Stephen Graham's PD List

1.1   Stephen Graham's PD List - Xmas 1997 - Updated every month!

Helooooo (soory but my OOO bulloon keeps slicking and my l bullooon

dooes nool woooork al all. Crooss the l's soo lhal lhey looook like

soomeling yoou drink!

Do you have felt tip marks on your screen now? Sorry about taht (Oh

no, my speelchicker is noo up the duiff), and back to normality now.

Happy Xmas all you great Doubleclick! readers

Welcome to my Public Domain List. Please click on a section below to

find out more. To finish reading an article, please click on the

contents box at the top left of the screen, or any of the browse keys

if you are just browsing!

I have included with the disk a FREE GAME!

It is Poing 4, which must be one of the best Breakout, or Bat & Ball

games this side of the Northern Hemisphere! I play it to death, and I

am writing to the programmer of the game concerning registration, and

if he can supply me with a way or merging highscore tables. Don't try

and change them, as the tables are in binary and are protected anyway.

Highscores are saved as soon as they are entered, although I doubt

you will need to worry about that for a while, on most levels anyway!

If you do get a highscore, send me a copy of the table, and I will

make a file in this guide of all the highscores I receive. Pressing

escape to finish the game will return you to this guide. You will of

course have to stop the music playing in the background first. This

can be done by pressing both mouse buttons. The actual game files

have been powepacked by me so that they would fit on the disk, as it

is now 100% full, so I have had to cut some corners. This will result

in a slight delay in loading, although once loaded there is no more
files that need to be accessed, so there will be no more delays.
I need to pay for all my postage somehow, so send me the disk back
with a first class stamp to cover the cost of the postage etc, and a
covering letter, and I will send you my most recent version of this
disk. Please feel free to copy this disk and pass it onto any of your
friends to look at. I want to try and get this disk spread about as
much as possible to largen my database of penpals. If you want to,
write to me and tell me your name and address and I will add you to
the list. If you write to me, I will include a file on this disk that
has all of my penpals names and addresses on it, so you can write to
them also. This disk has just undergone a major rewrite to make it
easier to navigate, and to read. The last version had a few problems,
which have since been ironed out.

Please tell me how you are viewing this guide:
Straight From The Disk You Sent Me

I Am Reading This Guide Via Doubleclick

I Made A Mistake - Click me to go back to the Main Menu

1.3   Sorry - Register this guide first!

I am sorry, but as this guide has been included in Doubleclick!, we
have been unable to supply it with the free game as promised, due to
space restrictions on the disk. There is a simple remedy. Write to
me, and swap some disks, and tell me that you want the game Poing 4,

from the Cat Disk. I will then supply you an Lha file of the game, as
well as the latest version of this guide.

Send your letters to me at:

Stephen Graham

PO Box 8353

Largs

North Ayrshire

Scotland

1.4   Latest Happenings

Hello there and welcome to the Xmas Issue of the disk.

Click on your name below, if you are listed, or if you are nosey, then
just click any name.

Hellos this month go to:

Ragnar Fyri

Mark Harman

Alan Hennebery

Andrew Whiteley

Morgoth - Genocide

Before I start - Merry Xmas once and for all. There - that's it out
of the way!

I am in the process of making up new Utils, Games, Art, and Magdisk
Archives, to try and save some disks. So far I have saved about 25
disks, so that can't be bad! You will notice that the Compilations
section is a bit different, as it now only lists names. This is to
save space on the guide, as there is no point in typing in the same
description twice, is there? This also means that there will be a lot
of new entries into the guide, as I am now getting stuff from the
Aminet regularly. Stick with me, as all will be fixed soon.

Check out the New PD section this month. I have not bought an order
for a while now, but this should soon change. Loads of great

animations this month including a Calvin & Hobbes comic strip, Revenge Of The Blob, and 3 animations from Eric Schwartz. Also find the latest version of Doubleclick, Issue 4, as well as a new disk from those metal madmen, Genocide, who even mention me in their list of people to thank.On sorting out my disks, I have eventually got around to listing stuff I have on archives for ages. Now there is about 50 new titles so far this month (count 'em).

Also a few new adverts in the Adverts section (funnily enough! What a strange place to put them!).

I am in the process of making up an order for more PD software. Watch this space!

The regular penpals that I write to (Ragnar, Mark, and Alan) will all be happy to know that the hard drive saga may be coming to an end. I have MCP installed on my computer (Brilliant program!), and one of the tooltypes stopped any of the root of the disk being written, which was designed to stop viruses spreading. This of course, would not let me reformat my drive. Now I have 4 partitions, the way I wanted them in the first place. Still have a few bad blocks to remap though, but have shoved them in a drawer all by themselves. Hopefully everything should be OK.

Also, another plea to readers, I have just got hold of an A500+, which is running OK through my video, but I can only use the Mono socket, as I did not get an RF Modulator with it. Can anybody help?

New this month is a change in the way Amicom run things. A lot has happened to Kevin, who runs it. He has since moved house and got married. Please note his new address in the advert. I will be sending him an order very soon, but he is compiling another catalogue disk at the moment, so I shall wait until that is completed. Also, he does have a honeymoon to go on, so he will be a bit busy.

Hear from you soon,

Stephen Graham

PS Guess who is celebrating a Birthday on the 14th January 1998. Yes folks - it's me, so dig deep and try to make it as good for me as I would do for you. Think of the hard work we put into each and every issue of Doubleclick! we produce, and then think how much easier it would be if I had a CD Rom for the artwork I do, a ZIP drive to back it all up, and a Modem, so that I could E-Mail it faster to Mark which would mean we could get more issues released faster. I have to use somebody else's E-Mail server, which does take time. Obviously it

goes without saying that more RAM and maybe a better accelerator

(PowerPC maybe) would be on the cards.

I will of course send you back a card stating that I got my gift.

Send them to the usual address:

Stephen Graham

(Help-a-poor-man's-birthday-go-well-fund)

PO Box 8353

Largs

North Ayrshire

Scotland

KA30 8HG

(Brackets text is optional)

Only kidding, although a card would be nice!

Click me to go back to the Main Menu

1.5   Morgoth's Personal Message ....

Hi there, long time no speak to. I was going to write to you soon,

anyway. I hope that you do not mind me using one of your mods for my

disk, but it really is good, so I must do it. I will of course, as

you can see, give you full advertising.

Thanks for giving me a mention in your new disk, Crossing Over, which

I will be happy to add to my collection.

As to supplying you with some samples, I shall see what I can dig up.

I have about 30 disks of stuff, so I should be able to find something

that you like.

Write back and tell me if you have access to the Internet & E-Mail, as

I now have access myself, and it would save me a lot in postage, and

time, if I could uploaded the data to you. All in all, I should have

a few disks worth.

Hope that you like Doubleclick! 4. Please read the letter with this

disk as to some ideas I have.

Stephen

Click me to go back to the Newsletter Page

Click me to go back to the Main Menu

1.6   Ragnar Fyri's Personal Message ....

Ragnar Fyri of Norway - I got your disks and your letter. I will
write to you in the next week. Thanks for the anims. They were
brilliant. I have sent you another letter, but I am sorry about the
wait, as I had some stuff to write for Doubleclick! which I had to
send back as soon as possible. Sorry again, and hope that you like
the disks.

Loved the Mod.Fountain Of Sighs, by the way.

Also glad you got the E-Mail. I will change the Website listing by
the way! Sorry about that! Should be fixed by now! Sorry once again!

Will write to you soon! Sorry about the Web Page!!!!

Stephen

Click me to go back to the Newsletter Page

Click me to go back to the Main Menu

1.7   Mark Harman's Personal Message ....

Thanks for the E-mails. They have kept me from going very mad at
times! I hope you got the last package of disks I sent to you. Will
write an E-mail to you soon, if Alan does not mind sending it.
Please contact me as I have a few ideas I want to thrash about with
you about Vison, basically what we talked about before re. Web
Browsers.

Well, we did it. DC5 is released before Xmas. Not bad considering the
hassles we have had (well you mostly, as you are the one at Uni and
not me - I only work for a living! Ha Ha, only kidding!).

(Sorry, all you nosey people who are not Mark. I cannot release the E-
Mail address just yet, because it is not mine personally, and I will
need to ask the user himself if it is OK to receive E-Mail's from
anyone)

Stephen

Click me to go back to the Newsletter Page

Click me to go back to the Main Menu

1.8   Alan Hennebery's Personal Message ....

Alan Hennebery of Eire - Where have you gone. Please write to me and
let me know what is happening, now that you are about to start Uni for
Summer. I hope you got the letter I sent you OK. If you have, then
please write.

I have even tried to E-Mail you (to no success).

Stephen

Click me to go back to the Newsletter Page

Click me to go back to the Main Menu

1.9   Andrew Whiteley's Personal Message ....

Andrew Whiteley, the programmer of Remdate - Got your letter last
week. Hope the exams go OK, and glad you liked the disks. Will write
to you later on to see how you got on. Can't wait for 2.3! After I
reinstalled the hard drive, I could not reinstall Remdate, as I had
the wrong keyfile (as before). Don't worry, as I found it
(eventually!). Everything back to normal!

You are a fast reader. I only E-Mailed you and got a reply in about
15 minutes, so I have been informed, as I don't actually send the E-
Mails personally. Glad to see you will write soon, and I look
forward to your reply.

Stephen

Click me to go back to the Main Menu

1.10   Ian Charles Fyvie's Message ....

Hello there Ian, and welcome to the flock of penpals. I hope that you
found the last packages quite useful, and look forward to hearing from
you in the future. I have passed your details on to Amicom. Expect a
disk soon.

Stephen

1.11   Some Really Useful & Interesting Information About Me!

About Stephen Graham

----- ------- ------

Hello. My name is Stephen Graham. My birthdate is 14 January 1976 and

I am currently 21 years old and I want to get started in swapping

disks etc through the mail with other Amiga fanatics, like yourselves.

Here is a list of my computer Setup:

A1200 with internal 2½" 260 MB Hard Drive

Appollo 1220 4 MB Memory Board with 68882 Maths Co-Processor plus Clock

2 External Floppy Disk Drives

CitizenABC 24 Pin Dot Matrix Colour Printer

Panasonic KX-P1180 9 Pin Dot Matrix Black & White Printer

Goliath Upgrated Power Supply

Wizard Developments Black 3 Button Mouse

RoboShift Joystick / Mouse Splitter

Camlink Stereo Sound Mixer

Konix Sppedking Joystick (Which I have had for 5 years!)

Konix Navigator Joystick

A600 with 1 MB Trapdoor Memory Upgrade plus Battery Backed Clock

A500+ (But I have no RF Modulator)

Cambridge Z88 Laptop (Soon to have a Connection to the Amiga A1200)

I have been collecting Public Domain for a few years now, and

although my collection is not very large, (350 ish disks), I have

quite a lot of other disks from mags etc, and friends. I also run the

latest version of Virus Checker and Virus Z 2 on startup to combat

virus infection.

I have been interested in computing from a very early age. My very

first computer was a ZX81 (remember them!) with a full 16K upgrade!

Wow! I had two of them before I upgraded to a ZX Spectrum (the first

one with the dead man finger keys!). From there I bought a 48K ZX

Spectrum (The black one with the fold down feet), and from that a ZX

Spectrum +2, which at the time was the cutting edge of technology. A

whole 128 KB of power. I also had a Radio Shack TRS-80, which I only

used for playing chess and Card Games - it was that primitive. I then

decided it was time for a change, and bought an A600 with my brother.

Wow! Programs that loaded in less than three days, and they had

decent sound and graphics. I was converted. I had a shot of friend's

Atari ST, but it was not the same - The Amiga was the one for me!

Soom after this my brother and I, who owned half of the Amiga,

decided to upgrade up to an A1200. We did and since them have

expanded the system. We bought the printer first because we were

currently using an Epson 9 pin Black & White and the quality was

quite literally, crap! We have since bought the Hard Drive (Notice to

all non-Hard Drive owners:- GET ONE NOW. YOU WILL NOT BELIEVE THE

DIFFERENCE!), and we are currently saving up for a CD-ROM, a Sound

Sampler and an Colour Inkjet Printer.

I also own a Cambridge Z88 Laptop computer, which is handy to type out

your letters when you are out and about, or away from home. I am just

about to buy a cable that connects the Z88 to your Amiga. It`s

something I`ve wanted for a long time. Eventually, I got it. All good

things come to those who wait. I also have a Phillips CDi with the

Digital Video Cartridge, lots of films and games etc. It is a

brilliant machine to play with. Does anybody else have one, and would

like to swap tips etc about games, and maybe even some discs?

I am now also a Co-Editor for Doubleclick!, the Amiga disk magazine

produced regularly by Pentrisoft. It is freely available from PD

Libraries, as well as Pentrisoft, Amicom PD, Mark Harman (The

Pentrisoft President), as well as myself. A worthy read which has

loads of articles to suit just about any taste.

