1.2 introduction

Welcome to another DRAGON-Tool, again released under the Hotline and Incal
Label, just because I am loyal to both groups .

Anyway, you won't be interested in my group stuff - or ?

This Time I am able to provide you with a GUI version for the most-used
Disk-Masher (hint!) on Amiga ... DMS.

It uses the Commandline Version of DMS, so that you can work more comfortable
with DMS now, because the Original DMSwin Version from ParCon/Blackhawk was
not so nice (in my eyes), and worse - crashed on faster configurations.
