus:

- [MIDI Mixer](#)
- [MIDI and Digital Audio Track Editor](#)
- [MIDI Piano Roll Editor](#)
- [MIDI Event Editor](#)
- [Digital Audio Editor](#)

- [Digital Audio Effects Processors](#)
- [Music Notation](#)
- [SoundCheck](#)[™] (multimedia diagnostic utility)

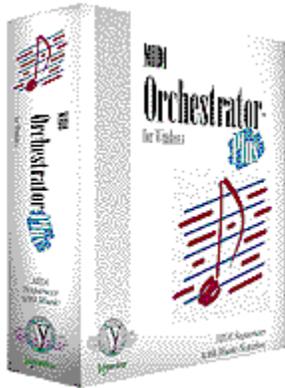

The Digital Orchestrator Plus CD is also loaded with useful extras: an on-screen tutorial, demo files, MIDI drum tracks and a sampling of sound effects from our Digital Sound Gallery collection.

A full array of features at an affordable price make this the perfect partner for PCs equipped with wavetable synthesis, 16-bit digital audio and/or external MIDI synthesizers.

Step up to the new standard and find out how exciting, easy and affordable professional music production can be!

Whether you are an accomplished musician or a beginner — even if you can't read a note — with MIDI Orchestrator Plus™ you can turn your multimedia PC into a complete desktop MIDI recording studio! Work at your own pace as you create multitrack MIDI recordings of your own music or modify prerecorded MIDI songs. Compose songs step-by-step by entering notes with a mouse or MIDI keyboard. Then edit every detail on the PC screen. Quick Keys let you switch instantly between different views of the song. Multiple-levels of undo/redo are available on all editing operations. You can even print out sheet music for yourself and others to enjoy!

Click on the titles to learn more about the modules in MIDI Orchestrator Plus:

- [MIDI Mixer](#)
- [MIDI Track Editor](#)
- [MIDI Piano Roll Editor](#)
- [MIDI Event Editor](#)
- [Music Notation](#)
- [SoundCheck™](#) (multimedia diagnostic utility)

MIDI Orchestrator Plus is a powerful — yet inexpensive — tool that lets you easily create music on your multimedia PC.

For a full library of compatible music files, see [MIDI Music Gallery](#) listed elsewhere in this catalog.

Digital Sound Gallery™ is a rich and varied collection of digitally recorded sounds on CD-ROM. They're easy to use, fun to edit and they sound great! There are so many ways you can use these .WAV files:

- Edit them with a digital audio editor, such as Voyetra's [AudioView™](#) (included in [Multimedia Productivity Pack™](#)).
- Import them into [Digital Orchestrator Plus™](#) to enhance MIDI compositions.
- Use them to create realistic sound tracks.
- Cut, splice, extend, loop, reverse-alter them any way you wish to suit your needs.

There are two volumes of **Digital Sound Gallery**. Each Volume is sold separately. Click on the title for additional information:

- [Volume 1: Multimedia Music and Sound Effects Library](#)
- [Volume 2: Composer's Toolkit™ for Digital Orchestrator Plus™](#)

MIDI Music Gallery™

"Enhance your multimedia and musical creativity with this versatile MIDI music library."

With MIDI Music Gallery,™ you don't have to be a musician to enjoy computer music! MIDI Music Gallery turns your multimedia PC into an electronic orchestra with an almost endless repertoire. It's the ideal companion for other Voyetra products — such as [Discovering Music](#), [Multimedia Productivity Pack](#), [MIDI Orchestrator Plus](#), [Digital Orchestrator Plus](#) — or any other program that uses standard MIDI files.

The MIDI format uses far less disk space than digital audio and makes it easy to alter instruments, tempos and notes, or even add your own parts. Make arrangements as simple or as complex as you'd like — for your sound card's synthesizer, an external MIDI synthesizer, or both.