I work in the mornings delivering newspapers with my brother. After

that I work as a mechanic in my father`s garage, fixing cars. From

time to time I am a DJ, who runs his own mobile disco (which was paid

for out of the paper round - think of the price of CD`s and equipment

etc).

My main interests are Cars, for obvious reasons, Computing and

Motorcycling and I own an L Reg Kawasaki AR125 in Team Green Racing

colours. My young brother has got an N Reg black Kawasaki AR50 (yet

another paper round extravagance - we use them in the mornings). I

want anything you like on the disks, Demos, slideshows, games, utils,

you name it, I want it. All letters answered 1200%.

Thanks for watching, and send me your jiffys.

Stephen Graham

Click me to go back to the Main Menu

1.12   How to contact Stephen Graham

How To Contact Stephen Graham

--- -- ------- ------- ------

Please write to me at the following address:-

Stephen Graham

PO BOX 8353

Largs

North Ayrshire

Scotland

KA30 8HG

Or phone me: (0468) 508871, but this number's my mobile phone. Do so

at your own risk.

Please feel free to send anything you like to me, letters, disks, Mars

Bars (None with Rat Poision although), magazines etc. All letters

will be answered with a few disks maybe, full of my latest PD etc. I

am looking to write to anyone, over 16, male or female, who has a

sense of humour.

Due the price of disks, I will only send you one disk if you are

writing to me for the first time, but if you send me disks, I will

send you some back in return. This is to stop people who are only

looking for free disks! I am not a charity! Please write to me about

anything although I am most interested in Cars, Computers,

Motorcycling, Music, and Humour! I would appreciate if you could bung

in a few first class stamps, as I need to pay for the packages I send

to my PD Library, currently averaging about 2.50 a package. If you

send me free stamps, I can spend more on PD, and you can have a

greater selection.

Please feel free to copy this disk and pass it onto any of your

friends to look at. I want to try and get this disk spread about as

much as possible to enlargen my database of penpals. If you want to,

write to me and tell me your name and address and I will add you to

the list. If you write to me, I will include a file on this disk that

has all of my penpals names and addresses on it, so you can write to

them also.

Anyway, send me your jiffys!

Thanks for watching,

Write to you soon,

Stephen Graham

Click me to go back to the Main Menu

1.13 Why I Did This Guide

Why I Did This Guide

--- - --- ---- -----

I found that after writing off to a few PD Libraries, they all stocked roughly the same thing. I thought that if I wrote to the magazines and advertised my disk in the PenPals and small Ads section, people would write to me, having had the same dealings with PD Libraries. I want to make it clear that I am NOT a PD Library, just someone who does not want to lose the Amiga. I am not charging money for this, I am treating this the same way as you would writing to a penpal. If you had a penpal and he sent you a tape or CD etc, you would not expect to pay for it. This is not to say that money received will not be appreciated. If you feel I should get money for what I am doing then don`t let me stop you. I also did this guide for the challenge, the sheer hell of it, and really because nobody has even tried something like this before!

This version is better in some ways than previous ones as all the text is in one Amigaguide document, whereas in previous versions, the textfiles were stored in a separate directory called Text.

This had some advantages and disadvantages. Editing the previous version was harder, as there was lots of different text files to change, but now the whole file is loaded into Ram, whereas the text viewer I was using only loaded in the file when needed. You win some, you lose some!

Software Used:

Amigaguide

Edword V5.6

OctaMEDplayer

Octamed V5

PP & PPShow

Personal Paint V6.3

Poing 4

Textview

Vista Pro

Vista Pro Lite

Wordworth V5

Click me to go back to the Main Menu

1.14   People I Have To Thank In Helping Me With This Guide

People I Have To Thank For This Guide

------ - ---- -- ----- --- ---- -----

All at Amicom PD - Thanks for the last order. You really are hyper
fast. I received the order before I sent it! You really must eat your
Weetabix in the morning! Anyway, thanks must go to all at Amicom,
Kevin, Ian, Sharon, Leanne, andall the Amigas for taking the time to
look at my disk. It has not been a waste of time after all. You said
that if you had time, that you would phone me. I keep missing you, so
you gave me your home phone number, which I will just write here to
see if it is Ok. (01234) 567890. I will not give it out as I know
what it is like having people phoning you up when you do not want to
listen to them. I will try and phone you sometime. Bye!! Sorry about
the size of the last order. I really did get a bit carried away.
Anyway, that will be me for about 10 minutes, before I send you
another order. Write to you soon.
Alan, my brother - As I am writing this, he is in my bedroom,
watching a film on my video, as I am using the computer, in his room,
and he cannot use his video as I am here. Thanks for the time on the
computer (we usually share the time).
All the people who work for the National Grid - Keeping me supplied
with electricity.
All the Octamed composers - For writing all the Modules that I have
in my collection. There are too many people to thank by name.
Commodore - For inventing the Amiga in the first place!
Mark Harman - Mark is the author of Doubleclick, A brilliant disk
magazine to which I regularly contribute, as I am a Co-Editor. He
works hard at it and deserves the credit for the work he has done so
far.
Andrew Whiteley - Not only did he write Remdate, the excellent
Organiser program, he also saved my Hard Drive from extinction a while
back. VERY helpful, and must be mentioned. Thanks a lot, Andy.
Many more people who I know & love, but have forgotten to mention!

Click me to go back to the Main Menu

1.15   The Public Domain Software List In Full!

The PD List In Full

--- -- ---- -- ----

Here is a list of the Public Domain Disks I have. It is sorted into
alphabetical order, so any new titles will be in there somewhere.
Sorry, it would have been easier to just list new titles at the
bottom, but it would have been harder to search for any titles that
you think I may have. I cannot say what these programs will run on,
as I only own an A1200 and an A600, so if the program is 1.3 only,
then there is a chance that I will not have it, or if I do, I will
say that you must use Kick 1.3 to run it. It is wise to get a copy of
this disk as it will no doubt pay for itself in no time at all.
To browse through the list, just click on the letter you require, and
it will be displayed. This feature was suggested by Paul Lathwell, the
author of Address Print, and Onform. This is to aid the reader in
finding a specific program.
Please select a letter from below:

Numbers

Due to the number of disks that I am storing, some of the titles will
be on other disks, along with other titles, which happens mostly in
the Utility section of my collection. This works better for you, as I
will just copy the whole disk, so that you get more programs than you
asked for.
Occasionally, I will go through my collection and weed out all the
useless titles, which, at the time of writing I am doing. This is so

that I can use the blank disks. I may LHA the files to the Hard Drive

for use later on, but then again I may delete. I will try to have

titles that you ask for but I cannot promise anything. Also, just

because it is on the list does not mean that I have it. You may be

reading an old version of the list.

To make it a bit easier for myself, I have separated all the titles

into different headings and put them in their own disk boxes. I have

listed the headings below. Click on them and you will be given a list

of titles, although explanations of the titles will be in the main

guide. This is so that you can see what numbers of varying headings I

have.

The Titles

Music Demo Disks & Music Utilities

Demos, Artwork, Slide-shows, Anims

Games

Various Utilites

Textfiles & DiskMags

The number of disks for each title will also be shown

List Last Updated On 20/10/97

---- ---- ------- -- --------

That's All Folks .... For Now!

Click me to go back to the Main Menu

1.16   Numbers

Numbers

----

101 Uses For A Dead Cat - Sick! 101 pictures (funnnily enough) of dead

cats drawn in High Res, Black & White. Some of them are quite funny,

but most of them are quite sick.

2 Meg Walker Demo (2 disks) - Demo of Spacewalker from Star Wars.

Good!

256 Colour - Sort out any clashing colour problems. Resets to the

original presets.

3 Games - Worms, Go Karts and PANG clone. Also prog to toggle

PAL/NTSC.

3 Ways To Stop Smoking - Brilliant animations to help you kick the

habit. If you are finding a problem stopping then this disk will help

you a lot.

4 Get It - Join up the squares that look the same on the grid. Very
much like Puzznic, that old A500 game, but the graphics are much
better.

4 Wins - Connect Four on you WB Screen.

600 Busines Letters - Lots of text files for lots of business purposes

6th Form Educational - Full of clever student useful programs like
graph makers and a program to print out a CV etc.

6th Form Lovers (2 Disks) - Pictures of two girls, who, let's say,
know each other very well! Over 18's only!

Click me to go back to the Public Domain Menu

1.17   A

A

-

Aavd -

A Taste Of U4iA - A not bad demo with the usual effects.

AB3D2ED - Editor for levels etc on Alien Breed 3D 2.

Abnormalia 5 - Issue 5 of the pretty good Disk Mag. The graphics are
on a par with Grapevine, as is the music, but most of the articles
are all about scene stuff on the Amiga. Some of it is interesting,
though.

Action Replay IV - Find all the cheats in those games!

Address Book - remember where your mates stay, Comes complete with a
telephone dialler too.

Address Print - Keep a list of addresses on file and print them out
too. Written by Paul Lathwell of Onform fame!

Addresser - Print out nice address labels etc.

AlbinMUI - A great database for all your music albums. Requires MUI
installed.

Alphaspell - This will spellcheck any ASCII text. User Dictionary as
well. Ambassador Fruit Machine v2.0 - I played this for about 3 hours
last night! Very good graphics and sound. This is very much fun to
use, thanks for asking!

AmiCDFS2 - Well known and used CD filing system for the Amiga.

AmiFIG2.8 - Structured drawing package for the Miggy.

Amigadeus Classical - Classical music done on the Amiga. Many tunes
that you will know, and very well presented.

Amiga Test - Make sure that your trusty box of chips is not going to

die on you, just as you reach the final level in your favourite game!

Amigatration - Same as Think A Mania but the graphics are not half as

good.

Amiga Workbench `85 - Slideshow written by my brother poking fun at

Microsoft Windows!

AmiTCP V3.0b (2 Disks) - Want a fileserver for the Internet. You got

it!

Amy Vs Walker - Needs more memory than 2MB, but it really is worth it.

Another brilliant Eric Schwartz anim.

Animals Clipart - Loads of pics on this disk.

Anti Beol 13 - Program to get rid of the Beol13 Virus.

Anti Lemmin Demo - Takes ages to load, then you get a disk error!

Appcon - Makes any requester an app window.

Apptool -

Army Miner - Minesweeper clone for WB. Brilliant.

ASI Boot Utilities - Loads and loads of utilities to make that

bootable disk that you always wanted. Create scrollers and flashy

things. Swirly things also a speciality.

Assorted Clipart - Loads and loads of different things to look at.

Well drawn. Made by Amicom PD.

At The Beach 2 (2 Disks) - Another brill Anim by Eric Scwartz with Amy

The Squirrel & Co. At The Movies - Amy The Sqirrel on a date to the

movies.

At The Movies 2 (4 Disks) - Brill follow up to At The Movies.

Attack - Demo all about Scud Missles. Quite good all round.

AutoAssign - Keep track of those assign commands!

Award Maker Plus - Design & print all those sought after awards like

Slob of the month, Cook of the Year, Man of the moment etc.

Awesome Sounds - Lots of great Modules on this disk. Menu driven.

Axis / Picturebook (4 Disks) - I bought this years ago, but was

supplied on HD disks, so could not see all of this excellent Graphics

& Music Demo.

Click me to go back to the Public Domain Menu

1.18   B

B

-

BadBlocks - Finds all the Bad Blocks in your Hard Drive, and tries to

ignore them. It makes a list, which you can then use in HDToolbox etc.

Basketball Anim - Good quality Anim of a basketball player getting a basket, drawn using Imagine.

Batman - Slideshow from the animated Batman cartoon. Excellent.

BBC Emulator - Why would you want to turn your Amiga innto a BBC Micro?

Balders Grove - A Boulderdash style game.

Barbi Twins Volume 1 - Some great pictures of those great sisters.

Barbi Twins Volume 2 - More of the same. Both disks over 15 only.

Bar Tender - What will it be? How to make loads of cocktails.

Bass O' Matic (2 Disks) - Some dazzling tunes on this disk.

Battle Pong - Atari style Bat and Ball.

Beatbox (2 Disks) - Lots and lots of good Mods to listen to.

Beatles Sonix - All your favourite Beatles songs perfomed on Sonix.

Beatmaster 808 State - 4 Mods from 808 State.

Beetle - Brill platform game. Brill sound. Brill Graphics. BRILL!

Big Time Sensuality (2 disks) - Excellent A1200 demo with Bjork soundtrack!

Biocalc - How do you feel today? Should you go and face the world, or just stay in bed. This program, written by my good friend and fellow Pentrisoft member, and fellow Doubleclick! Editor, Mark Harman, will tell you how your life will turn out with the aid of this program, the sun, the moon, the stars, and the nearest newspaper!

Birthdate History V2.21 - Type in Date Of Birth. Facts about the day!

