History
```

1.2 why do they think we need this crap ?!

```
measure of pleasure
-----
```

this piece of art was coded by the holy man himself (tab!/tyt h.c.) for all those guys out there who play games for fun ... and ... for HIGHSCORES.

after that smashing release of pinball illusion by zool^ads (by all means... fabio sux!) we early recognized the game using the nonvolatile.library for highscore-saving, but the scores weren't shown anywhere in the game.

so there was a need for some wb-server.

1.3 you got me runnin` ... runnin` .. for you heeee

Installation Procedure

```

copy PIFront to your PinballIllusions maindir

copy PIFront.info to your PinballIllusions maindir

copy Libs/lowlevel.library to libs:

copy Libs/nonvolatile.library to libs:

copy Prefs/Env-Archive/sys/nv_location to SYS:Prefs/Env-Archive/sys/nv_location

    if you want to start the game immediately (without a reboot)
    make sure you've plugged a copy of the "nv_location" to
    env:sys/nv_location.

mkdir sys:Prefs/nonvolatile

    please note that if you have already installed any game
    using the nonvolatile.library make sure your "nv_location"
    file is located in your sys:prefs/env-archive/sys/ drawer.

mkdir sys:Prefs/nonvolatile/PinballIllusions

copy Prefs/nonvolatile/PinballIllusions/Table00* (3 files!) to
    sys:Prefs/nonvolatile/PinballIllusions/

'nuff...
```

1.4 wAs zu druecken 94

KEYS

```

F1-F8.....1-8 pLAYERS
F9/10.....tOGGLE lo/hIRES
D.....???
SPACE.....TILT
RETURN.....FLIP
ENTER.....OK/YES/SHOOT/wOTEVER
LSHIFT, LALT, LAMIGA.....lEFT fLIPPER
RSHIFT, RALT, RAMIGA.....rIGHT fLIPPER
LAMIGA, RAMIGA, CTRL.....exit light
```

1.5 and i come baby ... comin` to get ya

lift off

simply enter your PinballIllusions drawer (via cli or wb!) and execute

PIFront.

Play Game - will load main.dat (if possible!)

Join Highscores - the best part! this will let you specify (via reqtools) a highscore-table file to join the actual shown highscores with.

remember: joining is a dangerous task cause the software will not stop you from joining the highscore tables of two different flippers.

if the joining was successful the frontend will immediately show up the new stats and will also pop up a requester asking whether to save the joined table or not (using "Replace" will OVERWRITE your nv_location/PinballIllusions/Table00x file!!).

if you are not satisfied by the result of the join procedure simply click on "Abort".

Save Highscores - saves the current shown highscores to a file of your choice.

mind the name: Table001 - lAW 'N jUSTICE
 Table002 - bABEwATCH
 Table003 - eXTREME sPORTS

Exit to DOS - quits off the production of the year :)

1.6 YEZ! mr. mr. and mr. highscore...

Ladies and Gentlemen ... THE CREDITS

```
+-----+
| [Tab!]          main coding / main design / main everything |
| gIANTS (mUSHROOM!) additional coding / guidewriter / dr. smoke |
| mYXIN (rEAL fUCKER) endless Beta testing / mr. raytrace / lederspatz |