On one affordable disc, you'll find more than 400 MIDI files. This breathtaking variety of fully-orchestrated musical performances ranges from classical to ethnic to rock. Use them to learn about musical styles, as background music while you work on your PC, or for multimedia presentations. Play the songs as they are or modify them with a MIDI sequencer. The [Gallery Guide](#) makes it easy to locate and preview the songs on the CD.

MIDI Music Gallery contains a variety of styles to suit every taste or musical application, including:

- **Classics** — more than 110 masterpieces from the great composers including Bach, Beethoven, Chopin, Mozart, Schubert, Tchaikovsky and many others, in a wide selection of symphonic arrangements, piano pieces, operatic arias, overtures and other selections.
- **Timeless Favorites** — more than 100 selections, including rousing Marches by John Philip Sousa, nostalgic Piano Rags by Scott Joplin, Children's Songs, International Favorites, Religious Themes, Holiday Songs, Patriotic Themes and Sing-Alongs.
- **Production Music** — more than 35 evocative original themes composed with multimedia presentations in mind, including Action Themes, Ballads, Blues, Comical, Country, Fifties Rock, Funk, Image, Jazz, Mood Themes, Reggae, Techno Pop.
- **Drum Tracks** — more than 45 skillfully played, professional drum tracks to use as foundations for your own exciting compositions, including Ballad, Country, Disco, Funk, Jazz, Heavy Rock, Pop, Reggae, Rhumba, Rock, Samba, Shuffle, Waltz, and more.

- **Signature Styles** — more than 100 unique compositions that capture the moods of the '50s, '60s, '70s, and '80s, the Liverpool Beat, Motor City, the Big Band Era, Country Music, Standards and TV Themes.

Even accomplished musicians will save time and effort by starting with polished material. There's no easier way to tap the musical power in your multimedia PC!

MIDI Music Gallery consists of original copyrighted music and copyrighted arrangements of public domain music. However, the library is NOT in the public domain.

Gallery Guide™

The Gallery Guide file browser, included on the disc, helps you find songs quickly and easily. Just select a category and play a sample of each selection. When you locate the song you want, a mouse click copies it to your hard disk.

Volume 1: Multimedia Music and Sound Effects Library

An extensive selection of high-quality digital production music and hundreds of sound effects. Use the music in multimedia presentations, to enhance narrations, to create soundtracks and more. Use the sound effects with Voyetra's [Multimedia Productivity Pack™](#) or import them into [Digital Orchestrator Plus™](#) to enhance your MIDI compositions.

Volume 1 includes the [Gallery Guide](#) file browser and the following .WAV files:

- 12 high-quality production songs recorded in stereo. Styles include News Theme, Corporate Anthem, Hip Urban Funk, Jazz, Ballads, and more. Each are provided in three convenient lengths: 3 second stingers, 30 second sampler and full length theme.
- 8 piano classics recorded direct to digital in stereo. Songs include Turkish Rondo (Mozart) / Invention #3 (Bach) / Fur Elise (Beethoven) / The Entertainer (Joplin) / Hungarian Rhapsody (Liszt) / Minute Waltz (Chopin) / Solfeggietto (Bach) / Sonatina #3 (Mozart).

More than 400 sound effects in a diverse collection conveniently grouped by category, including:

- Animal Sounds
- Animated Sounds
- Computer Sounds
- Door Sounds
- Electric Sounds
- Footstep Sounds
- Fun & Game Sounds
- Household Sounds
- Military Sounds
- Music Related Sounds
- Office Sounds
- People Sounds
- Phone Sounds
- Season Sounds
- Tool Sounds
- Transportation Sounds
- Weather Sounds

Digital Sound Gallery consists of original copyrighted music and sounds. The library is NOT in the public domain.