Bit Tec 200 Utils - Loads of Utils to play with (209 in total).

Bits & Bats - Lots of utilities to play with.

Bits & Bats 2 - Disk crammed with Utils etc.

Bizz Nizz - Don`t Miss The Partyline module. Excellent!

Blitz Basic Manual - Very in depth on line manual for Blitz Basic 2. Better in my opinion that the one that you get with BB in some ways as it is easier to find what you are looking for.

Blobble - Platformer, not unlike Blob.

Board Games - All your favourites are on here. About 20 in all.

Board Games - Brilliant! About 20 games in all!

Bodyshop 3 - AGA Pics of lovely girlies to look at.

Bon Appetit - Save all your recepies to disk.

Bondmine - Boulderdash Clone. Not bad at all.

Bomb Jacky - Very slick Bombjack clone. Excellent!

Book Corner - A few books typed out as ASCII text. Christmas Carol

etc.

Boum - A great Minesweeper clone which looks great playing on your

Magic WB screen.

Bouncer - Music Demo of the song from Kicks Like A Mule.

Bratwurst V1.01 - 2 or more players space shoot `em up!

Budget - Find out if you are spending too much on PD!

Bugs Bunny Animation - Brill animation of your favourite rabbit.

Business Card Maker - Obvious what it is but I couldn`t get it to

work.

Click me to go back to the Public Domain Menu

1.19   C

C

-

CDROM-WB - Boot up your CD ROM From WB.

Caboom - Makes your windows "explode". Yes, it does, and it is great,

but it takes up too much processor time, and makes your computer

ssllooww right down. Better to use zoomwindows.

Caffeine Free - Vertically scrolling Space game written in Blitz

Basic.

Car Business - Act like a boss at Ford! Very complicated to use but

fun!

Car Data Analyst - All about RPM`s, BHP`s and TDC`s! (Engines, for you

lot!!)

Card Games - King, Poker, Patience. They are all here.

Card Games - Lots of card games to keep you amused.

Card Games Deluxe (3 Disks) - Video Poker & Black Jack game that uses

Klondike Card Sets. HD Installable, (I recommend that you do as well!)

Card Sets Disk 1 - A disk of card sets for use in Cardz.

Cartoon Clipart - Clipart of your favourite cartoon characters.

Cash Fruit - Fruit Machine Simulator.

Cat Slideshow - See the line above the last line!

Catalogue 3 - Demo disk of program to catalogue all your disks, films

etc.

Cats Clipart - Nice colourfull piccys of felines.

Cats Clipart 2 - More of above.

Cellanim -

Chaos Rock - Rock style music for your ears.

China Tiles - Match the pairs game.

Class Action - Util not unlike Multiview but better.

Classpatch -

Clipart Compilation Disks - Please read Clipart section for more info.

Clock - Wow, a clock for the WB, how original. This one however has

the best graphics you are ever likely to see for an Amiga clock.

Written by a TV Station programmer in Greece, it is run 24 hours a

day, and changes the picture to coincide with the time of day. The

only problem is that you have to type CTRL C to quit.

Club Mix 2 - More Octamed songs to listen to.

Code Mungus - A Highway Code test for all you learner drivers.

Cokeman & Smurf - Two swish animations.

Colour Cars Clipart - Speaks for itself.

Communicate - Teach yourself sign language.

Computers - Clipart about classic cars!

Condom Demo By The Fachoheres - Quirky little demo about a condom.

Convertors Disk - Convert all your pictures to IFF. Reads PC & MAC

etc.

Cotton Eye Joe (2 Disks) - Music Demo of the popular chart hit.

Crossword Creator - I wonder what that is!

Cult & Fantasy TV Themes - A disk full of Mods like Prisioner, Dr Who

etc.

Cult & Fantasy TV Themes 2 - More of the same.

Custom Worms Backgrounds - New backdrops for Worms levels.

Cybernex Music Disk - Rave style Mods to listen to.

Cydonia / Rerun - Great Techno Demo with loads of great graphics etc.

Click me to go back to the Public Domain Menu

1.20 D

D

-

D Solve Crossword - Construct and solve crosswords. Not very good.

DFA - Number dialler for use with modems.

DMSWBench - Wbench for using DMS disks.

Daffy Loses His Head - Well drawn anim of Daffy Duck.

Dare To Imagine - Loads of useful info about Imagine.

Datatypes Disk - floppy choccy blocky with loads of Datatypes.

DB35 - Nice little database for all you tidy people.

DCatDiskCopy - Another run of the mill disk copier.

DCopy - Excellent disk copier. I use it all the time.

Deluxe Galaga AGA - Very good space invaders game by Del. Pacman writer.

Deluxe Galaga V3.10 - My favourite Space Invaders Game. Excellent.

Deluxe Music Data Disk 3 - More of above.

Deluxe Pacman AGA - Very good Pacman clone.

Demolition Mission - Drop bombs on buildings kind of game. Not bad.

Demon - American version of Klondike. All right if you like card games, like I do.

Desert Doo Do - Anim about a man wandering in a desert, who finds an Ice Cream van.

Dialling Codes - Find out where that phone number came from.

Dieser Zug - Absolutely Excellent Snakes game for 1 player on WB.

Diskarchiv - Keep track of all your disks with this database.

Diskmaster- The almost as good, but not as good, tried to replace Dopus but failed file manager.

Diskmatter -

Disksalv2 - Anybody who does NOT have this deserves all they get. This program is an invaluable one to have in your collection. It will sort out most problems regarding duff disks, and was the last PD version made before the programmers decided to make it a commercial product.

Dissect V1.7 - Take all your games to bits to find cheats. Difficult to use.

Document File Protector - This util can come in VERY handy. Uses a password or a series of numbers to encrypt a document file. To decrypt it, you load it into DFP, after first typing in your password, BACKWARDS. If you get it wrong, the file is encrypted again, and so on. By encrypting a file twice, you can be sure that NO-ONE can read it. Even the FBI could not break this one!

DoIcon17 -

Domimium Demos 1 - First in a set of many of good demos and intros etc.

Domimium Demos 9 - More of the same.

Domimium Demos 10 - Same as before.

Donkey Kong - Conversion of the C64 Classic!

Doomed By Pearl - Okish Doom style demo/intro. You will not load it

twice.

Doop - Music Demo of the very popular chart hit.

Doubleclick! Issue 1 - First issue of the Mark Harman written Diskmag.

Doubleclick! Issue 2 - Second issue, which has been totally rewritten,
with many improvements.

Doubleclick! Issue 3 (2 Disks) - Third in the series of the excellent
diskmags, which I have a hand in writing. They are worth every penny.
Now on 2 disks.

Doubleclick! Issue 4 (2 Disks) - After much hard work, it is finally
here - the best read all summer. A must get, totally great, cool,
groovy etc (Have I sold it enough Mark?).

Doubleclick! Issue 4 (The AmigaGuide Version) (2 Disks) - The same as
DC4, but in a very large Amigaguide document, but without all the
bells & whistles, just so that our non AGA readers do not feel left
out. Yes, there is a few of them left!

Dragon Tiles - A VERY good "Click on the pairs" game, Which I have of
course registered for. Worth every penny.

Dreamgirls Cardset - Another REKO Cardset of nice females.

Drums & Pipes - Songs full of drums and pipes funnily enough.

Dysk Stik V1.1 - Brill disk label printer from Paul Lathwell, the
author of Onform.

Click me to go back to the Public Domain Menu

1.21 E

E

-

Edword V5.6 - The very text editor used to type out most of this great
document you are reading now.

Electrics - Make your own circuit diagrams etc.

EmbedIFF24 -

EmbedIFF256 -

EngClockV2.4 - A nice little clock for your WB.

Erase - Get rid of files - PERMANENTLY!

Erika AGA - 4 High Quality AGA pictures of Miss Elinak (Her from
Baywatch).

Erotica Cardset - Very naughty cardset for Klondike 3 AGA.

Escapade - Breakout clone game written in AMOS. Quite good, but then,
so are all the rest.

Exit 13 - Brilliant Puzznic clone (Remember Puzznic on the

A500/A600?).

Extensions Demo - Another brill Tachno Demo.

Extreme Violence - Run around a maze and kill your enemy. Some Mods

too!

Eyecatchers Clipart - Disk full of pictures for use in signs etc.

Click me to go back to the Public Domain Menu

1.22   F

F

-

F1GP-ED - Jazz up F1GP from Microprose. My brothers own copy, so I

will send you details of what to do to get a copy of this disk. It is

Brilliant, Brilliant, Brilliant!!!!!

Farts & Belches Collection - Ferris Bueller style organ (remember the

film?)

Fast Blitter - Makes the blitter chip get faster, which makes graphics

appear faster, which makes everything else faster, which makes....I

think you get the idea.

Fast Cars Cardset - Another cardset for Klondike 3 AGA.

Fast Intro Maker - Compile your own demos.

FastIPrefs -

Fastview - like View, but faster!

Fitter - See how many disks it will take to archive all your hard

drive as a backup.

Flintstones Clipart - Clipart disk full of bedrock characters and

more.

Flush - Rid the memory of unwanted routines.

Frac - Draws lovely Fractals which you can then use in PPaint etc.

Franklin At The Movies - Anim. A day in the life of Franklin Fly.

Freedom Cracks 11 - Not bad attempt at a disk mag. Quite interesting.

Freezers / Lech Demo - Very good demo, with amazing graphics and even

better sound.

Frog Animation - Cute anim of a frog catching a fly.

Fruit Salad - A very jolly platform game where you collect fruit.

Funny Backgrounds & Icons - Loads and loads of WB backdrops. LHA`d

disk.

Click me to go back to the Public Domain Menu

1.23 G

G

-

Gameboy Emulator - Tetris on the Amiga Gameboy.

Games Galore Remix 5 - Loads of games, ie Patience, Monopoly (Yet
another version), you name it!

GBlankers - Lots of nice screen blankers. I use this program myself,
and out of the lot of them, this is the best. I have never seen it
make the computer crash, as others do.

GBRoute - Demo of commercial program to plot road journeys. A bit old
now, but still a lot of fun.

Genocide: Nazgul - Metal style Music Mods to listen to from my friends
at Genocide, a Metal Band (I suppose instead of a rubber one!), who
come from London.

Genocide: Crossing Over - More metal Mods. Brilliant quality.

GIF Slideshow - Lots of lovely piccys to look at!

Giga Mega Mix (2 Disks) - Modules to listen to which are loaded via a
nice menu.

Gloom Deluxe Trainer - Cheat mode for the great Doom style game.

GNU Chess 4.0 - Quite good Chess Game. Very hard to beat.

GUIARC - Unarchive all those magazine disks with ease.

Game Attack - Disk full of Workbench loading games.

Games - Various WB 2 & 3 games.

Garfield (Let Me Out) - Funny Anim of Odie, Garfield's Canine
"Friend".

Garfield Animation - Good Anim of your favourite cat.

Garfield Slides - Brilliant Garfield piccys.

Gas Turbine - Animation of the Gas Turbne engine. Brilliant for
techies!

Genius - 3 techno style modules.

Get Frogged - Animation of famous Warner Bros cartoon of singing frog.

Ghost Writer - Create disk mags with this. I do not understand how it
works, and I haven't had time to read the document so you will have to
work it out for yourself.

Grapevine Issue 09 (2 disks) - Excellent Disk Mag. Get it now.

Grapevine Issue 15 (3 disks) - See above.

Grapevine Issue 16 (3 disks) - See above the above.

Grapevine Issue 17 (3 disks) - See above the above the above.

Grapevine Issue 18 (3 disks) - See above the above the above the

above.

Grapevine Issue 19 (3 disks) - Do you get the idea by now?

Grapevine Issue 20 (2 disks) - See Grapevine Issue 9!

Grapevine Issue 21 (2 disks) - See above!

Gravity Power - Thrust style game. Tons of weapons and levels.

Guide To Computers (2 disks) - Funny pictures connected with

computers.

Guru3.0Eng - Find out why the compter just crashed etc. Also covers

DOS.

Click me to go back to the Public Domain Menu

1.24   H

H

-

Have A Laugh - Lots of smutty cartoon to look at.

Heddley - Make your own Amigaguide documents. Fantastic!

Hell In Heaven - This is a slideshow written in Amos, by one of my new

Penpals, Ragnar Fyri, who comes from Norway. Quite good slides and

has a soundtrack too. He is part of the Amiga Group CREAM (CREative

AMigites).

High Octane - Top down car racer with course designer. Blow up the

enemy!

Hillbilly Anim - Another very complex anim about a hillbilly, his

wife, his cat, and his moonshine still.

How To Fail Your Driving Test 4 Times - Loads for ages and then it

gets caught in a loop. The tune at the start is not bad though.

How To Skin A Cat - Demo with lots of spinny vectors etc. Weird!

Humour - Funny pictures on a disk.

Hydro Zone - Remember Star Wars at the end (Death Star)? Get the idea?

