1.1 SAS/C Help

This is the main help screen for the SAS/C AmigaGuide Help Utility. This screen provides links to all other SAS/C Help Screens.

```
CodeProbe Debugger (CPR)
Compiler and Linker Error and Warning Messages
Utilities
Compiler Options
Linker Options
Library Functions
SAS/C Editor (SE)
Common Problems
Contacting Technical Support
```

1.2 Contacting Technical Support

Before contacting Technical Support, you should have the following:

- Your registration number
- Your version number
- A complete and succinct problem description
- A list of which compiler and linker options you are using
- A list of which parts of the product that you did not install

To contact Technical Support, call:

In the US, Canada, and Europe: (919) 677-8009

In Australia: (02) 428 0428

In New Zealand: (04) 727 595

1.3 HELP

You have reached this Help window by either clicking on the Help button or by hitting the Help key within the SAS/C Help utility. Unlike other help topics present in the SAS/C Help utility, the Help help topic opens its own window. You must close this window by clicking on the close gadget or hitting escape before returning to the SAS/C help utility. You cannot hit the Retrace button to return.

To quit the SAS/C Help utility, select Quit from the Project menu or click on the close gadget. You may also hit escape.

Most help screens will display one or more buttons as part of the text. Clicking on these buttons will provide further information on the topic listed on the button. You can also reach these help topics through the main Contents screen or one of its sub-screens.

In addition, double-clicking in the help window will bring up a help screen for the word under the mouse cursor, if such a help screen exists.

While in the SAS/C Help utility, you may retrace your steps through the help screens you have selected by clicking on the Retrace button.

The Browse buttons will move you forward and backwards between help screens. The help screens are usually arranged alphabetically by command or topic.