Volume 2: Composer's Toolkit for Digital Orchestrator Plus

Fire up Voyetra's [Digital Orchestrator Plus](#)™ with Composer's Toolkit™ and experience the inspiration of digital+MIDI compositions! Skilled musicians, using high-tech music gear, have assembled this wide variety of custom-tailored groove variations, intros, fills, real drum patterns and music samples. Drag-and-drop a digital rhythm into Digital Orchestrator Plus, add MIDI music with your synthesizer then add more sounds for polished, realistic songs.

The Toolkit is focused to the specific needs of computer musicians. It provides a wide variety of musically-oriented .WAV files and song files in Digital Orchestrator Plus format — called “Construction Kits” — which group loops and musical samples of common genres. Musicians can enhance their creativity by using the Composer's Toolkit to import digital audio samples into Digital Orchestrator Plus songs.

Digital Sound Gallery, Volume 2, the Composer's Toolkit, requires Digital Orchestrator Plus.

This CD includes:

- **Drum Loops** — hundreds of live recordings from some of LA's and NY's finest drummers. Styles include hip hop, rock, reggae, and more.
- **Drum Hits** — single hit samples for creating your own drum parts or for adding fills over drum loops. Dozens of snare drums, bass drums, toms, cymbals and miscellaneous percussion, with many different flavors for each instrument — from tight piccolo snare to big, gated snare sounds, and more.
- **Bass Lines** — funky bass loops to inspire you. Cut-and-paste to create your own parts.
- **Industrial Grooves** — machines and synth effect loops provide grinding rhythm tracks and textures for your compositions. These samples are a must for getting that “Euro-pop” sound!
- **Effects** — everything from screams to scratches, these effects will embellish your original compositions.
- **Music Construction Kits** — create your own arrangements from these song templates. Dozens of musical patterns, melodies, fills and effects — all designed to work together perfectly. Use Digital Orchestrator's drag-and-drop feature to quickly assemble your own arrangements.

Digital Sound Gallery consists of original copyrighted music and sounds. The Toolkits are NOT in the public domain.

Gallery Guide™

Finding the right sound is easy with the Gallery Guide file browser included with Volume 1 of Digital Sound Gallery.

Just select a category and play a sample of each selection. When you find the sound you want, press the Copy button to transfer it to your hard disk.

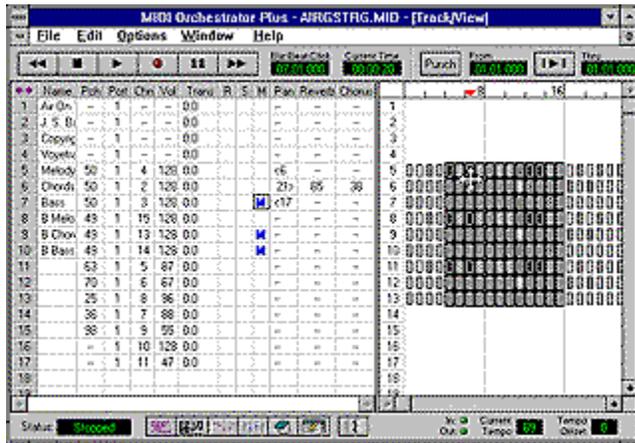

MIDI Mixer

This intuitive “audio mixer” control panel shows MIDI activity in 16 channels on any MIDI port.

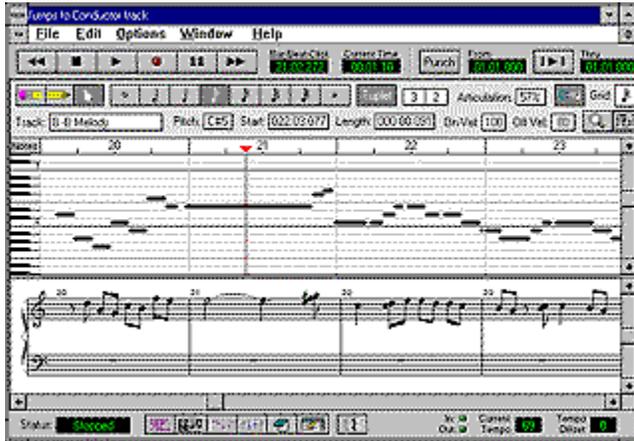

- Re-orchestrate music as you listen.
- Change instrument assignments, volumes, track names, key transposition, tempo and other settings.
- Single out specific instruments with mute and solo buttons.
- Each channel also includes a pan controller and two extra dials that you can assign to various MIDI controllers, such as chorus or reverb.