Hypnosis Music - Disk full of jolly tunes.

Click me to go back to the Public Domain Menu

1.25   I

I

-

I'm Too Sexy (2 Disks) - Music Demo of the chart smash from Right Said

Fred.

IQ Test - See how clever you are.

Icon Calendar - Displays lovely calender on WB screen.

Iconmania - Disk full of icons. Pretty good.

IconWIN - Iconify ANY window.

Imagine Buddy System (2 Disks) - Upgrade Imagine 2 with these disks.

Infection - Othello like board game.

Insectoids 2 - Space Invaders clone not unsimilar to Deluxe Galaga.

Installer 43.3 - Recent version of the Installer command.

Install WB3.0 - Will format, partition, and Install WB3.0 onto your
Hard Drive.

Click me to go back to the Public Domain Menu

1.26   J

J

-

JCGraph -

Jesus on `E`s (2 disks) - Legendary Techno rave demo. Most excellent
dudes!

Jokedisk - Disk full of Jokes (most are a bit naughty!). Compiled by
ME!

Judgement Day. Remeber Demolition Mission on the ZX Spectrum. The
same!

Juggler - 2 Juggler Anims, drawn with Imagine. Also has PoiPoi and
Klondike V1.1C on the disk.

Juke Box - EXCELLENT Modules Disk, with brill menu. Sounds amazing!

Click me to go back to the Public Domain Menu

1.27   K

K

-

Kefrens Dane - Excellent Music Demo.

Kefrens Desert Dream (2 Disks) - Another excellent offering from
the brilliant Kefrens.

Kefrens Interchange - Advert for a forthcoming Kefrens Demo.

Keyquick - Pretty crappy Typing tutor. I have ordered another one
that I have heard is much better.

Klondike V1.1C - The original patience card game. Does not need AGA.

Klondike 3 AGA (4 disks) - Excellent patience card game. Needs 2 MB &
HD!

Click me to go back to the Public Domain Menu

1.28   L

L

-

LCD Dreams - 4 of the old handheld games to play - Brilliant!

Lambourghini Slideshow - Brilliant pictures of Brilliant cars.

Landscape - Make the garden of your dreams.

Language Translator - Learn popular phrases in French, German,

Spanish.

Lethal Exit - Techno Demo.

Lottery! - Fancy your chances. This might make it happen. It could

be you, as they say. If you do win anything with this program, then I

expect a percentage!

Luxo Teenager - Anglepoise Lamp Anim. Very Good!

LZH Utils - Can't think what this one is!

Click me to go back to the Public Domain Menu

1.29   M

M

-

Machine Anim - Another good Animation.

Mad Elks / Technologic Death - Brilliant, and I mean this, Techno demo

with some magical effects, and no swearing, except right at the end,

which is unusual for demos these days.

Madhouse - Brilliant Screen Blanker. I use it myself.

Magic Card Tricks - Tells you how to perform 3 magic card tricks,

strangely enough!

Magic Eye - Another great WB gadjet where two eyes follow the mouse's

(mice?) every move.

MagicTV - Brilliant utill I use a lot for Wordworth etc. Will stop

the flicker on High Res Interlace screens of 16 colours or less. I

tried it and it works, although not on my WB as this is a 32 colour

one. Worked a treat on Wordworth and PPaint though. 32 colour

version will be available soon, as I E-Mailed the programmer, and he

has said he will send it to me when it is done. I have seen a Beta

copy of it, and it looks promising.

Magnetic Pages V1.3 - Disk Mag Maker. Will play with it and tell you

later what I think of it. If it is good enough to use, I may create a

regular diskmag, which you lot can even contribute to. Grapevine Look
Out!

Magnum V1.7 - Disk mag creator which looks like Grapevine. NOT!

Makepath -

Manic Raves (2 Disks) - lots of rave music to listen to.

Maped - Make maps for all you adventure game writers.

Master Blaster - Brilliant Super Bomber Man clone.

MasterMind - Guess the colour of the 4 balls the computer has picked.

Maximum Overdrive - Demo which needs HD.

Mayhem On Wheels 3 - Small anims of car crashes. Can also be viewed in
Deluxe Paint. Mega Tron - Snakes style game.

MCP - The ultimate add on for WB. Can do just about anything, and a
little bit more! Well worth it.

Megaball - Arkanoid clone.

Memspeed - Same as Memspeed2 but an earlier version.

Memspeed2 - Check how fast your Amiga is really going.

Menu Master - Create your own menu systems.

MenuStay - Brilliant programs to make menus stick to the screen.

Messy Sid V3 - Like MessyDos for the PC.

Metrolink - Modules inspired by the Manchester Metrolink train. Not
bad anyway.

Micro Phone Number Locator - Type in the STD code and find out where
it is! Wow, except that you can type in the full telephone number and
the computer will tell you what town it is in!

Mind Games - Games to get the greay cells going. About 30 in all.

Mindguard - Dont ask what this does. I cannot even explain it.
Something about having a hapy day. Best thing is to get a copy of it
and try to explain it to me!

Mis -

MLP Modules - More Octamed Modules of top quality.

MMBCommodity - Found any uses for the middle mouse button, all you
lucky 3 button mouse owners (me)? This is the program for you.

MMExecutor - Just about the same as MMBCommodity.

Modepro -

Money For Nothing - An excellent demo of the Dire Straits song.

Monopoly - Another brilliant conversion of the popular board game.

Monopoly - Another version of the popular board game.

Monopoly - Same as one before but different!!????

Monsters - Platform Game.

Monty Python Anim - Brilliant Anim by a 13 year old of the sketch
"How not to be seen". Very funny indeed. The samples are also
excellent. (2 Disks).

Mortal Kumquat - 2 player ripoff of Mortal Kombat. Very funny to play.

Motorola Invaders (2 disks) - AGA Space Invaders with Metallica
soundtrack.

Move On - Demo of Move On Baby by Cappella.

Movieguide V2.04 (2 Disks) - Lots of facts about 1000`s of films. This
disk is LHA`d.

Mr Men Olympics - Very good choice now that the olympics are on the
TV. Lots of different events where you are one of the Mr Men
competing. You must get this.

MRBackup Pro V2.2.0 - Backup those floppys & more.

MS Claendar - Nice WB Calendar and Memory Monitor.

Multiplex V1.1 - Slide the square around the mixed up picture until
the picture is fixed style game. Also included is a file called
GRID.IFF, which you can load into a paint package. Draw your picture
in the box, and save it as a puzzle.

Music Compilation - Disk like one that is listed above this one!

Music Compilation Disks (S. Graham) - These are disks that I compiled
that are crammed full of the Octamed Modules that I have on file.
Please read the Octamed Modules File on this disk for more
information.

Music Utility Disk 4 - Track rippers etc on this disk.

Musicbase V1.0 - Catalogue your CD collection.

Click me to go back to the Public Domain Menu

1.30   N

N

-

Nester Card Game - Brilliant "Find the pairs" Card Game.

Newicons - Some people do not like this system of icons for WB. The
main magazine CD's seem to, and so do I, which is why I have it.

New Mods - Batman and 2 other Octamed Mods.

New Stealthy Animations - Funny little plane anim. Short but good!

NewTed - Newest version of TED, the Blitz Basic 2 Text Editor.

NFA Pd Pak #5 - Music Rippers, card games, loads and loads on this
disk.

Nine Fingers (2 Disks) - More of the same.

No Limits - Mod of the 2 Unlimited song! No lyrics!

Noisome - Want some funny noises every time you do something. You got

it!

Not The Nine O'Clock News (2 Disks) - Audio sample of the Gorrilla

sketch.

Notebook - Notes for your Amiga. Very advanced. Have up to 5 different

notebooks open.

Now Music 15 - Lots of good Modules on this disk.

NT Modules 2 - A selection of about 15 NT modules.

NTSC Mode - Change your screen to NTSC mode. Warning: Some TV's cannot

display NTSC modes, and your computer display will crash. Luckily my

TV can display it!

Numtris - Tetris with numbers. This game is so addictive! Time

limited. Do what I did and send away for the full version. It is

worth it.

Click me to go back to the Public Domain Menu

1.31 O

O

-

Octamed Modules 1 - Some quite good mods to listen to.

Octamed Samples 1 - Disk full of samples for Octamed, funnily enough!

Octamed Samples 2 - Here we go again.

Octamed Samples 3 - More of the same.

Octamed Samples 4 - Even more of the above.

Octamed Tutor - Mods by ABBA on this disk. Worth it for the Mods

alone.

OJ Simpson (The Trial) - A very well put together disk about OJ

Simpson.

Onform V1.1 - This is a very good AMOS written Invoice and Order Util,

which I have just registered for. Very easy to use, and a good quality

printout. Very professional. I hope that Paul Lathwell, the author of

the program is reading this. Nice one Paul, keep up the good work,

and please do try and answer my letter. All of my other Penpals would

maybe like to try your programs.

Oracle - Nothing to do with the ITV teletext service (is it still

called Oracle?). This is all about horse racing statistics. Does not

really pull my chain, but someone out there must have a use for it.

If any money is won through use of this util, then I want a cut!

Ooze - Another othello style game.

Ozone "Swamp Thing" - Music Demo of the popular chart hit.

1.32   P

P

-

Pal Mode - Change your screen to PAL mode (Use with NTSC Mode).

Pal / NTSC Swapper - Change from PAL to NTSC and back again.

Parnet (2 Disks) - Gonna get myself connected!

Parnet Instructions - Disk to tell you how to get yourself connected!

Password - Make sure that the younger brothers and sisters in your
house cannot load in all those naked pictures of Pamela Anderson that
you have stashed away in your Hard Drive.

PC Task V3.10 - Convert your Amiga into a PC. A very slow PC at that.

PC Tools - As it says. Converts into a PC Dos tool.

PD Games Compilation (Stephen Graham) - At present there are 11 disks
that I have compiled that are stuffed to the limit with all of the PD
Games that I had on my Hard Drive before I had to clear it out due to
a lack of space. A full list of all of the contents of the disks can
be loaded from the Contents.

Pendle Europa Music Modules - Well presented disk of tunes.

Pengo - Get this! It cannot be explained. It is very very good.

Personal Paint Icons - This is an Arexx script which allows you to
edit icon files using Personal Paint V6.3 and above. Excellent!

Petrol Engine - First in a long line of excellent engine animations.

Pezzas Games - 3 Excellent Games. 2 card ones and something else.

Phantom - Brill Space Invaders Game.

Phone Locator - This is a brilliant program. Not only does it tell
you the area that the STD code covers, but type in the full phone
number, and it will also tell you the area of the STD code that the
number comes from. Useful if one STD code covers many towns, like
most of them!

Phone & Post Codes - Finds all UK STD code AND Town Post Codes!

Pick - Very good program. Reads a random line from an ASCII Text File.
Wow, say you, what good is that? Quite good, if you can then program

the computer to act on that line. Let's say that the text file has a list of pictures. Pick will select one of these pictures. With a little AmigaDOS knowledge, you can then assign that picture to a string variable, which you can then instruct a picture viewer like PPShow, to display. If all this was put in the startup sequence, you could have a random Startup Screen every time you booted up!

Pick Out - Meant to be a good card game but it does not load on my computer easily!

Picture Menu - Yet another WB program launcher.

Picture Puzzle - Select a picture. Select a tune. Select the number of boxes. The picture is split up into boxes, and it is jumbled up. You swap the boxes about until you end up back where you started. Good Fun.

Piles 'O' Tiles - EXCELLENT match the pairs game. It's level pegging with Dragon Tiles, except it may nudge ahead as it has more levels (Full version has 42 levels).

Please Release Me - Brilliant anim of country song. Very Funny!

Plot - Not unlike Polyfit.

Point Of Sale - Fantastic Demo, but all the text is written in Francais.

Polyfit - Draws funny graphs with lines etc.

Pop Quiz - Hey, pop pickers, what do you know about music?

Poster Print - Wow! Speaks for itself.

Powercalc - Very powerful calculator (hence the name?). Handy for all you maths people out there.

Powerlogo V1.3 - Amiga Version of the LOGO Language. If you studied Computing at school, like me, then you would have been taught LOGO, which is the language that controls all the funny turtles and pen plotters you see on TV, on Blue Peter etc.

Print A Card - Make your own Birthday cards etc.

Printmaster - Do fancy things with your printer.

Pro Bingo - AMOS written Bingo Game, Quite good.

Pro Zodiac 2000 - Astrology for your Amiga.

Pub Darts - Brilliant On the oche style game.

Pyrogenic Short Modules - About 20 Mods of good quality on this disk.

Click me to go back to the Public Domain Menu

1.33 Q

Q

-

Quackbusted 2 - Another Techno demo and not a game about killing ducks!

Quickgrab - Make those screengrabs now!

Quick Lha - Brilliant Lha file handler.

Quingo 2 - AMOS written quiz game. Very good.

Quizbase - Design your own quiz questions, and also use the quiz program on the disk to play it, funnily enough.

Quiz Challenge - Quiz, although not as good as Quingo II.

Click me to go back to the Public Domain Menu

1.34 R

R

-

Rainboot - Startup util which plays anims, loads screens, whatever. I use it, and there are plenty of Rainboot configs available through the Aminet (or from me. If you ask nicely enough, I might be able to get the latest ones off the 'Net).

Rainboot PCom - One of the Rainboot programs.

Rave - Rave tunes (Funnily enough) for you to listen to.

Real Drag -

Real Time - Monitor what your Amiga is doing.

Red Dwarf Demo (2 disks) - Digitised version of short sketch (White Hole!)

Red Dwarf Slideshow (2 disks) - piccys of your favourite characters!

Red Dwarf Trivia Quiz - Test your knowledge on RD. Couch Potatoes Only!

Red Dwarf Trivia Quiz Update 2 - Must not be used with above Quiz disk.

Relokick 1.3 - Turn your A600 & A1200 into a A500! A must for older stuff!

Remdate v2.2 - BRILLIANT Diary. I am just about to register for this program. It is very, very, very good. I suggest you use it with a battery backed clock, as it saves a lot of time. I used it before I got mine with my memory board, and it just is not as good. This

program is very slick, and has loads, and I mean loads, of features.

A Must Get! (Footnote - Do what I have just done, and register for

this most excellent program. It really is worth it in the long run!).

Remind 1.5 - Some of those yellow Post it notes for your WB screen.

Reorg - This is another one for the Must Have list. When you save

files on a fresh disk, everything is saved OK, but lets say that you

delete a file from a disk, and replace it with a bigger or smaller

file. The files saved from now on will be fragmented all over the

disk, which means the disk takes longer to load and use. Reorg takes

all the files, and recopies them onto the disk, in the right order,

without deleting any of them, and puts all the empty blocks at the end

of the disk. Brilliant or what?

Reqtools - Newish version of the Req files.

Revenge Of The Blob (2 Disks) - This is a very well put together

animation of the Calvin & Hobbes characters where the tapioca pudding

fights back!

Reversi 2 - Othello with a different name.

Road To Hell - Pretty boring driving game.

Robs Rockers 2 - More NT and Octamed modules.

Rocketz - Gravity Force style game with rendered graphics.

Roobarb & Custard Remix - Yep! You guessed it! Another excellent mod.

Roswell - Everything you wanted to know about the little green men's

favourite holiday camp. Also has a spooky music module.

Roulette - Lose your money now, and place your bets!

Rush Hour - Control all those traffic jams on your city, by switching

the traffic lights at the junctions. Mad fun!

Click me to go back to the Public Domain Menu

1.35   S

S

-

Santa And Rudolph - Brilliant Xmas game. You are either Santa or

Rudolph, and you have to shoot ducks with a gun, while collecting

presents, and floating on a balloon. Sounds crap but it isn't.

Savings Certificate Advert Anim - Remember the advert about the

butterfly and the frog? Well now you can watch it on your Amiga. I

found it was best to boot this disk, and not load it via Workbench,

as it sometimes crashed.

Scorched Tanks - Very Very Very GOOD Tank Hunter game. Nuke your

enemy.

SCP -

Scrabble - Different version of one shown above.

Scrabble - Popular board game converted to the Amiga.

Screenmenu - Launch all those programs. Use this myself, and it is

great.

Serious Backgammon - Time limited version of a fantastic game.

Sermouse - Program to convert IBM Serial Mice to work on Amiga`s.

Sexy Women #1 - I wonder what these are pictures of?

Shortmodules 2 - About 20 Mods on this disk. Some good, some not so

good.

Showicon - Wow, let me think, what foes this one do?

Show STD - No, not something you would use at your local clinic, but

something to display the phone codes for a given town.

Sickness Simulator - Very daft samples of people throwing up! Sick!

Simpsons Icons - Loads of full colour icons of your favourite

Springfield family.

Skizzo 2 (4 Disks) - More of the spinny vector demos.

Sky Decoder - Diagram telling you how to make a decoder card. For use

with boffins only!

Sleepness Night 3 Utils - Disk full to brim with some brill utils.

Slicer - Make big files not so big. How? By slicing them up into

lots of littel files.

Slide Show AGA - AGA piccys of swimsuited girlies!

SmallCalc - Calculator which only adds small numbers. No, it is quite

small on the screen. No, wait a minute, it does not take up much

memory. Yes, that's it!

Smart Trash - Do you want to chuck it out, or will you keep it at the

last minute? This is the program for you. Controls the WasteBasket.

Smovie - Video Titling Program.

Sonic Drum Kit- Brilliant util for making drum loops for use in

Octamed etc, or for just having a bash around.

Sonix Jukebox #3 - Tunes done on Sonix for your listening pleasure. I

was wondering why they picked the title for the disk that they did!

By the way, it is presented in a jukebox style fashion and it is the

third in the series of these disks! Wow. Amazing or what?

SoundBox -

Sound Collection 20 - Smus songs to listen to.

Sound Collection 21 - More smus songs to listen to.

Soundtracker - The Tracker making program to beat all others.

Speak Easy - Make your requesters talk! Requires narrartor.device etc from WB2.04.

Spectrum Emulator (2 disks) - Turn your Amiga into a Speccy. Sad!

Speed! Demo - Demo of 3D Maze game, limited but fun for a short time!

Spelltris - Mad Tetris game. Instead of making lines with the blocks, you make words.

Splitter - Split large files into not so large files.

Springtime - Brilliant. I deleted this of my Hard Drive my mistake, so I ordered another copy from Amicom (Brilliant Pd Company - see advert in main guide!). Move around a 3D floor and put the spring onto the X. Simple, you may think. NOT!!!

Star Trek Rave Demo - Only for Trekkies! Pretty sad really!

Star Trek Themes (2 Disks) - A must for trekkies. Demo with the title music for the original Star Trek and the title for The Next Generation. Brilliant Sound Quality.

Star Wars Artwork - Brilliant Ray Traced Images from Starwars plus a few more, ie JCB, cars etc. Very good quality.

StartupKey - Enables the user to have a choice of Startup Sequences.

States Of Europe V1.0 - Info about European countries. Hyperbook format. Very well done.

STD - Type in Phone Code, find out where it is. Type in a town instead of the code, and you will get the code.

Stealthy 2 - Animation of your favourite plane!

Steam Engine - Even more anims!

Stereopticon - Make Magic Eye Pictures.

Sterling Engine - More great animations!

Stick It 2 - Leave Post It notes all over your WB screen.

Stock Controller Pro V1.2 - Stock control program which is ideal for a small business. Unfortunately, I cannot get it to run properly. It looks brilliant as well, and possibly does not run on an A1200 without crashing. It will load OK and then crash. I will investigate further.

Stonecracker - Make files much smaller. Quite good, and better than Powerpacker, but not Lha in my estimation, which must be worth a bit.

Suicide Machine - Absolutely BRILLIANT shoot `em up using the mouse!

Suicide Machine - Funny Op Wolf game. NOT for members of RSPCA etc.

Superballz - A brilliant Marble Madness style game, where you guide

your ball to the exit, clicking switches, avoiding spikes etc, along the way. Written in Blitz Basic, and it is brilliant. Also comes with full source code, and IFF Graphic files, which you can change, although, this really is not needed, as there is also a Level Editor.

Super Cars, Bikes & Planes - More excellent piccys of transport.

SuperDisk - Make disks up to 960K, just like the ones that AUI used to use, before they decided not to publish a magazine any more. Oh, how I shall miss them so!

Super Duper - Brilliant disk copier program. Takes up no room at all.

Super Formatter - Format those disks in the blink of an eye.

Super Obliteration - PANG style game.

Super Skoda Challenge - What can I say? Skoda`s racing! HA HA HA HA!!!!

Super Speel, sorry Spell - Nerev hiv ann xcuse fir spealing mistooks!

SuperDuper31 - Disk copier.

Swapmode+ - Change your screens from PAL to NTSC. Very handy if you are running a high res interlace screen on a TV, like me. There are a few problems with some programs crashing with it, Personal Paint being one of them, but none the less, it is a great program.

Swazinfo - make nice requesters, with not the usual boring text.

Swimsuit Cardset - Lots of girls in swimsuits for Klondike 3 AGA.

Sysinfo - The original and best System Checker. Make sure that you have all your memory boards installed correctly etc.

System Test V9.1 - Check out your Amiga now, Looks at all system areas.

Click me to go back to the Public Domain Menu

1.36   T

T

-

T2 Dance Remix - T2 song is meant to be good. Still trying to get the disk to work!

Tango Advert - Brilliant tune and sample of the advert where the big orange bloke kisses the Tango drinker. The tune on the disk can be loaded into Octamed as well. All the pictures can also be loaded into Personal Paint etc.

Tank Attack - Blow up your opponents tank.

Tank Attack - Hit your opponents tank with your missle. Brilliant

Tankhunter Game - More missle blasting fun.

Taskbar - Launch all your programs etc in this Windows like program.

Techno Tracks 2 - Music Demo full of techno tunes and flashing lights.

Teeny Weenys - Another platform game.

Teletext V1.20 - Hardware project to let you read Teletext pages on
your Amiga. Also included is a program to decipher the TV signals and
convert them into teletext pages. You are able to save the pages as
IFF files.

Tetren - Written by Andy Whiteley, the man who brought you the
excellent Remdate V2.2, which I registered for, and I suggest that
you do the same. Because I registered for the programme, he gave me a
complimentary copy of his excellent game, Tetren, which is a most
excellent Tetris clone. This, I think is the full version of the
game. I have written to him, asking if there is a demo version,
because you horrible lot do not deserve a full game for something you
have not paid for, do you? Only joking, I wrote to him to
congratulate him on writting such a brilliant game!

Tetris Pro - Brillinat graphics in this Tetris clone.

Text Unlimited - Lots and lots of jokes on this disk. Worth a read.

Textview - The text viewer I used to show this guide until I
converted it to run totally on Amigaguide.

The Chips Are Up - The second in the Mr Potato Head series of
Animations, where Mr Potato Head jumps into a barrel of water.

The Definitive Jarre Show - Brill pics and tunes from J M Jarre. Kick
1.3.

The Far Side - Some cartoon clips from Gary Larson`s "The Far Side".

The Flintstones - 18 and over demo of Fred and Wilma and an Elephant!

The Lamer Game - Hit all the lamers as they appear out the holes.

The Mad Preacher - 4 Modules of Excellent quality on this disk.

The Prodigy (No Good) - Another Prodigy chart hit.

The Rainbow Puzzle - Does not boot but works from WB. Puzzle game.

The Run! - Eric Schwartz Anim of short car chase. Brilliant!

The Secret Key - Primarily most useful for modem users, this produces
a unique keyfile for an ASCII text, and encrypts it, so that it can
be sent securely.

The Wave - Makes lovely rippled screens, and saves them as IFF.

The ZX File # 1 - A disk magazine for ZX Spectrum Users, like me, and
people who use a ZX Spectrum emulator on their Amiga, also like me.
Also has the program MC Master on the disk, which prints out covers

for audio cassette boxes. Why it is on there, I do not know.

Think A Mania - Find the pairs game.

Thunderbirds Are Gone (2 Disks) - Daft Thunderbirds Animation.

TMD - Brilliant Memory monitor with clock etc. Takes up no room on

the screen worth arguing about.

Toobz - Pipe mania type game.

Top Gun Slides - Digitised Pics with sound samples from film.

Total Irrelevance 1 - Official OctaMED User Magazine. Good tunes.

Total Irrelevance 2 - Issue 2 of OctaMED Users Magazine.

Total Irrelevance 3 - I`ll let you guess what this is!

Transport Clipart - Lots of pictures here. Compiled by Amicom PD.

TRAX - Game Level Designer which I do not like to use.

Tribal Dance - Octamed module of 2 Untalented, sorry Unlimited, song!

Turbo Backup V1.00 - Disk copier, although not as good as XCOPYPRO.

Typewriter - Simple word processor, type something and it`s sent to

your printer line by line.

Typing Tutor - Let your fingers do the learning.

Click me to go back to the Public Domain Menu

1.37   U

U

-

UK Codebook - Its those phone numbers again. Find out what code does

which area.

Ultimate Cheats - Disk full of your favourite games cheats.

Ultimate Disk Creator - Fancy making a bootable disk with demos etc?

Well you can now, and do a lot more besides. You are advised to make

a copy of this disk, and use the copy to run the program, as the

programs need the disk to be write enabled. I also advise that you

have a blank disk ready, so you can create a demo on this disk.

Urouhack - Window enhancement program.

Utah Saints - An excellent Octamed module of What Can You Do For Me?

Click me to go back to the Public Domain Menu

1.38   V

V

-

V12's Guide To Setting Up A PD Company - How to set up a PD Library.