MIDI Track Editor

- Record multiple MIDI tracks from any MIDI port, then rearrange song structure with full editing controls.
- Copy, move or delete a single track or any range of measures and tracks with simple drag-and-drop commands.
- Control volume, panning, channels, patches and more.
- View track data as numerical values or in easily recognizable formats such as patch names, volume sliders, etc.

MIDI Piano Roll Editor

- Arrange and edit MIDI notes of any duration with simple point, click, drag, cut, copy and paste.
- Double-click any note to see and edit every MIDI parameter — velocity, duration, pitch, etc.
- Music notation updates automatically as you edit.
- Insert notes of any duration — including triplets — with a point and click.
- Grid feature quantizes notes as they are added.
- Zoom to any magnification, from an individual note to the entire song.

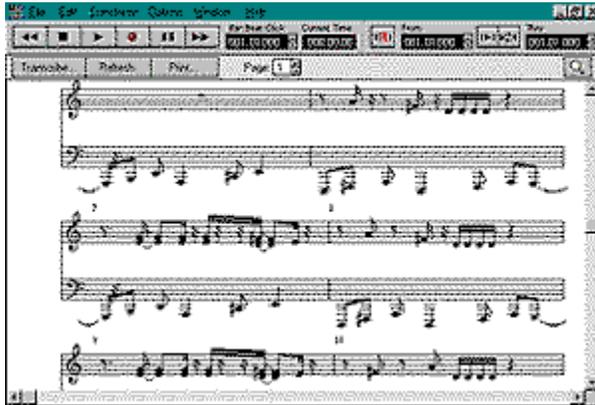

MIDI Event Editor

With the MIDI Event Editor you can view and edit every detail of any MIDI event, including controller parameters, key signature, tempo and more.

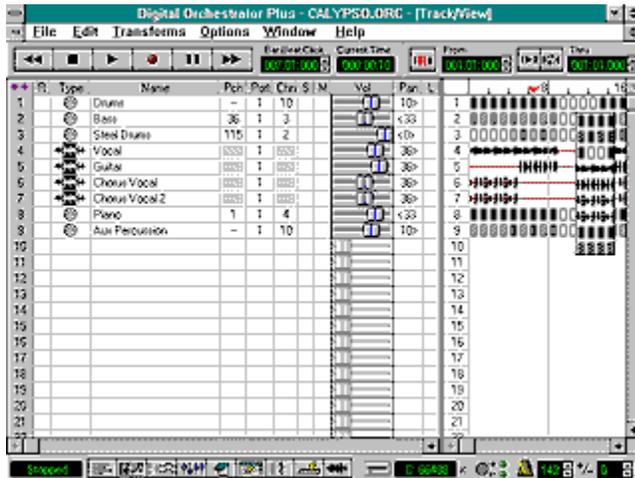

- Filtering options enable you to quickly locate events by type.
- Conductor track lets you place tempo changes anywhere in the song.