V12 PD's Catdisk Modules 1-6 - Some of the best modules V12 have used.

Venus Cardset - Nice girls on this Klondike 3 AGA cardset.

Video Workshop - Help in making all those video productions.

View - Look at IFF`s with ease.

Virtual Dreams - A brilliant Graphics Demo with some great new

effects.

Virus Z II - Version 1.39 of the brilliant Virus checker which has

never let me down, to my knowledge.

VR World - Use the mouse to fly or walk in different VR Worlds.

Brilliant!

VolumeWatch - Tells you how full your Disks etc are. Very accurate.

Click me to go back to the Public Domain Menu

1.39   W

W

-

Warbook - Everything you wanted to know about the 2nd World War, and a

bit less besides.

WB 3 Screens - Some more nice backdrops to use on WB3.

WB2 Hacks - Lots of WB Screen toys.

WBFlash - Make your WB windows funky by allowing them to change

colours all by themselves.

WB Pairs - Another match the pairs game. Not bad, but not great.

WBSteroids - Another great Asteroids clone, which is only let down by

the fact that it slows down greatly as more and more asteroids are on

the screen. Keep the screen clutter free, and you will gave a great

time.

Wallace & Gromit Cardset - Cardset for use with Klondike 3 AGA.

Wheel Of Fortune - Slick copy of popular TV programme.

Whigfield Saturday Night - Crap song that has been converted to Amiga.

Wicked Sensation (2 Disks) - See above.

Wind It Up - Excellent Prodigy song demo, if you like that sort of

thing!

Windy Bottom - The antics of your favourite Weatherman, Mr W. Bottom.

Win 95 - Another WB Program launcher, styled on that hated program for

the PeeCee, Windows 95.

Winspeed - Make your windows etc open much faster.

Word Power - Demo version of the dictionary on a disk.

Words - Type in a word and this will find how many words it can make

from it. Also, type in an angram and it will make words from it.

Wordworth Calendar - An Arexx script which will print out a calendar

for any given month. Use in V5 and above.

Wordworth Fonts 1 - Disk full of WW fonts (obviously!).

Wordworth Fonts 2 - More of above.

Wordworth Fonts 3 - Wonder what these are?

Wordworth Fonts 4 - More of the same.

Wordworth Fonts 5 - Hey, what is this?

Wormtris - This is a game I WILL be registering for! It is a cross

between Tetris and Worms. Some of the blocks are exploding sheep or

worms or lasers, and the game has many extras, and is totally MAD!!!

WW2 History Book - Hyperbook Document all about WW2.

Click me to go back to the Public Domain Menu

1.40   X

X

-

X Files Guide - A very informative set of Amigaguides about the TV

Prog.

Xmas Anim - A very complicated but simple Anim of Santa's Grotto. This

disk must be used in DF0:.

XOpa - Test your Amiga to the limit with this program. Brilliant.

1.43   The Octamed Modules List In Full!

Songs That I Have On My Hard Drive

----- ---- - ---- -- -- ---- -----

Below is a list of songs that I have stored on my Hard Drive. It is
not all of them, as some of them are not very good and do not merit
the disk space. Here is the list of the modules, but remember, to
save space, I have Powerpacked the songs, so if you are using them
unpacked, they will take up a lot more space:
I must take the time to thank Alan Hennebery, a penpal I swap disks
with, who lives in Eire. He has just supplied me with about 50 odd
Octamed Modules, that I can add to my collection. I will now have to
add a few volumes to my Music Collection Disks. Thanks a lot Alan,
all the LHA archives extracted OK.

1.73   Music Compilation Disks

Music Compilation Disks

----- ---------- -----

For ease of use, and to save space on my Hard Drive, I have compiled
some disks that contain most of my Octamed Modules, with only a few
exceptions. Most of the files are converted to MED & OctaMED files,
and use SFCD Compression, as combining these two can cut the size of
the files quite drastically. Most of them are sorted into different
catagories, as they are on my Hard Drive, although most of the
catagories have to be split up into different disks, as they are so
big. Because of this, I think that only Octamed 5 can load these
files. I don't think they load into Soundtracker or Noiseplayer. If
you want a particular song in these formats, tell me and I will do
it, but remember to supply the disk as usual.
There are at present 27 Disks in the series. I will list the contents
of each disk below:

1.74 Musical Instruments & Samples Disks

Musical Instuments & Samples Disks

------- ---------- - ------- -----

I also have a 16 disk set, which contains loads and loads of drum

beats, instruments, samples, sampled speech etc. Also included is

some Speech samples from Games, ie Worms, Mean Arenas, Valhalla etc.

Also included is 2 disks of Workbemch Backdrops as a bonus, because

they were archived onto the same disks. What lucky people you are. If

you are interested, then send me the disks, and I will copy them. I

am not really wanting to copy only a few of the disks, as it is a bit

of a pain, and due to the sheer volume of files on them, I am not

going to list them all here. If you really want only some of them,

then I may be twisted in the right direction, if the bribe is great.

Click me to go back to the Music Menu

1.75 My Favorite Public Domain Disks

My Favourite Disks In My Collection

-- --------- ----- -- -- ----------

Here is a selection of the disks in my collection which are my

favourites. In it are demos, games, utilities, you name it!

Army Miner - A brilliant MineSweeper clone. You have a grid of

squares and you click on the grid, working out where the mines are.

Big Time Sensuality - AGA demo with a Bjork soundtrack. The graphics,

as is the sound, are brilliant. Please note that it is AGA only and has 2 disks.

Card Games Deluxe - Do you not have enough memory to run Klondike (Like me!)? Do you want to be able to play Videopoker as well? Do you want to use the Klondike cards as cardbacks? YES! Well, get this. I advise that you install it to your Hard Drive, as it speeds things up. You can also play MED modules in the background. Octamed 5 can save modules in MED format, so any song will do. (3 disks).

Deluxe Galaga - This has got to be the best Space Invaders game around. Written by Edgar Vidal (the same man who wrote Deluxe Pacman), the graphics are excellent and the game is so addictive. I have played it to death, but I still have not send away the shareware fee (ooeerr!!). I have both the ECS and AGA versions of the game.

Deluxe Pacman - Same Guy, same great game. Brilliant conversion of Pacman, with loads of levels, and ghosts, and power ups etc.

Dialling Codes - Stuck for an STD Code. Do you know the town but not the code. This will help you. Type in any town (or code) in Britain, and this program will give you the answer. Sorry Alan, but I don't think that this program covers Eire. Belfast is in it, but Dublin is not.

Doubleclick Disk Magazines - As a contributor to these magazines, I feel that this is a bit biased, but they really are brill. Loads of stuff in them, and they are on a par with the legendary Grapevine series. I will of course have the latest version of the magazine.

Fast Intro Maker - Make jazzy intros and bootblock intros with this great program. I have sent away for the full version to Deutchland, but I have not had a reply back yet.

GuiArc - Expand and dearchive all those programs on your magazine disks. Brilliant program. I have used it for ages. Worth it's weight in gold, about 57p as a disk does not weigh all that much!

Grapevine Mags - These are BRILLIANT!!!!!! I have every issue from 15 onwards and I have a few early ones as well. Very funny and very well put together. I wish they would come back.

Jesus On E's - Excellent Rave Demo. All the others try to copy this one! Takes seconds to load, but about 30 minutes to play. The bad thing is that it is not HD installable and you must have and external drive to use it. Get one if you don't have one as you do not know what you are missing. (2 Disks).

Kefrens Desert Dream - Dazzling Demo from Kefrens. Set in Cairo,

Egypt in 1993, is has a story at the start and lots and lots of great effects by the end. 2 disks to this one, but you can put the second disk in df0: when asked, but it spoils the demo if you have to be asked.

Kick 1.3 - A MUST GET!! You need to get this to be able to turn WB2.04 and upwards machines into a WB1,3 machine. Excellent program.

Motorola Invaders - AGA Space Invaders with a Metallica soundtrack! Very good graphics and sound. (2 Disks).

Numtris - Tetris with numbers. I registered for this game, as it is so good. Unfortunately, I would be breaking the law if I gave you the full version, so I won't! You have blocks with numbers on them which fall into the pit. Add up the colums in the pit to the number printed on the bottom, without going over that number, and the colum disappears. On the left of the screen is the tiles left counter. When it reaches zero, you have completed the level. It starts at 200. On the demo version, the game ends when the counter reaches 100, but it still is a hard game, especially on the later levels.

OJ Simpson (The Traial) - Lots of info about OJ. Text, pictures, sound samples - you name it. Very well put together.

Please Release Me - My favourite animation at the moment. For all you country music lovers, the song sung by a ballon. Very funny.

Quick LHA - I use this program every day, for packing and unpacking LHA archives, easily, and most importantly, quickly. Also handles LZX etc.

Remdate - This is a serious bit of kit. It is a Diary and Planner for your Amiga. I would recommend that you have a battery backed clock, a hard drive, and maybe some extra memory. A lot to ask, but it is worth it. You can input Birthdays, Special Days, Holidays, use like a simple diary to say what you did. It also has a things to do list, can print calendars, pick lottery your lottery numbers, absolutely anything! This is why I had to register for this program. It is well worth the slightly more than usual registration fee of ten pounds, but in my view, it is money well spent.

Serious Backgammon - Another game I will be registering. Time Limit version (5 Minutes) of the popular board game. Graphics etc. are brilliant. Tetris Pro - I am a Tetris Pro Pro! This game is excellent!! As you finish the lines, a picture is revealed. Show all the picture and the level is complete. Some of the pictures are worth playing for!

The Flintstones - Over 18's Demo about your favourite stoneage family.

Wheel Of Fortune - Great conversion of the TV Game. Edit the Questions

file on your favourite text editor to include your own entries.

Wormtris - This is a totally excellent Tetris game, of which I have

many, but I like this one as one of the best. Cross between Tetris

and Worms, which doesn't bear thinking about. Very daft and great fun.

X Files Guide - Lots and Lots of info about my favourite SciFi

programme. Also includes colour slides of Scully & Mulder.

There you have it. Drop me a line if you want some of these disks,

and I will send them out - remember of course to send me the disks!

Also, keep checking the PD file for new editions. I am sorry, but the

file has been sorted into alphabetical order. Before, new editions

were at the bottom of the file, but I found it to hard to read, so it

is now sorted.

Click me to go back to the Main Menu

Click me to find out my new software titles

1.76   Public Domain Titles I Am Waiting On

This is a list of PD disks I am waiting on. I have not given an

explanation of each disk - just it`s title. I probably will have these

disks by the time you read this, though! It is in no real order as

this list is only temporary and will only last about 1 issue. If this

page is blank, then all my new PD will be in the list, and I have no

outstanding orders that I am waiting on.

Click me to go back to the Main Menu

1.77   New Public Domain Titles In This Month

This is a list of new PD disks I have just got. I have not given an

explanation of each disk - just it`s title. An explanation of each

disk will be in the main PD list document.

I already have had most of these titles for a long time now, but they

were on loads of archive disks that I have had, and I had not got

around to putting them onto the guide. I have now, and I am not even

half way through it - What you see below will fill about 6 disks,

only about another 30 to go!

1.78   Advert For The Best PD Library In The Whole Wide World

A quick note from me:

I have bought the majority of my Disks from these guys for ages now

and they are brill. I sent them a package on a Wednesday of about 30

disks, and I got it back on the Saturday. Not bad considering there

was a 24 hour postal strike on the Thursday/Friday. They always have

a new stream of disks arriving and are very friendly and always

willing to help (Do I get my money now?). Long Live Amicom.

Please note that Amicom PD have now moved. Note their new address

below:

Send you another package very soon.

W E L C O M E

Hi and welcome to our Monthly updated CATALOGUE DISK packed

with loads and loads of quality Amiga PD & Shareware titles

for you and your Amiga to enjoy.

If you don't see the Title that you want, give us a call on

(01924-864798) we may be able to get it for you.

Well hope you do find something of interest and remember we

also add loads more new titles every week. So keep in touch.

H I N T S ' N ' T I P S O N P D

When you purchase any of our Titles you may be a bit eager

to check them out. Well that's fine most of the Titles will

bootup when inserted in your disk drive, but many will need

either your WorkBench disk or a particular program to use

the Title you purchased.

So please take time and read any document's you come across

and don't get angry if you find that it don't seem to work.

You may just be doing something wrong and by reading the

documents and following the instructions you will so get to

use the Title you just purchased.

H O W T O O R D E R

PLEASE TAKE NOTE

Minimum accepted Cheques and Postal Orders is £3.00. Sorry.

Orders of any less please send in Postage Stamp value ok.

Write down the DISK NUMBERS, TITLES and the AMOUNT of Disks.

At the side of the TITLES you will see if the disk is more

than 1 disk e.g. (A,B) at the end of a TITLE means it is a

2 disk set, (A,B,C) means 3 disk set and so on. Also at the

very end of the TITLE line you will notice in brackets e.g.

(Wb1,2,3) this tells you which type of SYSTEM the TITLE may

work on.

(WE CANNOT GUARANTEE IF TITLES WILL WORK ON YOUR SYSTEM)

There are too many systems to check them all correctly.

H O W T O P A Y

Please do NOT send any cash as it MAY go MISSING.

Payment is accepted by Cheque or Postal Orders ONLY.

(Minimum accepted Cheque / Postal Order value £3.00)

We don't have credit card facilities as yet.

Make all Cheques / PO`s payable to A M I C O M

==========

Send To:- A M I C O M

D I S C L A I M E R

To the best of our knowledge we checked Titles/materials in

our library are freely redistributable. However we cannot

guarantee the distribution status of any Title/material or

assume any liability for any such Title/material in our

library.

A M I C O M shall NOT be liable for damages,lost profits or

any losses including incidental or consequental arising

from use of or inability to use the software on any of our

disks.

A M I C O M do NOT sell the software which we distribute,

only the disks, labels, copy service and distribution costs.

A M I C O M reserve the right to delete or replace any disks

within our library at our discretion. Faulty or unfit to

distribute disks also apply. Refunds of purchase price or a

replacement disk will be given also at our discretion.

A M I C O M must be notified within 30 days of receipt about

faulty disks which we will refund or replace at our

discretion.

A M I C O M makes no other warranties or guarantees conce-

rning any of our disks or the contents within them.

L A S T N O T E S

If you find any of our disks are faulty PLEASE don't get

too angry just send them back telling us of the problem and

we will either send you another copy or another disk of

your choice. (Or your money back if you feel that way).

PLEASE make sure you check that the disk you bought was

compatible with your machine. Our compatibility checks dont

mean to say that they WILL work on your kind of System...

THERE ARE TOO MANY SYSTEMS TO CHECK CORRECTLY...

REMEMBER THIS we are always here to help YOU...

Thats all...

1.79   A list Of Games Compilation Disks I Have Made

Below is listed some of the Public Domain Games that I have put onto
disks, to remove them from my Hard Drive. All the disks do not have a
startup-sequence and do not boot, so you will have to load Workbench
first to use them.

Disk 1

---- -

Hydrozone - Fly down a tunnel avoiding the walls with your ship,
shooting all the aliens at the end of the levels.

Infection - An othello style game, where you have to occupy most of
the squares at the end of the game to win.

4 Wins - Connect 4 for your Workbench. Written in German, but easy to
undersatnd what the programmer wants you to do.

Army Miner - Minesweeper on the Apple Mac has finally been converted
to the Amiga. Pretty good conversion too!

Insectoids 2 - Horizontal Space Invaders written in Blitz Basic 2. The
graphics are pretty good.

Disk 2

---- -

Think A Mania - Find the pairs in this very well put together game
with brilliant graphics and sound. There is even a high score table
too.

Toobz - Cannot remeber what this game is, but it must be pretty good
or I would not have bought it, or even put it on my Hard Drive.

Tetris Pro - This is one brilliant Tetris Game. Graphics and Sound are
unbelivable. Take it from a self confessed Tetris Addict.

Amigatration - Another find the pairs game. Not nearly in the same
league as Think A Mania, but good all the same.

Disk 3

---- -

Deluxe Pacman AGA - Brilliant Pacman Clone from Edgar Vidal, the man

who also wrote the legendary Deluxe Galaga, which I also have.

Tank Attack - Two tanks, some hills, some wind, lots of missles, and
lots of fun.

Disk 4

---- -

Mastermind - Try to guess the sequence of the computer`s balls!
(OOEERR!)

Caffine Free - Another space invaders game, but not bad at that.

Super Obliteration - Pang style shoot em up game with swish graphics.

Mortal Kumbquat - Mortal Kombat ripoff of two pieces of fruit
fighting!

Disk 5

---- -

Quingo - A pretty good Quiz game with loads and loads of questions on
loads and loads of subjects.

Disk 6

---- -

Pub Darts - Brilliant graphics and sampled speech on this great Darts
game.

Monopoly - First of two versions of the popular board game I have.

Disk 7

---- -

Monopoly - Second version of the popular board game.

Megatron - Snakes style game with good graphics.

Disk 8

---- -

Pengo - This is a brilliant platform game, with cute graphics and even
cuter (is that a word?) gameplay.

Disk 9

---- -

Ooze - Othello style game. Not bad.

Disk 10

---- --

Masterblaster - Blitz Bombers, but not as good, but still brilliant.
The graphics are A1, as is everything else, but A1200 users will have
to disable CPU caches and use the Original Chip Set to play the game.

Disk 11

---- --

Hexamines - Mine Sweeper but played on a hexagonal board. This game

needs a screen that is at least 400 lines deep, so you will have to

convert to a High Res to play it. I still have not done so, so I

cannot tell you how good the game is to play.

Dieser Zug - This game is brilliant! I was so nice and though the

game was so good, I even included it on the very disk you are using

at this very moment. To play it now, return to the Contents page, and

click on the box at the bottom. It is very addictive. If you get a

score on the highscore, send me the disk back, and I will merge it

with the other scores from other people. I will then return the disk

with the newest version of the guide on it. Please enclose 2 first

class stamps to cover postage, though.

Speed! Demo - Demo of the running-through-a-maze-as-fast-as-you-can

game. With the Excellent Module "Stardust Memories".

Click me to go back to the Main Menu

1.80   A list Of Utilities Compilation Disks I Have Made

This is a list of most of the Utilities that I have. What I did was

Lha the files, and cram as many as I could onto disks. This meant

that where before I had two disk boxes of utils, by using Lha

compression, I now only have one, which means I have saved about 40

disks, which I can use to get more PD. These disks do not have any

startup sequence, just Lha files. If you cannot decompress Lha files,

I can supply the Lha command and how to use it easily (Lha x <name of

archive> RAM:), or I could give you some utilities to do it for you.

This is only a list of what is on the disks. To see what they all do,

refer to the guide.

1.81   A collection of the Clipart I have

Below is listed some of the clipart disks I have in my collection.

What I have done is bought loads of Clipart over the years, saved it

onto my Hard Drive, and sorted it into directories for ease of use.

There is dozens of disks listed and I will just give you the number

of the disk and what is on them roughly, in Subject Headings.

Disk 01 - Aminals

Disk 02 - Animals 2

Disk 03 - Animals 3, Banners

Disk 04 - Banners 2

Disk 05 - Banners 3, Business

Disk 06 - Busines 2, Computers

Disk 07 - Comic Setter, Food, DPaint

Disk 08 - DPaint 2, Misc

Disk 09 - Dpaint 3, Travel

Disk 10 - Sport

Disk 11 - Places, Events

Disk 12 - Events 2

Disk 13 - Buildings, People

Disk 14 - Female

Disk 15 - Male

Disk 16 - Screengrabs (Some are a bit risky. Over 15`s only)

Disk 17 - SG Clipart (Drawings I have made. Some are personal, so this

disk will be censored before it is released.)

Disk 18 - Ham 1 (Some are over 15`s only)

Disk 19 - Ham 2 (Some are over 15`s only)

Disk 20 - Ham 3 (Some are over 15`s only)

Disk 21 - Ham 4 (Some are over 15`s only)

Disk 22 - Ham 5 (Some are over 15`s only)

Just ask me for Clipart Disk number xx, and I wil copy it for you. I

also have some other Clipart disks, which are listed in the Main PD

Guide, ie, Flintstones and Cartoons etc. Just ask for them in the

normal way.

1.82 The Small Ads Section.

Do you have anything that you want to sell? Do you want to advertise

it cheaply, and advertise it to a range of Amiga Owners? Well, this

is the place for you. Just write to me with details of what you want

to sell, and I really don`t mind what you sell, and I will put it in

the next issue. Your advert will stay in for as long as you want, or

until you sell the item, so remember and tell me it is sold. I will

only hold adverts on file for a maximum of 6 isssues. If it is not

sold within 6 months, then it cannot be much of a bargain can it?

There is only one stipulation. Either pay me a few pound for typing

in the advert, or you can give me the advert on disk, either in Ascii

text or an IFF file, but I would prefer the ascii text file. I will

keep the disk as payment. Please can you only send your adverts on a

Double Density Disk. I do not really have a need for High

Density Disks.

The Adverts

--- -------

For Sale - Loads and loads of back issues of various Amiga Magazines,

AUI, CU Amiga, Amiga Shopper, Amiga Format, The One, you name

it I will probably have it. About 200 magazines in total.

Give me 20 quid and I will let you have them. Buyer collects.

If you want them posted, then I will have to charge you enough

to cover the Parcel carrier charges.

Scotland

KA30 8HG

(0468) 508 871

Wanted - Blank Disks are in great need. I prefer Double Density ones as

High Density can be a bit dodgy on the Amiga. Do you want to get

rid of all those old magazine coverdisks that are lying at the

bottom of your drawers? You do? Well give them to me! I can

use them to buy more Public Domain Disks, which will keep my

costs down and allow me to buy much more high quality programs,

which you can swap with me. Either post me the disks if you are

feeling generous, or tell how many you have and how much you want

for them and I will consider your offer. Please make the price

cheap, as I want to keep the PD scene alive. Thanks for your

help. I am willing to swap blank disks for blank disk labels, as

I buy my labels in bulk, so I have loads.

Please contact:- Stephen Graham

1.83 A quick Questionaire for you to fill in

Stephen Graham

PO Box 8353

Largs

North Ayrshire

Scotland

United Kingdom

KA30 8HG

Mobile: (0468) 508 871

A quick Questionaire for you to fill in:

Thanks for loading this section. Please could you take the time to

fill in this questionaire. Select Print from the Project Menu. If you

do not have a printer, do not worry, load the questionaire into your

favourite text editor, and fill in the blanks. Resave the document

and mark on the disk label that you have completed the questionaire.

Please remember to of course, post back the disk. The purpose of this

is so that I can see how many people are reading this disk, and what

you want from it. Please feel free to tell me anything that is wrong,

ie loading times or choice of music etc. All your data will be used

by me and only me, so you do not need to worry that you will receive

any junk mail from the likes of Readers Digest! By filling in this

survey, you will be registering, and I will send you, the newest

versiom of my catalogue disk, every month. Thanks for your help.

Please fill in sections carefully:-

Name: _____

Address: _____

_____

_____

_____

Postcode: _____ E-Mail: _____

Telephone Number: _____

Age: _____ Date Of Birth: _____

Sex: _____

How did you receive this disk: _____

_____

Please list ALL computer equipment, ie Model, Hard Drive, External

Drives, CD-Roms, Memory Boards etc: _____

_____

_____

_____

Do you object to your details being shown in this guide, for other

Amiga users to write to you?: _____

Do you wish your name & address to be passed onto Amicom Public

Domain, for details on how to buy Public Domain Software at

competitive prices?: _____

Are you interested in joining Pentrisoft?: _____

Are you interested in writing articles for Doubleclick!, the

Pentrisoft Amiga disk magazine?: _____

Please list any comments about this disk below. Please write on the

back of the page if necessary.

Thanks,

Stephen Graham

1.84   A List Of All my Public Domain Contacts:

Welcome to the list of Public Domain contacts I have. Below is a list

of names. If you wish to find anything out about the people listed,

then just click on their name. I have a few phone numbers for the

people mentioned, but I WILL NOT GIVE THEM OUT, as I myself am ex-

directory, as is a few of these numbers, and I don't like getting

annoyed by people, so I don't see why other people should be annoyed

as well. If you want to be able to let me phone you, then please do

give me your phone number. I will not give it to anyone.

1.85   Pentrisoft - Promoting Shareware & Its Authors!

Below is a text file from the Pentrisoft Members Pack, which you

receive when you enquire about joining. On it is textfiles about

Pentrisoft, the latest Doubleclick, and some Pentrisoft logos for you

to use.

- What is PentriSoft?

PentriSoft is a non-profitmaking association for computer programmers

whose aim is to help genuine shareware and freeware authors of high

quality programs to succeed in the world market for software.

- What platforms does PentriSoft cover?

In theory, PentriSoft is for programmers on all computers, but at the

moment, we can only support those on the Amiga and Apple Macintosh.

Although the two 'sections' of PentriSoft share the same name, logo

and aims, things are kept fairly separate.

- How did PentriSoft begin?

PentriSoft was the brainwave of my friend Stephane Gray. He is a Mac

programmer, and has since enlisted many other shareware Mac

programmers. I am now trying to do the same thing for the Amiga. See

PentriNews_June, or DoubleClick! for more information.

- How can PentriSoft help programmers?

PentriSoft can offer individual programmers a means by which they can

contribute to the shareware system as well as providing the use of

advertising, beta testing and programming tips from other members.