Music Notation

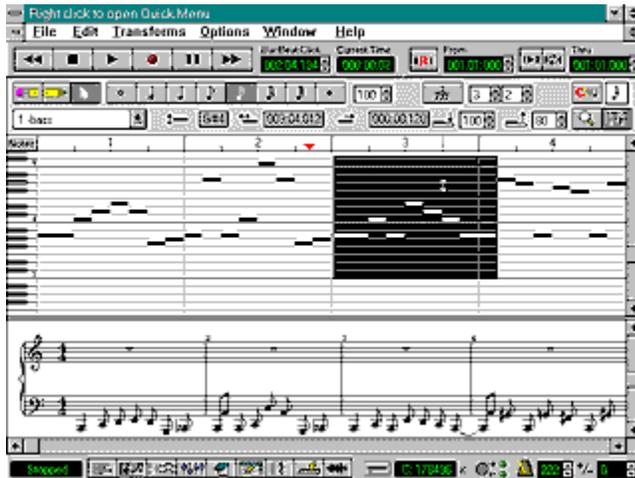

- Convert MIDI data into standard music notation and print sheet music on any Windows® compatible printer.
- Set transcription options independently by track.
- Choose treble, bass, alto, and tenor clefs, drums, grand staff or auto select.
- Preview your score on screen with variable zoom.

MIDI and Digital Audio Track Editor

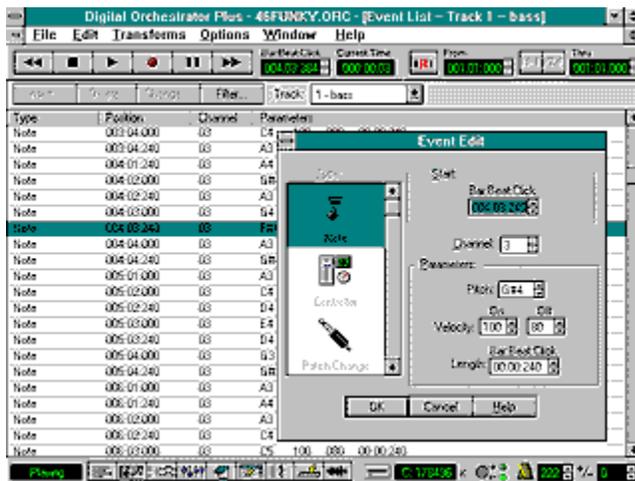

- Record multiple digital audio tracks or import .WAV files and place them side-by-side with MIDI data for fast editing.
- Arrange MIDI and digital audio tracks on the screen in any order you wish.
- Import MIDI or digital audio from other files and export multiple tracks of digital audio into mixed stereo .WAV files.
- Full editing controls let you copy, move and merge tracks with simple drag-and-drop commands.
- Control volume, panning, channels, patches and more.

Piano Roll Editor

- Arrange and edit MIDI notes with simple point, click, drag, cut, copy and paste.
- Double-click any note to see and edit MIDI parameters such as velocity, duration, pitch, etc.
- Insert notes of any duration (including tuplets) with a point and click.
- Grid feature quantizes notes as they are added.
- Zoom to any magnification, from an individual note to the entire song.
- Music Notation window updates automatically as you edit notes in Piano Roll window.
- Includes dozens of MIDI Transforms, including: Humanize, Scaling, Offset, Randomize, Invert, Transpose, Diatonic Transpose and more.

Event Editor

- Double-click to view and edit every detail of any MIDI event, including controller parameters, key signature, tempo and more.
- Filtering options quickly locate events by type.
- View MIDI data in any track, including the conductor track, to change key, tempo or meter anywhere in the song.

Digital Audio Editor

- Zoom in on any digital audio track for fast and intuitive drag-and-drop editing.
- Cut, copy and move or delete song sections easily with the mouse.
- Import .WAV files, such as drum samples or sound effects and place them “right on the beat” with the Snap to Grid feature.

Digital Audio Effects Processor

Just highlight any section of a digital audio track with the mouse, click on a menu, and you're ready to add digital sound effects processing!

- Pre-defined effects include Echo, Reverb, Chorus, Flange, Gate/Compressor and others.
- Or generate your own custom digital effects and save them to use any time you wish.

Music Conservatory main screen

This is the main screen of the Music Conservatory. From here you can select the other sections.