Soon, we hope to offer some sort of evaluation system, and maybe

later on, a distribution system, where programs are advertised and

distributed `in bulk'. PentriSoft has members with years of

experience in programming on the Amiga and Apple Macintosh, eager to

offer friendly tips and advice to enthusiastic newcomers.

- How do I join?

Simply return the questionnaire/Registration file to me at:

Mark Harman

3 Highlea Close

St. Leonards On Sea

East Sussex

TN37 7SS

I will then send you more details, and maybe put you in contact with other programmers. You will not be charged for anything at any time, but it will speed up replies if you send an SAE.

- What does joining PentriSoft involve?

By joining, you do not sacrifice any of your ownership rights or programmer fees, but you do benefit from a network of friendly fellow programmers, vastly increased distribution, and the right to use a symbol of software quality that can be displayed on program. From time to time, PentriSoft may put other programmers, working in fields in which you have experience, in touch with you so that you can exchange tips and advice about your programs. Please note that we reserve the right to end a programmer's membership at any time (but there'll be no need for that, of course...;)

- Tell me more about the disk-mag `Double-Click'.

Well, the best thing is to see it for yourself. Articles are very welcome!

- I know some other Amiga programmers; how do they join?

Get them to write to me (Mark) at the above address, or better still, give them a copy of this disk and ask them to return a duplicate of the questionnaire (or the registration program if that's what you've got).

- I know some Mac programmers; how do they join?

This is important; do NOT get them to write to me; instead, ask them to write to this address:

Stephane Gray

Oaklands

Rock Lane

Hastings

East Sussex

TN35 4NY

He will send them some more details.

- I know programmers of other platforms; can they join?

Well, no is the simple answer. However, if there was someone of
another platform who wanted to actually set up PentriSoft on another
platform, then write to me, and I'll see what I can do.

- More about us?

Stephane Gray, who originally came up with the idea, controls all
things Mac related. Actually, I think he passed control over to
someone else recently, but I'm not too sure. I (Mark Harman) am in
control of the Amiga related section. I shall also mention Rob
Forster, who isn't a programmer, but kindly beta-tests our programs.
We are all 17/18 years old, studying hard for our A Levels. Who knows
how we find time to do things like this... Both me and Stephane have
released some PD programs, but haven't made vast amounts of money
from programming (yet?).

- What Amiga do I own?

I ought to say, since I'm asking about yours. I own an A1200, with
340MB Hard Drive, which I've recently upgraded to an '030, with 10MB
of RAM. If you're thinking of upgrading, please do, it makes your
life so much better! I also have a 24-pin printer to slowly churn out
the various bits and pieces.

-What programming language do I use?

I use AMOSPro, so I would especially like to hear from other AMOS
users. Don't worry if you aren't, however; PentriSoft is for users of
ALL programming languages. I also know a little C and ARexx.
Stephane, by the way, uses something called `Hypercard'.

- What programs have I written?

A lottery program (Lottery Numbers), a file encryption program
(Protector), and even a biorhythm program (BioCalc), which are in the
public domain. I've written various others, but just haven't released
them yet (I just can't be bothered). And, of course, both versions of
the viewer for DoubleClick!

- What if I drastically upgrade my Amiga, or Get a New One?

The hardware questionnaire is only really for beta testing purposes
(if someone wants to see if a program runs on a particular setup, or
it has higher than average system requirements), so it isn't too
important. Having said that, I'll always be interested to hear,
anyway...

1.92   Here it is - The index of all the documents.....

This is a list of all the main documents in the guide. From these you

will be able to select other documents, like in the main PD list. I

have not listed all the separate letters here, as that would be

pointless, so all you do is load the PD menu, and select your letter

from there.

The List:

The very important disclaimer document

Some very interesting information about Stephen Graham

The Public Domain Software list in its fullest form

Notes on how to contact Stephen Graham, in case you do

Octamed Modules & Music list or something to listen to

About This Disk, the price of butter and the Universe

Games Compilation Disks that I have compiled lately

People I have to thank in no real order whatsoever

Utilities Compilations that I have compiled for you

My best PD Disks at the moment, but this may change

Clipart Disk Compilations that I have kicking about

PD titles I am waiting on and quite impatiently too!

New PD titles this month in case they were delivered

Advert For Amicom PD who deserve to win the lottery

Roll Up, Roll Up - get those items for Sale & Wanted

PD Contacts or even more people to write to except me

Free Game - Dieser Zug which you can also play here

1.93 Alan Hennebery

Name: Alan Hennebery

Address: 7 Westcourt

Caherslee

Tralee

Co. Kerry

Eire

Postcode: No postcodes in Eire

E-Mail: 9620516@ul.ie

Age: 17

Date Of Birth: 07 December 1978

Computer Setup: 2 MB A600

250 Mb hard drive (2½")

Star LC-100 9-pin colour printer

Squirrel SCSI interface

MediaVision 'Reno' CD-ROM (2 speed)

Alan was one of the first penpals I wrote to, and we swap disks

regularly. He has a large collection of CD's to choose from. Has

loads and loads of great software to choose from, but if I gave him

enough disks to copy all the stuff I want, he would have to take out

a bank loan just to cover the postage back to me!

1.94 Andrew Jackson

Name: Andrew Jackson

Address: 7 Nut Tree Close

East Huntspill

Nr. Highbridge

Somerset

Postcode: TA9 3PN

Age: 17

Date Of Birth: 15 February 1980

Computer Setup: 2 MB A1200

External Disk Drive

20 MB Hard Disk (Yes, only 20MB - Don't Laugh!)

SCSI 2 Speed CD Rom

Will be getting a Blizzard 030 50MHz with 8MB RAM

Accelerator Board in November (About time!)

1.95   Andrew Whiteley

Name: Andrew Whiteley

Address: Flat 7

Wyychway House

Bullring

Deddington

Oxfordshire

Postcode: OX15 0TT

E-Mail: Andy@wwhse.demon.co.uk

Age: 27

Date Of Birth:

Computer Setup: A1200 with 10MB RAM

Blizzard 1230/4 Accelerator Board

230 MB Hard Drive

2 External Drives

Zappo CD ROM

Supra 28,800 Fax Modem

Black & White Hand Scanner (for pictures, not hands!)

Andy is the programmer of the excellent diary and planner, Remdate,

which I of course, have registered for, and I suggest you do the

same. He also wrote the game Tetren, which in my opinion, is the best

Tetris style game I have ever seen. It only has 30 levels, which you

may think is hard, but you will find it VERY VERY hard to complete

this game. I have sent a letter to him, asking for the passwords to

the levels. I can only get to level 10, and belive me, it was hard

going. You will have to bribe me very much, as I will be not giving

these passwords out to anyone, you know. This man spent ages writing

this game. The least you can do is play it properly. Note to Andy:-

Is my advertising fee in the post yet!

This man is also GOD! At the start of October, my Hard Drive broke

down and was completely wiped! This man came to my rescue, and

supplied me with a disk which has saved my computer from extinction!

I can only thank this man from the bottom of my heart.

Click me to go back to the Main Menu

1.97   Ahmed H S

Name: Ahmed H S

Address: Has not returned questionnaire, so cannot give out address.

Postcode:

Age:

Date Of Birth:

Computer Setup: A1200

Apollo 1230 Lite + 4MB RAM

450 MB Hard Drive

Ahmed is from Manama in Bahrain, which is a small independant island

in the middle of the Arabian Gulf. He is 15 years old, and has been
using his Amiga for 5 years, like to render 3D graphics, and in the
throws of constructing a BBS and a Web Site, as well as programming a
700 frame animation!

Click me to go back to the Penpals Section

Click me to go back to the Main Menu

1.98 Nikola Tomic

Name: Nikola Tomic

Address: Has not returned questionnaire, so cannot give out address.

Postcode:

Age: 21

Date Of Birth:

Computer Setup: A1200 fitted into a PC Desk Top Box

Blizzard 1230/4 + 8MB Fast RAM

420 MB Hard Drive

MIDI Interface

GVP 8 Bit Stereo Sound Sampler

Nikola is 21, and lives in a small town called Valjevo, which is in
Serbia and is about 95 Km from Belgrade. He, if you had not guessed,
uses his Amiga for making music, and has released 2 PD disks under
his name DJ Nick / D-Tronic. I am awaiting these disks to see what
they are like. He is wanting to write to people so that he can
improve his English, which is not bad, considering that is not many
people who can speak English in his town.

1.106   Mark Harman

Name: Mark Harman

Address: Pentrisoft

3 Highlea Close

St. Leonards On Sea

East Sussex

Postcode: TN37 7SS

Age: 17

Date Of Birth: 26 May 1979

Computer Setup: Amiga A1200 with 8 MB Fast RAM

Blizzard 1230/4 68030 @ 50 Mhz (But no FPU)

340 MB 2.5" IDE Hard Drive

Citizen Swift 200 24 Pin Dot Matrix B & W Printer

Hoping to get a CD ROM soon, possibly the AT Q Drive

Mark is the author of Doubleclick, and also the President of

Pentrisoft, the Amiga Programmers Group of which I am a member. If

you want to find out more then write to either Mark or myself, and we

will post out a disk to you, outlining the basic rules of the Group

and joining etc. You could also look at the main Pentrisoft section

on this disk.

extent that you may distribute this posting and all its associated

parts freely but you may not make a profit from it or include the

posting or parts of it in commercial publications; further

redistributions of this document are only allowed unedited and in its

entirety via anonymous FTP, electronic transmissions, storage media,

or printed copy as long as this notice is included and no monetary

fee is charged; jokes subject to change without notice; jokes are

slightly enlarged to show detail; resemblance to actual persons,

living or dead, is unintentional and coincidental; hand wash only,
drip dry; do not bend, fold, mutilate, or spindle; anchovies or
jalapenos added to jokes upon request; your mileage may vary; no
substitutions allowed; for a limited time only; quantities are limited
while supplies last; this offer is void where prohibited; humor is
provided "as is" without any warranties expressed or implied; user
assumes full liabilities; not liable for damages due to use or
misuse; an equal opportunity joke employer; no shoes, no shirt, no
jokes; read at your own risk; parental advisory: explicit lyrics;
text may contain material some readers may find objectionable; keep
away from pets and small children; limit one-per-family please; no
money down; no purchase necessary; you need not be present to win;
some assembly required; batteries not included; action figures sold
separately; no preservatives added; jokes may have settled during
mailing; sealed for your protection, do not use if safety seal is
broken; safety goggles may be required during use; call before you
dig; use only with proper ventilation; for external use only; if a
rash, redness, irritation, or swelling develops, discontinue use;
avoid extreme temperatures and store in a cool dry place; keep away
from open flames; do not place jokes near flammable or magnetic
source; avoid inhaling fumes or contact with mucous membranes;
smoking these jokes may be hazardous to your health; the best
safeguard, second only to abstinence, is the use of a good laugh;
joke text is made from 100% recycled electrons and magnetic
particles; no animals were used to test the hilarity of these jokes;
no salt, MSG, artificial colour or flavour added; if ingested, do not
induce vomiting, if symptoms persist, consult a humorologist; jokes
are ribbed for your pleasure; slippery when wet; must be 18 to enter;
possible penalties for early withdrawal; one size fits all; joke
offer valid only at participating jokeshops; slightly higher west of
the Rockies; allow four to six weeks for delivery; if defects are
discovered, do not try to fix them yourself, but return to an
authorized joke service center; this disclaimer does not cover
tornado, flood, hurricane, lightning, earthquake, and other Acts of
God, misuse, neglect, unauthorized repair, damage from improper
installation, typos, misspelled words, incorrect line voltage,
missing or altered signatures, sonic boom vibrations, electromagnetic
radiation from nuclear blasts, customer adjustments that are not
covered in the joke list, and incidents owing to motor vehicle

accidents, ship sinking, airplane crash, accidental file deletions,

projectiles, or dropping the item; other restrictions may apply. If

something offends you, lighten up, get a life, and move on.

1.113   A list of Commercial Titles I Own

This is a list of Commercial Software Titles I own, ie not PD or
Shareware titles.
****

* *

* I WILL NOT COPY THESE DISKS FOR ANYBODY - EVER!!!! *

* *

****

I do not see why I should jeopardize my life because someone cannot be
bothered to spend money and buy pirate versions of games. A lot of
time, money and effort goes into writing these titles, as is so often
found in Shareware too. Why should you be guilty of taking the bread
from their mouths, as it were.

The reason of this list is simple. If you are either stuck on a game
listed, or are looking for tips for cheats, or want to know how to
perform a certain task in a utility, then you can look up the list,
see if I have the title, and write to me with your query. If I cannot
help, I know a lot of people who can!

Here goes then:-

Games

3D Pool

A10 Tank Killer

Air Support

Aladdin

Alien Breed 3D

Another World

Apocalypse

Banshee

Bubba 'N' Stix

Cannon Fodder

Carrier Command

Chaos Engine

Clockwiser

Coala
